Broadband
Multiband

- A single technology is unlikely to serve the diverse needs of all first responders
- Networks, devices, and applications must all support multiple technologies
 - Converged Networks support Group Communication Services
 - Converged Devices support multiple technologies
 - Converged Applications run on multiple platforms

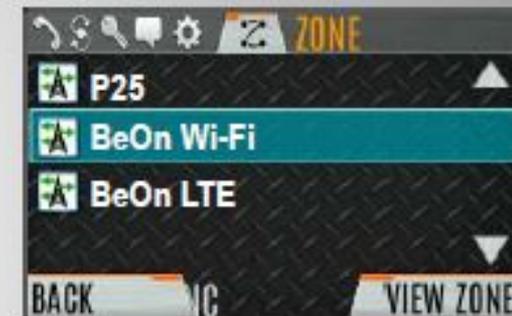

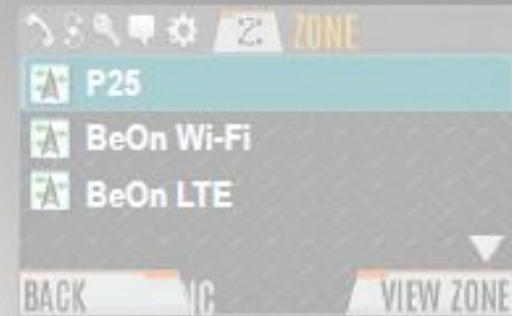

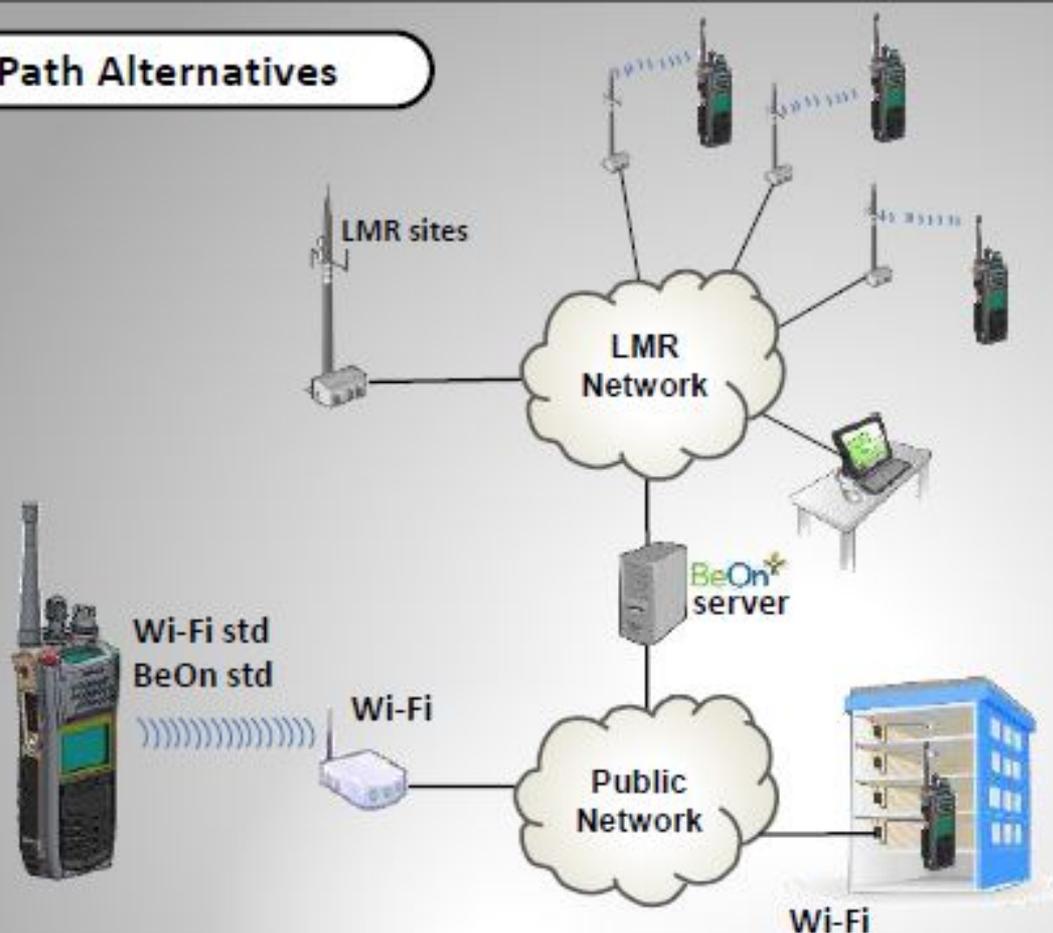

RF Path Alternatives

Choose a **P25** System/Zone

RF Path Alternatives

Or a **Wi-Fi** System/Zone

Question: Does the BeOn app come for free on the radio?

Answer: Yes. (Similarly, BeOn can be downloaded free from the app store onto a phone)

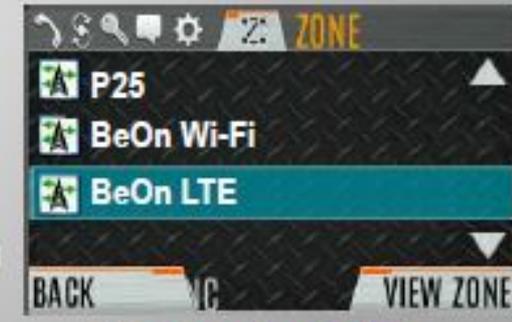

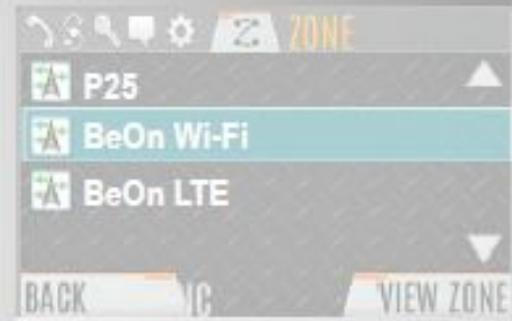

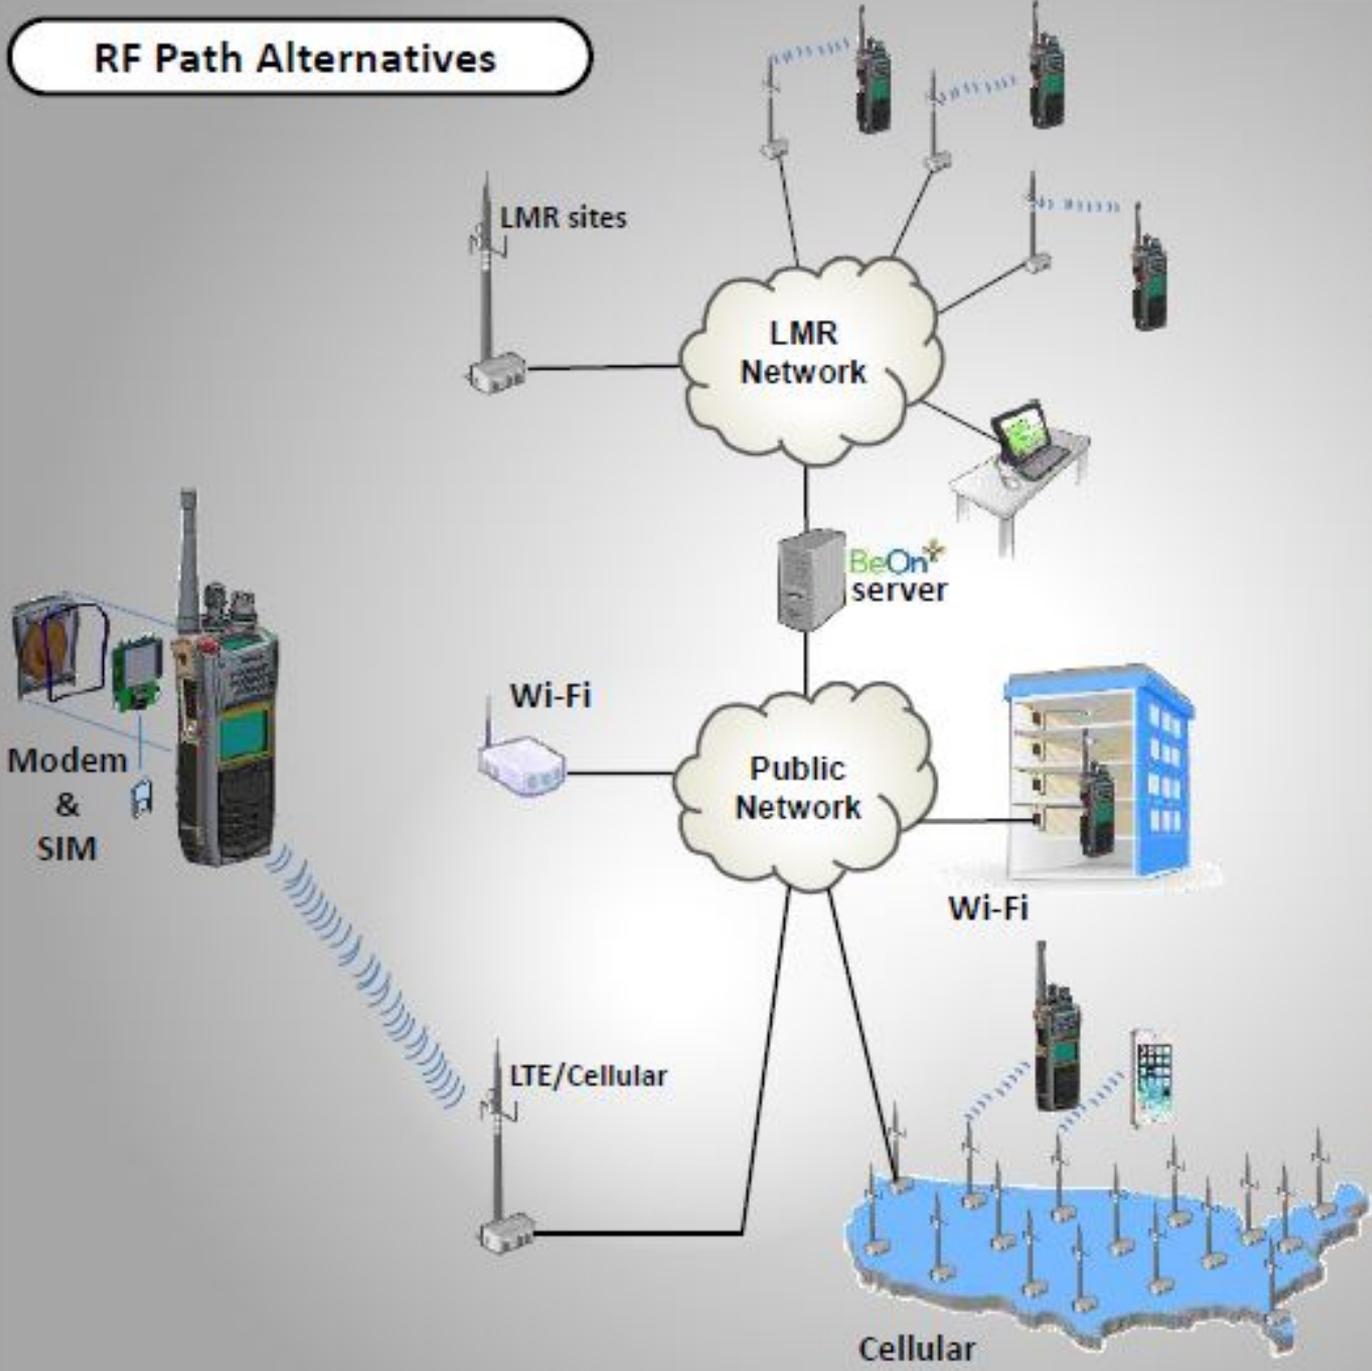

Question: Does that mean BeOn is free?

Answer: No, only on the radio. You still need to pay for a server license

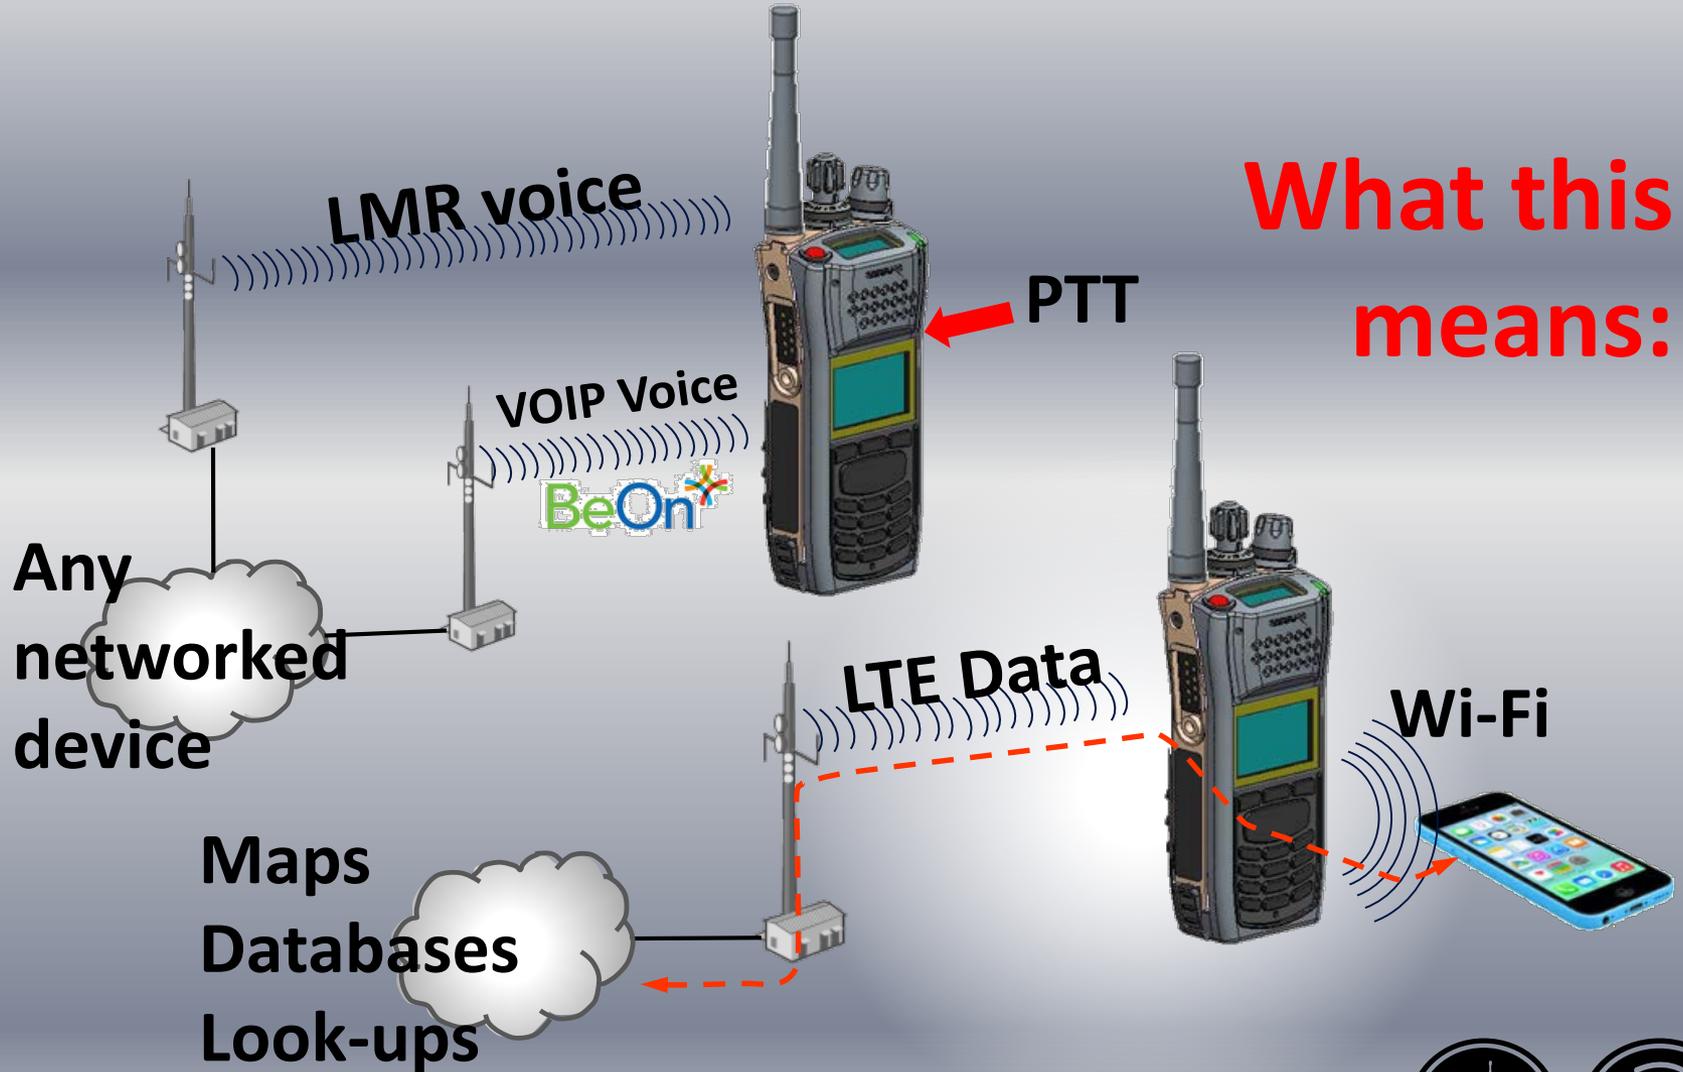

Question: How do I get access to a BeOn server?

Answer: A BeOn server has been included with every P25 system ever since SR10A.
And our RCEs offer BeOn subscriptions.

RF Path Alternatives

Or Cellular/LTE

What this means:

*Harris
Connects Smartphones with P25*

SmartPhone on any
Commercial 3G/4G
network

P25 Voice Features

P25 Radios & Consoles
on a Harris P25
network

Only full P25 Broadband Solution

A stylized logo for P25, with the letters "P25" in a bold, grey, sans-serif font. A small circular icon with a plus sign is positioned above the number "5".The logo for BeOn, featuring the word "BeOn" in a blue sans-serif font with a colorful starburst icon above the letter "o".

P25 AMBE VOCODER

Group, individual and confirmed calls

Distress calls

Priority and preemption

256-bit AES encryption

Late call entry

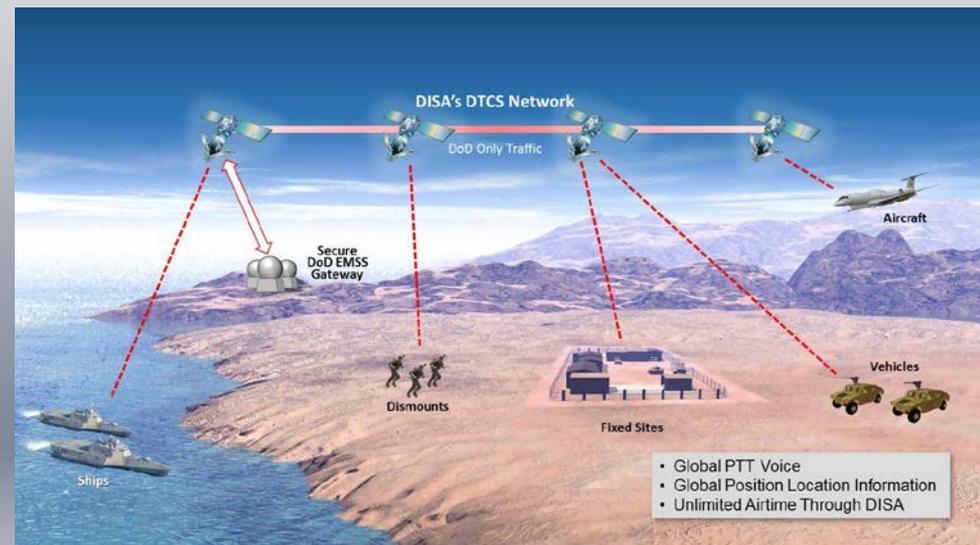

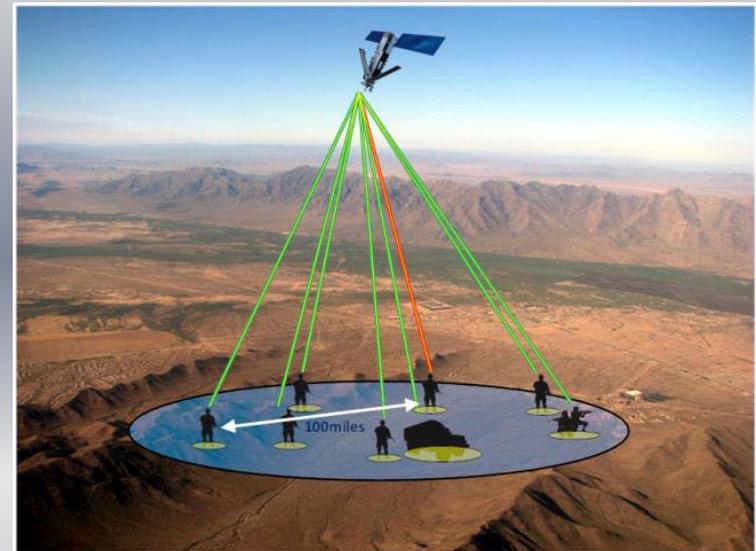

Featured dispatch capabilities

- Distributed Tactical Communications System (DTCS)
- Operates on the Enhanced Mobile Satellite System
 - Connects USG and Emergency Management partners to the commercial Iridium satellite constellation.
 - Dedicated and secure DoD and EM gateway.
- Voice and data communications
- Field configurable multi-net operation
- Global Friendly Force Tracking (FFT) utilizing built in GPS receiver
- Un-tethered operation with built-in speaker and mic
- Headsets/Handsets compatible via standard 6-pin interface
- Secure communications utilizing NIST certified AES 256 encryption

- Tactical Nets
 - Tactical use within ~250miles
 - PTT
 - Messaging (Short Data Burst SDB)
 - Regional Positioning Location Info (PLI)
- Global Nets
 - PTT
 - Global Use covering wide areas
 - Gateway directed traffic
 - Global PLI
 - Messaging
- Gateway back to LMR systems and also back to LTE.

The RO-MAP is a rugged PDA providing Situational Awareness (SA) and Beyond Line of Sight (BLOS) messaging via the RO Tactical Radio

- **Situational Awareness via dynamic-map display of PLI information**
 - Precise MGRS grid and heading information
- **Monitor and participate in “Chat” messaging sessions between net members**
- **Over-the-shoulder remote control of the RO Tactical Radio**
- **Ease of use, rugged, and long battery life**

- EMSS Airtime
 - Unlimited number of subscribers
 - Unlimited Usage
 - No additional cost for increasing subscriptions or usage
 - One time RO activation charge
 - One time Net activations charge
