

EXECUTIVE BIO

Mr. Jamie Brown's career has showcased his leadership and technical capabilities in the highly competitive telecommunications, data networking and high tech industries for Bell Northern Research, Nortel Networks, Tekelec, ADC, Polycom, Dell and now as the Chief Technical Officer at CyberReef Solutions. CyberReef Solutions is a cutting-edge startup blazing new paths in Cloud-Based Wireless Cyber Security and Bandwidth Management Services. His record encompasses more than 30+ years as a skilled technologist and experienced analytical strategist.

His experiences have armed him with unique insights into industry challenges and technologies and network architectures. His teams have led the challenge to exceed aggressive business goals and technical innovations. Those technical innovations span Wireline, Wireless, Video, Wireless Internet, Packet Data, IP, and now Cloud based services focused on Cyber Security and Cloud Bandwidth Management Services.

Mr. Brown began his academic career entering the United States Air Force Academy Preparatory School. Upon graduation, he received an appointment to the United States Air Force Academy. With that solid foundation he then achieved a Bachelor of Arts in Computer Science and Business Administration from East Carolina University before taking his first role with Bell Northern Research.
