**THIS PAGE INTENTIONALLY LEFT BLANK**

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Planning

### CORE CAPABILITY DESCRIPTION

Conduct a systematic process engaging the whole community as appropriate in the development of executable strategic, operational, and/or tactical-level approaches to meet defined objectives.

### Critical Task(s)

*Identify critical objectives during the planning process, provide a complete and integrated picture of the sequence and scope of the tasks to achieve the objectives, and ensure the objectives are implementable within the timeframe contemplated within the plan using available resources for prevention-related plans.*

*Develop and execute appropriate courses of action in coordination with local, state, tribal, territorial, Federal, and private sector entities in order to prevent an imminent terrorist attack within the United States.*

### Core Capability Standardized Target(s)

Within every **(#) (time)**, update all emergency operations plans that define the roles and responsibilities of **(#)** partner organizations involved in incident management across **(#)** jurisdictions affected, and the sequence and scope of tasks needed to prevent, protect, mitigate, respond to, and recover from events.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Planning

## Planning & Exercise

**Functional Areas:** Planning Process (development of critical objectives) || Terrorism Prevention Planning || Pre- Incident Planning || Continuity of Operations || Crisis Action Planning || Integrating Different Plans (strengthening planning partnership initiatives) || Collaborative Investigative Process || Emergency Evacuation || Incorporating Real Time Intelligence || Systematic Collection and Analysis of Information || Making Appropriate Assumptions to Inform Decision Makers || Development of Options Upon Discovery of Credible Information || Operational Planning (coordinated decision making) ||

**Potential Partners:** Counterterrorism Professionals/Joint Terrorism Task Forces || Decision Makers/Policy Makers || Intelligence entities || State Fusion Centers || FBI and DHS field and Headquarter Elements ||

## Training Opportunities

NAME	COURSE #	OFFERED BY
Introduction to FEMA Operational Planning	IS-2002	FEMA
Multihazard Emergency Planning for Schools	IS-362	FEMA
Sport Event Risk Management	AWR167	TEEX
Sport Venue Evacuation and Protective Actions	MGT412	TEEX
Devolution Planning	IS-551	FEMA
Introduction to Continuity of Operations	IS-1300	FEMA
Law Enforcement Active Shooter Emergency Response	PER-275	Center for Domestic Preparedness
Evacuation Planning Strategies and Solutions	MGT-461	NDPTC
Law Enforcement Prevention and Deterrence of Terrorist Acts	AWR-122	LSU
Integrating Access and Functional Needs into Emergency Planning	EO-192	FEMA
Terrorism and Counterterrorism: Comparing Theory and Practice	Online	Coursera

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Public Information & Warning

### Core Capability Description

Deliver coordinated, prompt, reliable, and actionable information to the whole community through the use of clear, consistent, accessible, and culturally and linguistically appropriate methods to effectively relay information regarding any threat or hazard and, as appropriate, the actions being taken, and the assistance being made available.

### Critical Task(s)

*Share prompt and actionable messages, to include National Terrorism Advisory System alerts, with the public and other stakeholders, as appropriate, to aid in the prevention of imminent or follow-on terrorist attacks, consistent with the timelines specified by existing processes and protocols.*

*Provide public awareness information to inform the general public on how to identify and provide terrorism-related information to the appropriate law enforcement authorities, thereby enabling the public to act as a force multiplier in the prevention of imminent or follow-on acts of terrorism.*

### Core Capability Standardized Target(s)

Within **(#) (time)** notice of an incident, deliver reliable and actionable information to **(#)** people affected, including **(#)** people with access and functional needs (affected) and **(#)** people with limited English proficiency affected.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Public Information & Warning

## Planning & Exercise

**Functional Areas:** Public awareness campaigns. || Developing standard operating procedures for public information. || Tailored messaging. || Delivering actionable guidance (protective action recommendations). || Creating unified messaging. || Alerts and warnings: leveraging mass notification infrastructure and developing an effective community warning process. || Identifying community-specific communication issues. || Whole community emergency communication strategy. || Working with the news media to create a warning partnership.

**Potential Partners:** Intelligence Entities || State Fusion Centers || FBI and DHS Field and Headquarter Elements || Decision Makers/Policy Makers || National Terrorism Advisory System (NTAS) || Public Information Officers || News Media || Community Policing/Outreach Groups and Joint Counterterrorism Assessment Teams ||

## Training Opportunities

Community Preparedness: Implementing Simple Activities for Everyone	IS-909	FEMA
Social Media Tools and Techniques	PER 344	NDPTC

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Operational Coordination

### Core Capability Description

Establish and maintain a unified and coordinated operational structure and process that appropriately integrates all critical stakeholders and supports the execution of Core Capabilities.

### Critical Task(s)

Execute operations with functional and integrated communications among appropriate entities to prevent initial or follow-on terrorist attacks within the United States in accordance with established protocols.

### Core Capability Standardized Target(s)

Within **(#) (time)** of a potential or actual incident, establish and maintain a unified and coordinated operational structure and process across **(#)** jurisdictions affected and with **(#)** partner organizations involved in incident management. Maintain for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Operational Coordination

## Planning & Exercise

**Functional Areas:** Unity of command. || Establishing a common operating picture. || Senior decision/ policy maker oversight and decision process. || Ensure unity of effort including coordinating activities with all relevant stakeholders. || Investigative and intelligence coordination process. || Multiagency communication. || Developing an ICS/EOC interface action plan for your community. || Establishing clear lines of communication among participating organizations, both horizontally and vertically. || Ensure information flow including develop, facilitate or test an intelligence or information sharing plan. || Determine operational priorities, objectives, strategies and resource allocation and coordinate activities across all levels of government.

**Potential Partners:** Policy Makers/Decision Makers || Horizontal and Vertical Jurisdictions || Emergency Management || Counterterrorism Professionals/Joint Terrorism Task Forces || Intelligence Entities || Analytic and Investigative Groups || State Fusion Centers ||

## Training Opportunities

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Intelligence and Information Sharing

### Core Capability Description

Provide timely, accurate, and actionable information resulting from the planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation, and feedback of available information concerning physical and cyber threats to the United States, its people, property, or interests; the development, proliferation, or use of WMDs; or any other matter bearing on U.S. national or homeland security by local, state, tribal, territorial, Federal, and other stakeholders. Information sharing is the ability to exchange intelligence, information, data, or knowledge among government or private sector entities, as appropriate.

### Critical Task(s)

*Anticipate and identify emerging and/or imminent threats through the intelligence cycle.*

*Share relevant, timely, and actionable information and analysis with local, state, tribal, territorial, Federal, private sector, and international partners and develop and disseminate appropriate classified/unclassified products.*

*Ensure local, state, tribal, territorial, Federal, and private sector partners possess or have access to a mechanism to submit terrorism-related information and/or suspicious activity reports to law enforcement.*

### Core Capability Standardized Target(s)

During steady state, and in conjunction with the fusion center and/or Joint Terrorism Task Force (JTTF), every **(#) (time)**, review ability to effectively execute the intelligence cycle, including the planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation, and feedback of available information, and identify the **(#)** personnel assigned to support execution of the intelligence cycle. Then, within **(#) (time)** of the identification or notification of a credible threat, identify/analyze local context of the threat for the respective area of responsibility, and facilitate the sharing of threat information with **(#)** priority intelligence stakeholder agencies/entities in accordance with the intelligence cycle, and all dissemination protocols.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Intelligence and Information Sharing

## Planning & Exercise

**Functional Areas:** Intelligence cycle including planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation and feedback. || Information sharing (to local partners and to terrorism/suspicious activity reporting sites). || Establishment of a suspicious activity reporting process. || Virtual information sharing. || Standardized approach to sharing and analyzing information || Protecting citizens’ privacy, civil rights, and civil liberties. || Testing a community reporting public awareness program (for example: See Something, Say Something Campaign).

**Potential Partners:** Law Enforcement Officials || Counterterrorism Professionals/Joint Terrorism Task Forces || Intelligence Entities || State Fusion Centers || FBI and DHS field and Headquarter Elements || Analytic and Investigative Groups || Community Policing and Outreach Groups.

## Training

NAME	COURSE #	OFFERED BY
Advanced Situational Awareness and Common Operating Picture	E0143	FEMA EMI
Foundations of Intelligence Analysis (FIAT)	5 days	International Association of Law Enforcement Intelligence Analysis
Cyber Threat Intelligence	FOR578	SANS
Packaging Classified Documents	Online Video	Center for Development of Security Excellence
Need-to-Know Training Video	Online Video	Center for Development of Security Excellence

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Interdiction & Disruption

### Core Capability Description

**Delay, divert, intercept, halt, apprehend, or secure threats and/or hazards.**

### Critical Task(s)

*Maximize our ability to interdict specific conveyances, cargo, and persons associated with an imminent terrorist threat or act in the land, air, and maritime domains to prevent entry into the United States or to prevent an incident from occurring in the Nation.*

*Conduct operations to render safe and dispose of CBRNE hazards in multiple locations and in all environments, consistent with established protocols.*

*Prevent terrorism financial/material support from reaching its target, consistent with established protocols.*

*Prevent terrorist acquisition of and the transfer of CBRNE materials, precursors, and related technology, consistent with established protocols.*

*Conduct tactical counterterrorism operations in multiple locations and in all environments.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of the identification or notification of a credible threat, conduct outreach to the fusion center and Joint Terrorism Task Force (JTTF) in the community and identify **(#)** personnel assigned to support follow up interdiction and disruption activities that may be undertaken against identified suspects and/or contraband.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Interdiction & Disruption

## Planning & Exercise

**Functional Areas:** CBRNE hazards including proper disposal and accountability of materials. || Antiterrorism and counterterrorism campaigns. || Financial accountability and discipline including recognition of, and action against misuse. || CBRNE exercise including CBRNE detection and safe rendering. || Interdicting cargo, conveyances, and persons. ||

**Potential Partners:** Law Enforcement Officials || Civil Air Patrol || Intelligence Entities || Investigative Groups || Community Policing || Outreach Groups, CBRNE/HAZMAT Responders || Waste Management || Transportation Agencies (including rail, air, water and road) and Joint Counterterrorism Assessment Teams.

## Training

Advanced Tactical Operations: WMD Interdiction	PER227	LSU
Terrorism and WMD Awareness in the Workplace	AWR 187	Rural Domestic Preparedness Consortium
Surveillance Awareness: What You Can Do	IS-914	FEMA
Site Protection through Observational Techniques (SPOT)	AWR219	LSU
Seaport Security Antiterrorism Training (SSATP)	SSATP	Federal Law Enforcement Training Accreditation

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Screening, Search, & Detection

### Core Capability Description

Identify, discover, or locate threats and/or hazards through active and passive surveillance and search procedures. This may include the use of systematic examinations and assessments, bio-surveillance, sensor technologies, or physical investigation and intelligence.

### Critical Task(s)

*Maximize the screening of targeted cargo, conveyances, mail, baggage, and people associated with an imminent terrorist threat or act using technical, non-technical, intrusive, or non-intrusive means. Initiate operations immediately to locate persons and networks associated with an imminent terrorist threat or act.*

*Conduct CBRNE search/detection operations in multiple locations and in all environments, consistent with established protocols.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of notice of a credible threat, conduct screening, search, and detection operations for **(#)** people requiring screening, including **(#)** people with access and functional needs (requiring screening).

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Screening, Search, & Detection

## Planning & Exercise

**Functional Areas:** Screening process including legal considerations. || Screening and detection methods: explosive trace detectors (ETDs), canines, advanced X-ray systems. || Operational requirements methodology including clear state of security needs based on risk faced. || Methods for searching people and belongings. || Enhancing situational awareness. || Establish a screening strategy including factors such as the desired throughput or flow of individuals and their belongings; space constraints and location; and integration with other security measures. || Implementation of robust screening measures. ||

**Potential Partners:** Intelligence Entities || Law Enforcement Officials || Analytic and Investigative Groups || Community Policing || Outreach Groups || Counterterrorism Professionals/Joint Terrorism Task Forces || Transportation Agencies (including rail, air, water and road) ||

## Training

NAME	COURSE #	OFFERED BY
Seaport Security Antiterrorism Training (SSATP)	SSATP	Federal Law Enforcement Training Accreditation
Crime Scene Management for CBRNE Incidents	AWR 103	National Domestic Preparedness Consortium
Site Protection through Observational Techniques (SPOT) Training	AWR219	LSU
Surveillance Detection	PER346	Center for Domestic Preparedness
Surveillance Awareness: What You Can Do	IS-914	FEMA
Protecting Critical infrastructure Against Insider Threats	IS-915	FEMA
Preventive Radiological/Nuclear Detection (PRND) Secondary Screener/RIID	PER 351	TEEX
Law Enforcement Prevention and Deterrence of Terrorist Acts	AWR 122	LSU
Improvised Explosive Device (IED) Search Procedures Course	PER 339	Center for Domestic Preparedness
Suspicious Activity Reporting (SAR)	Online	Nationwide SAR Initiative (SAR)

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Prevent, avoid or stop an imminent, threatened or actual act of terrorism.**

## Forensics & Attribution

### Core Capability Description

Conduct forensic analysis and attribute terrorist acts (including the means and methods of terrorism) to their source, to include forensic analysis as well as attribution for an attack and for the preparation for an attack, in an effort to prevent initial or follow-on acts and/or swiftly develop counter-options.

### Critical Task(s)

- Prioritize physical evidence collection and analysis to assist in preventing initial or follow-on terrorist acts.*
- Prioritize chemical, biological, radiological, nuclear, and explosive (CBRNE) material (bulk and trace) collection and analysis to assist in preventing initial or follow-on terrorist acts.*
- Prioritize biometric collection and analysis to assist in preventing initial or follow-on terrorist acts.*
- Prioritize digital media, network exploitation, and cyber technical analysis to assist in preventing initial or follow-on terrorist acts.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of a suspected terrorist attack, conduct outreach to the fusion center and Joint Terrorism Task Force (JTTF) in the community and identify **(#)** personnel assigned to support follow up information sharing, intelligence analysis, and/or investigative actions associated with the collection, examination, and analysis of evidence, as well as the identification of perpetrators.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Forensics & Attribution

## Planning & Exercise

**Functional Areas:** Evidence collection and forensic analysis including CBRNE materials and biometrics. || Digital media and network exploitation. || Information/cyber security. || Locate, document, collect and preserve physical evidence. || Field screen evidence. || Characterize physical evidence including identification of the substance, production methods, packaging, delivery devices, dissemination, release methods. || Crime scene documentation, preservation and exploitation. || Determine role of CSI at a CBRNE vs Non-CBRNE crime scene. ||

**Potential Partners:** Counterterrorism Professionals/Joint Terrorism Task Forces || Intelligence Entities || Law Enforcement Officials || Analytic and Investigative Groups || CBRNE/HAZMAT Responders ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Planning

### Core Capability Description

Conduct a systematic process engaging the whole community as appropriate in the development of executable strategic, operational, and/or tactical-level approaches to meet defined objectives.

### Critical Task(s)

*Develop protection plans that identify critical objectives based on planning requirements, provide a complete and integrated picture of the sequence and scope of the tasks to achieve the planning objectives, and implement planning requirements within the timeframe contemplated within the plan using available resources for protection-related plans.*

*Implement, exercise, and maintain plans to ensure continuity of operations.*

### Core Capability Standardized Target(s)

Within every **(#) (time)**, update all emergency operations plans that define the roles and responsibilities of **(#)** partner organizations involved in incident management across **(#)** jurisdictions affected, and the sequence and scope of tasks needed to prevent, protect, mitigate, respond to, and recover from events.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Planning

## Planning & Exercise

**Functional Areas:** Security protocol resilience. || Adopting redundancy. || Leveraging “Self-Healing” technologies. || Promoting workforce surety programs. || Scalability across jurisdictions and sectors. || Incorporating risk analysis. || Shared Responsibility || Integration, synchronization, and resilience across jurisdictions. || Including individuals with access and functional needs. || Determine risk management priorities. || Continuity of operations planning. || Security planning and resource allocation. || Establishing joint protection objectives. || Coordinated information sharing between partners. || Joint guidance within multidisciplinary plans. || Assessing the continuation of essential functions and services. || Protection of key leadership and events. ||

**Potential Partners:** Decision Makers/Policy Makers || Emergency Management || Critical Infrastructure Owner-Operators || Private Sector Partners || Business Owners/Managers || Horizontal and Vertical Jurisdictions ||

**MISSION AREA**      **PROTECTION**

Mission Area Definition:      **Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Public Information & Warning

### Core Capability Description

Deliver coordinated, prompt, reliable, and actionable information to the whole community through the use of clear, consistent, accessible, and culturally and linguistically appropriate methods to effectively relay information regarding any threat or hazard and, as appropriate, the actions being taken, and the assistance being made available.

### Critical Task(s)

*Use effective and accessible indication and warning systems to communicate significant hazards to involved operators, security officials, and the public (including alerts, detection capabilities, and other necessary and appropriate assets).*

### Core Capability Standardized Target(s)

Within **(#) (time)** notice of an incident, deliver reliable and actionable information to **(#)** people affected, including **(#)** people with access and functional needs (affected) and **(#)** people with limited English proficiency affected.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Public Information & Warning

## Planning & Exercise

**Functional Areas:** Public awareness campaigns. || Information sharing requirements and processes including the whole community and all levels of government. || Delivering protective action recommendations. || Leveraging mass notification infrastructure. || Identifying community-specific communication issues. || Developing an effective community warning process. || Working with the news media to create a warning partnership. || Development of community-based feedback loops to engage high-risk groups and address communication challenges.

**Potential Partners:** Public Information Officers || Emergency Management || News Media || 911 Operators, Call Takers and Dispatchers || Critical Infrastructure Owner-Operators || Private Security Groups

## Intelligence & Information Sharing

### Core Capability Description

Provide timely, accurate, and actionable information resulting from the planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation, and feedback of available information concerning physical and cyber threats to the United States, its people, property, or interests; the development, proliferation, or use of WMDs; or any other matter bearing on U.S. national or homeland security by local, state, tribal, territorial, Federal, and other stakeholders. Information sharing is the ability to exchange intelligence, information, data, or knowledge among government or private sector entities, as appropriate.

### Critical Task(s)

*Anticipate and identify emerging and/or imminent threats through the intelligence cycle.*

*Share relevant, timely, and actionable information and analysis with local, state, tribal, territorial, Federal, private sector, and international partners, and develop and disseminate appropriate classified/unclassified products.*

*Provide local, state, tribal, territorial, Federal, and private sector partners with or access to a mechanism to submit terrorism-related information and/or suspicious activity reports to law enforcement.*

### Core Capability Standardized Target(s)

During steady state, every **(#) (time)**, review ability to effectively execute the intelligence cycle, including the planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation, and feedback of available information, and identify the **(#)** personnel assigned to support execution of the intelligence cycle. Then, within **(#) (time)** of the identification or notification of a credible threat, identify/analyze local context of the threat for the respective area of responsibility, and facilitate the sharing of threat information with **(#)** priority intelligence stakeholder agencies/entities in accordance with the intelligence cycle, and all dissemination protocols.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Intelligence & Information Sharing

## Planning & Exercise

**Functional Areas:** Intelligence cycle including planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation and feedback. || Information sharing to local partners and to terrorism/suspicious activity reporting sites. || Information analysis. || Information/intelligence product development. || Identifying information sources. || Document, report and analyze suspicious activity. || Using analytical methodology, draw conclusions and recommend actions producing intelligence products. || Intelligence product distribution including with critical infrastructure owner-operators. || Analysis of pre-terrorist operational planning. ||

**Potential Partners:** Law Enforcement Officials || Counterterrorism Professionals/Joint Terrorism Task Forces || Intelligence Entities || State Fusion Centers || FBI and DHS field and Headquarter Elements || Analytic and Investigative Groups || Community Policing and Outreach Groups || Private Security Groups || Critical Infrastructure Owner-Operators ||

Interdiction & Disruption

## Planning & Exercise

**Functional Areas:** Insider threat program. || Border security and enforcement: air, land and seaports. || Transportation security || Risk-informed culture including vigilance, situational awareness, information sharing and risk-informed decision making. || CBRNE detection capacity. || Public health measures to mitigate the spread of disease from abroad. || Counter-acquisition activities for terrorist financing. || Counter messaging for violent extremism/terrorism. || Use of community policing principles and practices to recognize and counter violent extremism and prevent terrorism. || Categorize actionable information for dissemination to law enforcement agencies. || Establishment of anti-terrorism task forces. || Enhance visual presence of law enforcement. || Employ wide-area search and detection assets in targeted areas. ||

**Potential Partners:** Critical Infrastructure Owner – Operators || Private Sector Partners || Private Security Groups || Venue or Site Security || Law Enforcement Officials || Transportation Agencies (including rail, air, water and road) || Healthcare || Schools/Universities || CBRNE/HAZMAT Responders ||

## Training

NAME	COURSE #	OFFERED BY
Seaport Security Antiterrorism Training (SSATP)	SSATP	Federal Law Enforcement Training Accreditation
Surveillance Awareness: What You Can Do	IS914	FEMA
Surveillance Detection	PER346	Center for Domestic Preparedness
Homemade Explosives: Awareness, Recognition, and Response	AWR313	FEMA
Strategic, Tactical, and Resilient Interdiction of Violent Extremism (STRIVE)	STRIVE	Washington State Criminal Justice Training Commission
Planning and Intervention for Gangs, Hate and Terrorist Groups in Rural Jails and Prisons	MGT401	Rural Domestic Preparedness Consortium
Law Enforcement Prevention and Deterrence of Terrorist Acts	AWR 122	LSU
Standardized Awareness Training	AWR160	Center for Domestic Preparedness
Tactical Planning for WMD Incidents	MGT321	National Center for Biomedical Research & Training
Advanced Tactical Operations: WMD Interdiction	PER227	LSU

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:

**Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Screening, Search, & Detection

### Core Capability Description

Identify, discover, or locate threats and/or hazards through active and passive surveillance and search procedures. This may include the use of systematic examinations and assessments, bio-surveillance, sensor technologies, or physical investigation and intelligence.

### Critical Task(s)

*Ensure critical infrastructure sectors and Protection elements have and maintain risk assessment processes to identify and prioritize assets, systems, networks, and functions.*

*Ensure operational activities and critical infrastructure sectors have and maintain appropriate threat, vulnerability, and consequence tools to identify and assess threats, vulnerabilities, and consequences.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of notice of a credible threat, conduct screening, search, and detection operations for **(#)** people requiring screening, including **(#)** people with access and functional needs (requiring screening).

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Screening, Search, & Detection

## Planning & Exercise

**Functional Areas:** Identification of potential threats / risk analysis. || Situational awareness. || Active and passive surveillance. || Search procedures. || Carrier screening. || Screening of cargo, conveyances, mail, baggage, and people. || Traditional and emerging threat integration. || Community engagement programs such as See Something, Say Something. || Identification of potential targets of adversarial surveillance. || Cross-cutting risks and associated dependencies that may have cascading impacts with and across sectors. || Use of technical, non-technical, intrusive, and non-intrusive screening means without hindering flow of legitimate commerce. || Assess risk from interdependencies and concentrated dependence on technology. ||

**Potential Partners:** Critical Infrastructure Owner – Operators || Private Sector Partners || Private Security Groups || Venue or Site Security || Law Enforcement Officials || Intelligence Entities || Analytic and Investigative Groups || State Fusion Centers || Transportation Agencies (including rail, air, water and road) || Healthcare || Schools/Universities || Health Surveillance Networks ||

## Training

NAME	COURSE #	OFFERED BY
Critical Infrastructure Security and Resilience Awareness	AWR213	TEEX
Surveillance Detection	PER346	Center for Domestic Preparedness
Surveillance Awareness: What You Can Do	IS912	FEMA
Critical Infrastructure Security: Theft and Diversion	IS916	FEMA
Protecting Critical Infrastructure against Insider Threat	IS-915	FEMA
Retail Security Awareness	IS912	FEMA
Workplace Security Awareness	IS906	FEMA
Seaport Security Antiterrorism Training (SSATP)	SSATP	Federal Law Enforcement Training Accreditation
Commercial Vessel Boarding Training Program	CVBTP	Federal Law Enforcement Training Accreditation
Commercial Vehicle Counterterrorism Training Program	CVCTP	Federal Law Enforcement Training Accreditation

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Mission Area Definition:

**Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Access Control & Identity Verification

### Core Capability Description

Apply and support necessary physical, technological, and cyber measures to control admittance to critical locations and systems.

### Critical Task(s)

*Implement and maintain protocols to verify identity and authorize, grant, or deny physical and cyber access to specific locations, information, and networks.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an event, be prepared to accept credentials from **(#)** partner organizations involved in incident management.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Access Control & Identity Verification

## Planning & Exercise

**Functional Areas:** Resilience including adopting redundancy. || Initiating active or passive countermeasures. || Installing security systems. || Promoting workforce surety programs and implementing cybersecurity measures. || Scalability across jurisdictions and sectors. || Integration, synchronization, and resilience across jurisdictions. || Suspicious behavior identification. || Identity management. || Authentication, authorization, and accountability. || Control and limit access to critical locations and systems. || Identity verification protocols. || Physical and cyber access checkpoints. || Multi-factor identification. || Course & fine authorization. || Defining denial criterial and waiver process. ||

**Potential Partners:** Critical Infrastructure Owner – Operators || Private Sector Partners || Private Security Groups || Venue or Site Security || Law Enforcement Officials || Transportation Agencies (including rail, air, water and road) || Healthcare || Schools/Universities || Information/Cyber Security || Information and Communications Technology ||

## Training

NAME	COURSE #	OFFERED BY

MISSION AREA

PREVENTION

PROTECTION

MITIGATION

RESPONSE

RECOVERY

Mission Area Definition:

**Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Cybersecurity

### Core Capability Description

**Protect (and, if needed, restore) electronic communications systems, information, and services from damage, unauthorized use, and exploitation.**

### Critical Task(s)

*Implement risk-informed guidelines, regulations, and standards to ensure the security, reliability, integrity, and availability of critical information, records, and communications systems and services through collaborative cybersecurity initiatives and efforts.*

*Implement and maintain procedures to detect malicious activity and to conduct technical and investigative-based countermeasures, mitigations, and operations against malicious actors to counter existing and emerging cyber-based threats, consistent with established protocols.*

### Core Capability Standardized Target(s)

Every **(#) (time)**, appropriate authorities review and update cyber incident plans/annexes based on evolving threats covering **(#)** publicly managed and/or regulated critical infrastructure facilities.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Cybersecurity

## Planning & Exercise

**Functional Areas:** Cyber security threats. || Enhancing security awareness. || Cross sector collaborative cybersecurity initiatives. || Cybersecurity governance. || Community engagement including remote assistance, advisory deployment, remote deployment and on-site deployment. || Cyber incident response. || Cybersecurity insurance. || Vulnerability management. || Cyber security related information sharing. || Conducting vulnerability scans and recognizing vulnerabilities in security systems. || Interpreting the information collected by network tools. || Characterize and analyze network traffic to identify anomalous activity. || Cyber defense trend analysis and reporting. || Prompt suspected cyber incident notification. || Continuity of operations for cyber systems. || Analyze potential impact across critical infrastructure. || Share actionable cyber threat information. || Analyze user and attacker behavior. || Setting intruder traps. || Conducting threat hunts. ||

**Potential Partners:** Counterterrorism Professionals/Joint Terrorism Task Forces || Intelligence Entities' Law Enforcement Officials || Analytic and Investigative Groups || State Fusion Centers || National Terrorism Advisory System (NTAS) || Critical Infrastructure Owner-Operators || Private Sector Partners || Venue or Site Security || Private Security Groups || Information/Cyber Security.

PREVENTION

PROTECTION

MITIGATION

RESPONSE

RECOVERY

Mission Area Definition:

**Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Physical Protective Measures

### Core Capability Description

Implement and maintain risk-informed countermeasures and policies protecting people, borders, structures, materials, products, and systems associated with key operational activities and critical infrastructure sectors.

### Critical Task(s)

*Identify, assess, and mitigate vulnerabilities to incidents through the deployment of physical protective measures.*

*Deploy protective measures commensurate with the risk of an incident and balanced with the complementary aims of enabling commerce and maintaining the civil rights of citizens.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of completing a risk and vulnerability assessment, appropriate authorities review and update physical security plans covering **(#)** publicly managed and/or regulated critical infrastructure facilities to incorporate new information from the assessment.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Physical Protective Measures

## Planning & Exercise

**Functional Areas:** Resilience including hardening facilities. || Incorporating hazard resistance in facility design and maintenance. || Installing security systems. || Integration, synchronization, and resilience across jurisdictions. || Aligning whole community planning. || Biosecurity and biosafety programs. || Physical security standards for special assets. || Actions targeted at threats including controlling movement and protecting borders and CIKR. || Identify and prioritize assets, systems, networks, and functions that need protected. || Identify security risks. || Entry control and access control points. || Application of vehicle barriers. ||

**Potential Partners:** Law Enforcement Officials || Intelligence Entities || Community Policing || Horizontal and Vertical Jurisdictions || Non-Governmental Organizations || Decision Makers/Policy Makers || Emergency Management || Critical Infrastructure Owner-Operators || Private Sector Partners || Venue or Site Security || Private Security Groups ||

MISSION AREA

PREVENTION

PROTECTION

MITIGATION

RESPONSE

RECOVERY

Mission Area Definition:

**Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Risk Management for Protection Programs

### Core Capability Description

Identify, assess, and prioritize risks to inform Protection activities, countermeasures, and investments.

### Critical Task(s)

*Ensure critical infrastructure sectors and Protection elements have and maintain risk assessment processes to identify and prioritize assets, systems, networks, and functions.*

*Ensure operational activities and critical infrastructure sectors have and maintain appropriate threat, vulnerability, and consequence tools to identify and assess threats, vulnerabilities, and consequences.*

### Core Capability Standardized Target(s)

Every **(#) (time)**, appropriate authorities conduct a review of relevant physical and cyber threats and hazards, vulnerabilities, and strategies for risk management covering **(#)** publicly managed and/or regulated critical infrastructure facilities.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Risk Management for Protection Programs

## Planning & Exercise

**Functional Areas:** Risk assessment considerations including the capabilities required to address anticipated and unanticipated risk. || Community-specific considerations. || Identifying cascading effects of a threat or hazard. || Tools for risk assessment. || Community capabilities to analyze and assess risk and resilience. || Risk management planning. || Information sharing mechanisms. || Development and implementation of risk assessment processes. || Use of analytic tools. || Identify and prioritize assets, systems, networks and functions. || Test protective measures with all stakeholders. ||

**Potential Partners:** Emergency Management || Horizontal and Vertical Jurisdictions || Non-Governmental Organizations || Decision Makers/Policy Makers || Critical Infrastructure Owner-Operators || Private Sector Partners || Business Owners/Managers || Community/City/County Planners || Community Trusts, Boards and Services

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:

**Protect our citizens, residents, visitors and assets against the greatest threats and hazards in a manner that allows our interests, aspirations and way of life to thrive.**

## Supply Chain Integrity & Security

### Core Capability Description

**Strengthen the security and resilience of the supply chain.**

### Critical Task(s)

*Secure and make resilient key nodes, methods of transport between nodes, and materials in transit.*

### Core Capability Standardized Target(s)

Every **(#) (time)**, engage **(#)** partner organizations involved in incident management to promote awareness of threats, dependencies, vulnerabilities, and strategies to support restoration of private sector supply chains.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Supply Chain Integrity & Security

## Planning & Exercise

**Functional Areas:** Supply transport policies and procedures. || Security management at supplier and consumer facilities. || Commodity verification process and tracking process. || Commodity inspection procedures and process. || Identify vulnerabilities including at supplier and consumer nodes and in transit. || Identify security processes of concern. || Analyze key dependencies and interdependencies. || Use of layered security including intelligence, information analysis, technology, policies, proper training. || Implementing countermeasures and physical protection. ||

**Potential Partners:** Emergency Management || Transportation Agencies (including rail, air, water and road) || Critical Infrastructure Owner-Operators || Private Sector Partners || Business Owners/Managers || Venue or Site Security || Private Security Groups || Private Sector Trucking Industry || Importers, Suppliers and Service Providers || Manufacturing Personnel || Materials/Parts Providers Personnel || Key Account Managers ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:      **Reduce the loss of life and property by lessening the impact of future disasters.**

## Planning

### Core Capability Description

Conduct a systematic process engaging the whole community as appropriate in the development of executable strategic, operational, and/or tactical-level approaches to meet defined objectives.

### Critical Task(s)

*Develop approved hazard mitigation plans that address relevant threats/hazards in accordance with the results of their risk assessment within all local, state, tribal, territorial, and Federal partners.*

### Core Capability Standardized Target(s)

Within every **(#) (time)**, update all emergency operations plans that define the roles and responsibilities of **(#)** partner organizations involved in incident management across **(#)** jurisdictions affected, and the sequence and scope of tasks needed to prevent, protect, mitigate, respond to, and recover from events.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Planning

## Planning & Exercise

**Functional Areas:** Long-term risks to life and property. || Investment strategies for natural hazards (for example, sea level rise) and man-made hazards (for example: deforestation) || Community planning for mitigation activities including land use, the environment, infrastructure, site planning, transportation design and urban design. || Nature-based mitigation solutions (for example: green infrastructure and wetland erosion control). || Structural and non-structural initiatives that reduce incidents. || Vulnerability reduction. || Mitigate potential loss based on projects with highest return on investment. || Use of HAZUS including estimate damages and losses to buildings, essential facilities, transportation and utility lifelines. || Generate flood hazard data. || Tsunami modeling. || Review community capabilities. ||

**Potential Partners:** Decision Makers/Policy Makers || Emergency Management || Critical Infrastructure Owner-Operators || Private Sector Partners || Business Owners/Managers || Community/City/County Planners || Community-Led Action in Response to Violent Extremism ||

## Training

NAME	COURSE #	OFFERED BY
Introduction to Hazard Mitigation	IS393	FEMA
Mitigation Planning for Local and Tribal Communities	IS318	FEMA
Earthquake Mitigation Basics for Mitigation Staff	IS323	FEMA
Wildfire Mitigation Basics for Mitigation Staff	IS320	FEMA
Flood Mitigation Basics for Mitigation Staff	IS322	FEMA
Critical Infrastructure Security and Resilience Awareness	AWR213	TEEX
Community Resilience: Building Resilience from the Inside Out	AWR228	NDPTC
Hazus for Flood	E0172	FEMA
Hazus for Earthquake and Tsunami	EO0174	FEMA
Application of Hazus for Disaster Operations	E0179	FEMA
Volcanic Crisis Awareness Course	AWR2233	NDPTC
Tsunami Awareness	AWR 217	NDPTC
Natural Disaster Awareness for Community Leaders	AWR 310	NDPTC
Threat and hazard identification and Risk Assessment and Stakeholder Preparedness Review	MGT310	TEEX
Multihazard Emergency Planning for Schools	IS-362	FEMA

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Reduce the loss of life and property by lessening the impact of future disasters.**

## Public Information and Warning

### Core Capability Description

Deliver coordinated, prompt, reliable, and actionable information to the whole community through the use of clear, consistent, accessible, and culturally and linguistically appropriate methods to effectively relay information regarding any threat or hazard and, as appropriate, the actions being taken, and the assistance being made available.

### Critical Task(s)

*Communicate appropriate information, in an accessible manner, on the risks faced within a community after the conduct of a risk assessment.*

### Core Capability Standardized Target(s)

Within **(#) (time)**, notice of an incident, deliver reliable and actionable information to **(#)** people affected, including **(#)** people with access and functional needs (affected) and **(#)** people with limited English proficiency affected.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Public Information and Warning

## Planning & Exercise

**Functional Areas:** Public awareness campaigns for examples, Firewise USA, Tsunami Ready and Great Shakeout. || Limited English proficiency outreach. || Auxiliary communication aids such as braille, TTYS, hearing aid-compatible phones and interpreters. || Information sharing processes including multidirectional jurisdiction distribution and multimodal (social media, websites, smartphone applications, community meetings and public message boards). || Stakeholder engagement: how priorities and actions are communicated. || Expansion of the capabilities of wireless priority services (WPS), government emergency telecommunications services or other automated communication processes. || Writing common alerting protocol messages. || Develop a warning coordination and communication strategy. || Social vulnerabilities and communication risk analysis. || Communicate current and future risks to whole community. ||

**Potential Partners:** Public Information Officers || News Media || Emergency Management || Decision Makers/Policy Makers || Governance Boards || Regional Consortia || Community Trusts, Boards and Services ||

## Training

NAME	COURSE #	OFFERED BY
Including People with Disabilities and Others with Access and Functional Needs in Disaster Operations	IS368	FEMA
Warning Coordination	EM272	International Disaster/Fire Training Institute
Public Information Officer Awareness	G289/IS29	FEMA
A Culturally Competent Preparedness Model for Reaching Limited English Proficient Communities	Webinar	Northwest Center for Public Health Practice
Crisis & Emergency Risk Communication (CERC)	Wb4088	CDC
Social Media Tools and Techniques	PER 344	NDPTC
Social Media Engagement Strategies	PER 343	NDPTC
Joint Information System/Center Planning for Tribal, State, and Local Public Information Officers	G291	FEMA

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA  
Definition:

**Reduce the loss of life and property by lessening the impact of future disasters.**

## Operational Coordination

### Core Capability Description

Establish and maintain a unified and coordinated operational structure and process that appropriately integrates all critical stakeholders and supports the execution of Core Capabilities.

### Critical Task(s)

*Establish protocols to integrate mitigation data elements in support of operations with local, state, tribal, territorial, and insular area partners and in coordination with Federal agencies.*

### Core Capability Standardized Target(s)

Within **(#) (time)**, of a potential or actual incident, establish and maintain a unified and coordinated operational structure and process across **(#)** jurisdictions affected and with **(#)** partner organizations involved in incident management. Maintain for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Operational Coordination

## Planning & Exercise

**Functional Areas:** Whole community partnerships and coalitions with agreed upon values. || Stakeholder information sharing process. || Hazard mitigation activities and projects. || Coordinated mitigation investments for risk reduction such as disaster safe designs and construction. || Structural mitigation. || Community data analysis programs such as HAZUS, GIS, and community analysis programs. || Integrate interest groups and community organizations. || Define a hazard mitigation strategy. || Coordinate assessment, analysis, and delivery of information. || Stakeholder action coordination. || Defining operational requirements. || Identify common objectives with whole community group . ||

**Potential Partners:** Horizontal and Vertical Jurisdictions || non-Governmental Organizational || Volunteer Organizations Active in Disaster (VOAD) || Community Emergency Response Team || Decision Makers/Policy Makers || Emergency Management || Critical Infrastructure Owner-Operators || Private Sector Partners || Business Owners/Managers || Community Planners

## Training

NAME	COURSE #	OFFERED BY
Applications of GIS for Emergency Management	IS922	FEMA
Leveraging Tools for Conducting Damage Assessments	AWR 319	NDPTC
ArcGIS for Emergency Managers	E0190	FEMA
Application of Hazus for Disaster Operations	E0179	FEMA
Comprehensive Data Management for Hazus	E0317	FEMA
Geospatial Information Infrastructure (GII)	IS63	FEMA
sUAS for Public Safety Personnel	LSAP151 5	TEEX
Mitigation Planning for Local and Tribal Communities	IS318	FEMA

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Reduce the loss of life and property by lessening the impact of future disasters.**

## Community Resilience

### Core Capability Description

Enable the recognition, understanding, communication of, and planning for risk, and empower individuals and communities to make informed risk management decisions necessary to adapt to, withstand, and quickly recover from future incidents.

### Critical Task(s)

*Maximize the coverage of the U.S. population that has a localized, risk-informed mitigation plan developed through partnerships across the entire community.*

*Empower individuals and communities to make informed decisions to facilitate actions necessary to adapt to, withstand, and quickly recover from future incidents.*

### Core Capability Standardized Target(s)

Within **(#) (time)**, **(#)** households are covered by risk-appropriate insurance, including homeowners, flood, windstorm, and seismic.

Every **(#) (time)**, conduct **(#)** outreach events or activities to increase awareness of locally significant threats and hazards to help the residents be more prepared to prevent, protect against, mitigate, respond to, and recover from those events.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Community Resilience

## Planning & Exercise

**Functional Areas:** Collaboration including with private sector partners in community development and with law enforcement in community safety. || Partnership building through education and outreach tools. || Skill building such as continuing education programs. || Neighborhood activities and preparedness campaigns. || Community risk assessments including physical, social, cultural, economic and environmental vulnerabilities. || Reinforce relationships between environmental stewardship and natural hazard risk reduction for example, enhancement of flood storage through wetland protection/ restoration and holistic floodplain management. || Utilize climate projections. || Develop or utilize a public preparedness campaign. ||

**Potential Partners:** Emergency Management || Community Policing || Outreach Groups || Horizontal and Vertical Jurisdictions || Non-Governmental Organizations || Volunteer Organizations Active in a Disaster (VOADs) || Community Emergency Response Teams (CERT) || Decision Makers/Policy Makers || Critical Infrastructure Owner-Operators || Private Sector Partners Business Owners/Managers || Community/City/County Planners || Community Trusts, Boards and Services || Governance Boards || Regional Consortiums ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:      **Reduce the loss of life and property by lessening the impact of future disasters.**

## Long-term Vulnerability Reduction

### Core Capability Description

Build and sustain resilient systems, communities, and critical infrastructure and key resources lifelines so as to reduce their vulnerability to natural, technological, and human-caused threats and hazards by lessening the likelihood, severity, and duration of the adverse consequences.

### Critical Task(s)

*Achieve a measurable decrease in the long-term vulnerability of the Nation against current baselines amid a growing population base, changing climate conditions, increasing reliance upon information technology, and expanding infrastructure base.*

### Core Capability Standardized Target(s)

Every (#) (time), (#) jurisdictions review their building codes, and, if necessary, enact or update risk-appropriate, disaster resilient building codes.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Long-term Vulnerability Reduction

## Planning & Exercise

**Functional Areas:** Available resources, processes, programs, and funding opportunities. || Community planning for risk reduction. || Broadening natural hazards and catastrophic insurance. || Capital improvement projects. || Risk avoidance and reduction. || Construction improvement including incorporating mitigation measures and sound building design. || Sharing resources with stakeholders to avoid duplication of effort. || Coordinate outreach with community partners. || Identification, recruitment and training of volunteers. || Community education and awareness campaigns. || Elevation or relocation of crucial utilities/appliances. || Individual and family preparedness. ||

**Potential Partners:** Decision Makers/Policy Makers || Emergency Management || Critical Infrastructure Owner-Operators || Private Sector Partners Business Owners/Managers || Community/City/County Planners || Community Trusts, Boards and Services || Governance Boards || Regional Consortia || Volunteer Organizations Active in a Disaster (VOADs) || Community Emergency Response Teams (CERT) || Community Policing || Outreach Groups || Horizontal and Vertical Jurisdictions || Non-Governmental Organizations ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:      **Reduce the loss of life and property by lessening the impact of future disasters.**

## Risk and Disaster Resilience Assessment

### Core Capability Description

Assess risk and disaster resilience so that decision makers, responders, and community members can take informed action to reduce their entity’s risk and increase its resilience.

### Critical Task(s)

*Ensure that local, state, tribal, territorial, and insular area governments and the top 100 Metropolitan Statistical Areas complete a risk assessment that defines localized vulnerabilities and consequences associated with potential natural, technological, and human-caused threats and hazards to their natural, human, physical, cyber, and socioeconomic interests.*

### Core Capability Standardized Target(s)

Every **(#) (time)**, after identifying threats and hazards of concern, model the impacts of **(#)** threat and hazard scenarios to incorporate into planning efforts.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Risk and Disaster Resilience Assessment

## Planning & Exercise

**Functional Areas:** Threat and vulnerability community assessment evaluation through algorithms, modeling and analysis. || Risk prioritization across communities and jurisdictions with the use of data analysis from the threat and vulnerability assessment. || Risk prioritization conflict resolution. || Community information sharing and risk awareness. || Analysis tools used by the community. || Data collaboration with the use of nationally and locally generated data. || Establish a common operating picture across jurisdictions. || Update risk assessment to include changes to the risks and the physical environment. || Incorporate vulnerability data sets such as population, demographics, infrastructure inventory and condition assessment information. || Identify cascading impacts. || Data analysis including, scientifically valid risk assessments. || Consolidate efforts and reduce duplication. ||

**Potential Partners:** Emergency Management || Horizontal and Vertical Jurisdictions || Decision Makers/Policy Makers || GIS Analysts || Spatial Analysts || Business Owners/Managers || Governance Boards || Community/City/County Planners || Community Trusts, Boards and Services || Critical Infrastructure Owner-Operators || Private Sector Partners

Mission Area Definition: **Reduce the loss of life and property by lessening the impact of future disasters.**

## Threats and Hazards Identification

### Core Capability Description

Identify the threats and hazards that occur in the geographic area; determine the frequency and magnitude; and incorporate this into analysis and planning processes so as to clearly understand the needs of a community or entity.

### Critical Task(s)

*Identify the threats and hazards within and across local, state, tribal, territorial, and insular area governments and the top 100 Metropolitan Statistical Areas, in collaboration with the whole community, against a national standard based on sound science.*

### Core Capability Standardized Target(s)

Every **(#) (time)**, engage with **(#)** jurisdictions and **(#)** partner organizations involved in incident management to assess the threats and hazards that are realistic and would significantly impact your communities.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Threats and Hazards Identification

## Planning & Exercise

**Functional Areas:** Public health surveillance and epidemiological detection. || Identify community threats and hazards. || Threat and hazard data collection methods including present and future impacts. || Data sharing horizontally and vertically. || Climate adaptation and hazard exacerbation. || Translate data into meaningful and actionable information for the public and other stakeholders. || Using analytical methodology, draw conclusions and recommend actions producing data analytic products. || Share product and overview of data product with public.

**Potential Partners:** Emergency Management || Decision Makers/Policy Makers || GIS Analysts || Spatial Analysts || Horizontal and Vertical Jurisdictions || Business Owners/Managers || Governance Boards || Community/City/County Planners || Community Trusts, Boards and Services || Critical Infrastructure Owner-Operators || Private Sector Partners ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Planning

### Core Capability Description

Conduct a systematic process engaging the whole community as appropriate in the development of executable strategic, operational, and/or tactical-level approaches to meet defined objectives.

### Critical Task(s)

*Develop operational plans that adequately identify critical objectives based on the planning requirement, provide a complete and integrated picture of the sequence and scope of the tasks to achieve the objectives, and are implementable within the timeframe contemplated in the plan using available resources.*

### Core Capability Standardized Target(s)

Within every **(#) (time)** update all emergency operations plans that define the roles and responsibilities of **(#)** partner organizations involved in incident management across **(#)** jurisdictions affected, and the sequence and scope of tasks needed to prevent, protect, mitigate, respond to, and recover from events.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Planning

## Planning & Exercise

**Functional Areas:** Pre-incident planning. || Evaluating and updating plans. || Incorporating risk analyses. || Continuity planning. || Strategic planning. || Operational planning. || Whole community involvement and coordination. || Deliberate plans: plans developed prior to an incident based on known threats or hazards. || Incident action plans/crisis action plans: rapidly adapted operational & tactical plans based on response to a threat. || Modifying deliberate plans into incident action plans/crisis action plans. || Identification of primary roles. || Responsibilities and specific assigned tasks. || Situational updates. || Detailed resource status updates. || Equipment status updates. ||

**Potential Partners:** Decision Makers/Policy Makers || Emergency Management || Incident Command Personnel ||

## Training

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Public Information and Warning

### Core Capability Description

Deliver coordinated, prompt, reliable, and actionable information to the whole community through the use of clear, consistent, accessible, and culturally and linguistically appropriate methods to effectively relay information regarding any threat or hazard, as well as the actions being taken, and the assistance being made available, as appropriate.

### Critical Task(s)

*Inform all affected segments of society of critical lifesaving and life-sustaining information by all means necessary, including accessible tools, to expedite the delivery of emergency services and aid the public to take protective actions.*

*Deliver credible and actionable messages to inform ongoing emergency services and the public about protective measures and other life-sustaining actions, and facilitate the transition to recovery.*

### Core Capability Standardized Target(s)

Within **(#) (time)** notice of an incident, deliver reliable and actionable information to **(#)** people affected, including **(#)** people with access and functional needs (affected) and **(#)** people with limited English proficiency affected.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Public Information and Warning

## Planning & Exercise

**Functional Areas:** New communications tools and technologies. || Developing standard operating procedures for public information. || Alerts and warnings. || Culturally and linguistically appropriate messaging. || Delivering actionable guidance and protecting sensitive information. || Public awareness campaigns. || Deliver protective action recommendations. || Ensure continuous communication. || Ensure consistent communication and information sharing. || Clearance/approval process designating points of contact to address information verification and approval of documents. ||

**Potential Partners:** Critical Infrastructure Owner-Operators || Private Sector Partners || Law Enforcement Officials || Public Information Officers || News Media || Decision Makers/Policy Makers || Emergency Management || Incident Command Personnel || 911 operators, Call Takers and Dispatchers ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Operational Coordination

### Core Capability Description

**Establish and maintain a unified and coordinated operational structure and process that appropriately integrates all critical stakeholders and supports the execution of Core Capabilities.**

### Critical Task(s)

*Mobilize all critical resources and establish command, control, and coordination structures within the affected community, in other coordinating bodies in surrounding communities, and across the Nation, and maintain as needed throughout the duration of an incident.*

*Enhance and maintain command, control, and coordination structures consistent with the National Incident Management System (NIMS) to meet basic human needs, stabilize the incident, and transition to recovery.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of a potential or actual incident, establish and maintain a unified and coordinated operational structure and process across **(#)** jurisdictions affected and with **(#)** partner organizations involved in incident management. Maintain for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Operational Coordination

## Planning & Exercise

**Functional Areas:** Command, control, and coordination. || Ensuring continuity of government and essential services. || Determining priorities, objectives and strategies. || Establishing roles and responsibilities. || Establishing lines of communication. || Emergency operations center management. || Establishing and maintaining a common operating picture. || Allocating and mobilizing resources. || Ensuring information flow. || Utilizing interoperable communications. || Ensuring unity of effort. || Analyze cross-sector interdependencies and obstacles with the private sector. || Synchronizing response operations with private sector efforts. || Local, voluntary, and private sector capability integration. || demonstrate a COOP transition plan. ||

**Potential Partners:** Emergency Responders (Including Fire, Medical and Law Enforcement) || Decision Makers/ Policy Makers || Incident Command Personnel || Horizontal and Vertical Jurisdictions || Business Owners/Managers || Community/City/County Planners || Community Trusts, Boards and Services || Building Officials, Architects, and Engineers || Governance Boards || Regional Consortiums ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Infrastructure Systems

### Core Capability Description

Stabilize critical infrastructure functions, minimize health and safety threats, and efficiently restore and revitalize systems and services to support a viable, resilient community.

### Critical Task(s)

*Decrease and stabilize immediate infrastructure threats to the affected population, to include survivors in the heavily damaged zone, nearby communities that may be affected by cascading effects, and mass care support facilities and evacuation processing centers with a focus on life-sustainment and congregate care services.*

*Re-establish critical infrastructure within the affected areas to support ongoing emergency response operations, life sustainment, community functionality, and a transition to recovery.*

*Provide for the clearance, removal, and disposal of debris.*

*Formalize partnerships with governmental and private sector cyber incident or emergency response teams to accept, triage, and collaboratively respond to cascading impacts in an efficient manner.*

### Core Capability Standardized Target(s)

#### *Water Treatment and Provision*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without water service*).

#### *Sanitation*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without wastewater service*).

#### *Communication Systems*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without communication service*).

#### *Power Restoration*

Within **(#) (time)**, of an incident, restore service to **(#)** customers (*without power service*).

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Infrastructure Systems

## Planning & Exercise

**Functional areas:** Communications systems. || Water treatment and provision. || Sanitation. || Power restoration. || Dams and flood control. || Food production and delivery. || Government facilities. || Hospitals. || Infrastructure site assessments. || Public recreation facilities. || Public safety facilities and transportation infrastructure. || Community fuel need description/estimates. || Critical power failure. || Sustainment of generator operations. || Prioritization of lifesaving and life-sustaining lifeline systems. || Leveraging all available resources for critical lifeline stabilization. || Infrastructure interdependencies assessment. || Cascading effects assessment. || Establishing formal plans and response teams dedicated to guiding response actions during a physical infrastructure failure. || Increase critical infrastructure owner-operator participation in exercises. || Restoring information systems including processes and procedures for managing and reporting incidents. ||

**Partners:** Critical Infrastructure Owner-Operators || Private Sector Partners || Private Security Groups || Emergency Management || Incident Command Personnel || Transportation Agencies (including rail, air, water and road) || Information and Communications Technology ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:

**Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Critical Transportation

### Core Capability Description

**Provide transportation (including infrastructure access and accessible transportation services) for response priority objectives, including the evacuation of people and animals and the delivery of vital response personnel, equipment, and services into the affected areas.**

### Critical Task(s)

*Establish physical access through appropriate transportation corridors and deliver required resources to save lives and to meet the needs of disaster survivors.*

*Ensure basic human needs are met, stabilize the incident, transition into recovery for an affected area, and restore basic services and community functionality.*

*Clear debris from any route type (i.e., road, rail, airfield, port facility, waterway) to facilitate response operations.*

### Core Capability Standardized Target(s)

*Evacuation:*

Within **(#) (time)** notice of an impending incident, complete the evacuation of **(#)** people requiring evacuation, including **(#)** people with access and functional needs (requiring evacuation).

*Debris Removal and Establishing Access*

Within **(#) (time)** of an incident, clear **(#)** miles of road affected, to enable access for emergency responders, including private and non-profit.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

## Critical Transportation

### Planning & Exercise

**Functional Areas:** Roles of individuals, private sector, and state, local, tribal, and territorial governments in evacuation. || Establishing physical access including CIKR considerations in choosing transportation corridors. || Transportation safety and condition assessments. || Delivery of response assets including clearance of specific routes and delivery of goods/services. || Debris removal. || Airspace management. || Reentering affected area. || Publish clear and accessible evacuation routes/zones. || Provide real-time mapping and navigation routing systems through GIS. || Development of an evacuation transportation model (hub and spoke or point-to-point). || Identification of evacuation routes that have ample businesses in pass-through communities to provide fuel to evacuees. || Assign outreach teams, drivers and accessible vehicles to specific homeless concentrated areas. || Identify transportation cross sector dependencies (fuel, banking, etc). || Identify routes for debris clearance that achieves connectivity between relief demand and supply for example, evacuation and hospital routes. || Determine a sequence of roads to clear in each period. || Prioritize debris clearance routes. ||

**Potential Partners:** Public Works || Transportation Agencies (including rail, air, water and road) || Private Sector Trucking Industry || Law Enforcement || Critical Infrastructure Owner-Operators || Private Sector Partners || Waste Management ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Environmental Response/Health & Safety

### Core Capability Description

Conduct appropriate measures to ensure the protection of the health and safety of the public and workers, as well as the environment, from all hazards in support of responder operations and the affected communities.

### Critical Task(s)

*Identify, assess, and mitigate worker health and safety hazards, and disseminate health and safety guidance and resources to response and recovery workers.*

*Minimize public exposure to environmental hazards through assessment of the hazards and implementation of public protective actions.*

*Detect, assess, stabilize, and clean up releases of oil and hazardous materials into the environment, including buildings/structures, and properly manage waste.*

*Identify, evaluate, and implement measures to prevent and minimize impacts to the environment, natural and cultural resources, and historic properties from all-hazard emergencies and response operations.*

### Core Capability Standardized Target(s)

#### *Hazardous Materials Clean-Up:*

Within **(#) (time)** of an incident, assess, contain, and begin cleaning up hazardous material releases from **(#)** hazmat release sites.

#### *Decontamination*

Within **(#) (time)** of a hazmat incident, complete decontamination procedures for **(#)** exposed individuals (*hazmat-related incidents*).

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Environmental Response/ Health & Safety

## Planning & Exercise

**Functional Areas:** Predictive modeling. || Health and safety monitoring and assessment. || Responder safety. || Survivor safety and assistance. || Environmental assessment. || Hazardous material clean-up. || Decontamination. || Debris removal. || Environmental impact analysis. || Traumatic incident stress and first responder safety. || Specific responder environmental hazard response for example a community with a liquid natural gas or fertilizer plant. || Cultural and historic sites preservation and response plans for example, libraries, museums, archaeological sites and cemeteries. || Identification of HAZMAT containers and container markings. || Develop a respiratory protection program. || Conduct a disaster hazard assessment to determine safety and health hazards and appropriate PPE. || Hazard confinement. || Historical/cultural site evacuation including labeling, tracking, moving and storing. ||

**Potential Partners:** Emergency Responders (Including Fire, Medical and Law Enforcement) || Mental Health Practitioners || Site Safety Officers || Occupational Health || Emergency Management || Incident Command Personnel || Healthcare || Public Health || Private Sector Partners (museum curators, historic/cultural site stewards) || CBRNE/HAZMAT Responders || Waste Management ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Fatality Management Services

### Core Capability Description

Provide fatality management services, including decedent remains recovery and victim identification, and work with local, state, tribal, territorial, insular area, and Federal authorities to provide mortuary processes, temporary storage or permanent internment solutions, sharing information with mass care services for the purpose of reunifying family members and caregivers with missing persons/remains, and providing counseling to the bereaved.

### Critical Task(s)

*Establish and maintain operations to recover a significant number of fatalities over a geographically dispersed area.*  
*Mitigate hazards from remains, facilitate care to survivors, and return remains for final disposition.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, complete the recovery, identification, and mortuary services, including temporary storage services, for **(#)** fatalities.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Fatality Management Services

## Planning & Exercise

**Functional Areas:** Body recovery. || Mortuary services. || Victim identification. || Bereavement counseling. || Family reunification. || Recovery operations and the identification process. || Family assistance centers. || Cultural and customs respect. || Morgue sites and related facilities for example, temporary morgue facilities or refrigerated trucks. || Legal authorities for example, who will be considered next-of-kin and cultural expectations. || Victim location and field processing including ensuring that personnel effects are linked to the victim. || Creating a victim identification center. || Developing and utilizing a field numbering system. || Morgue floor planning. || Morgue processing. || Collaboration between morgue operations and the family assistance center. || Family notification procedures. || Victim release procedures. ||

**Potential Partners:** Morticians and Funeral Directors || Public Information Officers || News Media || Outreach Groups || Horizontal and Vertical Jurisdictions || Volunteer Organizations Active in a Disaster (VOADs) || Decision Makers/Policy Makers || Emergency Management || Private Sector Partners (Funeral Homes, Private Trucking Companies || Emergency Responders (Including Fire, Medical and Law Enforcement) || Incident Command Personnel || Healthcare || Mental Health Practitioners || Public Health || Death Certification Guidance for medical Examiners (MEs)/Coroners, and Physicians ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Fire Management & Suppression

### Core Capability Description

**Provide structural, wildland, and specialized firefighting capabilities to manage and suppress fires of all types, kinds, and complexities while protecting the lives, property, and environment in the affected area.**

### Critical Task(s)

*Provide traditional first response or initial attack firefighting services.*  
*Conduct expanded or extended attack firefighting and support operations through coordinated response of fire management and specialized fire suppression resources.*  
*Ensure the coordinated deployment of appropriate local, regional, national, and international fire management and fire suppression resources to reinforce firefighting efforts and maintain an appropriate level of protection for subsequent fires.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, conduct firefighting operations to suppress and extinguish **(#)** structure fires.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Fire Management & Suppression

## Planning & Exercise

**Functional Areas:** Initial attack firefighting. || Structural firefighting. || Wildland firefighting. || Extended attack firefighting and specialized firefighting. || Wildland-urban interface. || Unified coordination. || Prioritization of firefighting efforts in a multi-fire disaster. || Fire adapted communities. || Fire weather forecasting. || GIS smoke modeling. || Identifying critical water systems requiring priority restoration for firefighting. || GIS mapping in evacuation planning. || Fuel management. || Sharing wildland firefighting assets between agencies/jurisdictions. ||

**Potential Partners:** Horizontal and Vertical Jurisdictions || Volunteer Organizations Active in a Disaster (VOADs) || Decision Makers/Policy Makers || Emergency Management || Emergency Responders (Including Fire, Medical and Law Enforcement) || Wildland Firefighters || Incident Command Personnel || Healthcare || Public Health || Community Emergency Response Teams (CERT) ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Logistics & Supply Chain Management

### Core Capability Description

Deliver essential commodities, equipment, and services in support of impacted communities and survivors, to include emergency power and fuel support, as well as the coordination of access to community staples. Synchronize logistics capabilities and enable the restoration of impacted supply chains.

### Critical Task(s)

*Mobilize and deliver governmental, nongovernmental, and private sector resources to save lives, sustain lives, meet basic human needs, stabilize the incident, and transition to recovery, to include moving and delivering resources and services to meet the needs of disaster survivors. Enhance public and private resource and services support for an affected area.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, identify and mobilize life-sustaining commodities, resources, and services to **(#)** people requiring shelter and **(#)** people requiring food and water. Maintain distribution system for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Logistics & Supply Chain Management

## Planning & Exercise

**Functional Areas:** Emergency power provision. || Fuel support. || Resource management. || Resource delivery. || Resource tracking. || Supply chain restoration. || Private resources. || Access to community staples. || Donation management. || Volunteer management. || Warehousing and inventory management. || Logistics network. || Supply chain mapping. || Multidisciplinary response operations including multidirectional sharing of operational information and situational awareness. || Distribution management. || Prioritizing resource requirements. || Warehouse facility design and management. || Developing your logistics network. || GIS mapping fuel needs locations especially locations with pre-positioned generators for example, hospitals, EOC, ECC, energy plants. || Calculate requirements based upon the impacted survivor population. || Developing an inventory management system. || Execute, improve or establish contracts for the provision of private/public services support and emergency commodities, power and services. ||

**Potential Partners:** Transportation Agencies (including rail, air, water and road) Private Sector Trucking Industry Law Enforcement || Critical Infrastructure Owner-Operators || Private Sector Partners (local resource distributors, grocery stores, pharmacies, banks) || Incident Command Personnel || Non-Governmental Organizations ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Mass Care Services

### Core Capability Description

Provide life-sustaining and human services to the affected population, to include hydration, feeding, sheltering, temporary housing, evacuee support, reunification, and distribution of emergency supplies.

### Critical Task(s)

*Move and deliver resources and capabilities to meet the needs of disaster survivors, including individuals with access and functional needs.*  
*Establish, staff, and equip emergency shelters and other temporary housing options (including accessible housing) for the affected population.*  
*Move from congregate care to non-congregate care alternatives and provide relocation assistance or interim housing solutions for families unable to return to their pre-disaster homes.*

### Core Capability Standardized Target(s)

*Sheltering, Ensuring Access, Feeding, Hydration, Pets, and Resource Distribution*

Within **(#) (time)** of an incident, provide emergency sheltering, food, and water for **(#)** people requiring shelter and **(#)** people requiring food and water, including **(#)** people with access and functional needs (requiring accessible shelter) and **(#)** people with access and functional needs (requiring food and water), and **(#)** animals requiring shelter, food, and water. Maintain for **(#) (time)**.

*Relocation Assistance*

Within **(#) (time)** of an incident, move **(#)** people requiring temporary, non-congregate housing, including **(#)** people with access and functional needs (requiring accessible, temporary, non-congregate housing), from congregate care to temporary housing.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Mass Care Services

## Planning & Exercise

**Functional Areas:** Ensuring access. || Sheltering || Feeding. || Hydration. || Pets. || Resource distribution. || Relocation assistance and family reunification. || Cultural sensitivities in sheltering operations. || Accessibility at sheltering locations including medical and behavioral health services, service animal/pets shelter and care. || Evacuee support: what support may be available/necessary for evacuees from another state/jurisdiction. || Disaster sheltering process for short-term, intermediate, and long-term timeframes. || Development of or improvement to an unaccompanied minor accessible sheltering/ housing plan. || Tracking and reunification of children with parents/legal guardians. || Establish guidelines for rapid vetting of potential placement facilities, placement families and existing youth placement programs. || GIS mapping of mass feeding locations for the affected population and responders. || Environmental health and safety inspections for sheltering locations. || Develop pre-scripted agreements, and other mechanisms to provide resources to mass evacuees. ||

**Potential Partners:** Schools/Universities (Including home care, daycare) || Law Enforcement Officials || Public Information Officers || News Media || Community Policing || Outreach Groups || Horizontal and Vertical Jurisdictions || Volunteer Organizations Active in a Disaster (VOADs) || Community Emergency Response Teams (CERT) || Emergency Management || Private Sector Partners (private schools, feeding operations) || Venue or Site Security || Mental Health Practitioner || Healthcare (Pediatricians and Family Medicine) || Judicial System

Pediatric Disaster Response and Emergency Preparedness	MGT439	TEEX
Feeding Basics Operational Training	Webinar	American Red Cross Disaster Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Mass Search & Rescue Operations

### Core Capability Description

Deliver traditional and atypical search and rescue capabilities, including personnel, services, animals, and assets to survivors in need, with the goal of saving the greatest number of endangered lives in the shortest time possible.

### Critical Task(s)

*Conduct search and rescue operations to locate and rescue persons in distress.*

*Initiate community-based search and rescue support operations across a wide, geographically dispersed area.*

*Ensure the synchronized deployment of local, regional, national, and international teams to reinforce ongoing search and rescue efforts and transition to recovery.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, conduct search and rescue operations for **(#)** people requiring rescue.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Mass Search & Rescue Operations

## Planning & Exercise

**Functional Areas:** Synchronizing operations. || Search operations. || Rescue operations. || Specialized operations. || Community-based search and rescue support. || Canine SAR. || Spontaneous volunteers. || Synchronized deployment of local, regional, federal and international teams. || Activation and pre-deployment of alternate modes of transportation. || Use of additional resources for operations within CBRNE environments. || Develop guidance for conducting unified SAR operations. || Integration of volunteer and established organizations into SAR activities including JITT. || Managing spontaneous volunteers. ||

**Potential Partners:** Local Search and Rescue Groups || K-9 Urban Search and Rescue Groups under MOU/MOA || CERT || First Responders (fire, EMS, law enforcement, industrial fire-fighters) || Canine SAR Handlers

## Training Opportunities

NAME	COURSE #	OFFERED BY
Technical Large Animal Rescue Training	TLAER	Technical Large Animal Emergency Rescue
Wide Area Search	PER213	TEEX
Community Emergency Response Teams	IS 317	FEMA

Managing Lost Persons Incidents (MLPI)	4 Days	National Association for Search and Rescue
Wilderness First Responder (WFR)	80 hours	National Association for Search and Rescue
Wilderness EMT (WEMT)	40 hours	National Association for Search and Rescue
Tracking	20+ hours	National Association for Search and Rescue
Urban SAR Management	8 class hours	National Association for Search and Rescue
Heavy Equipment and Rigging Specialist	9P2730	TEEX

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## On-scene Security, Protection, & Law Enforcement

### Core Capability Description

Ensure a safe and secure environment through law enforcement and related security and protection operations for people and communities located within affected areas and also for response personnel engaged in lifesaving and life-sustaining operations.

### Critical Task(s)

*Establish a safe and secure environment in an affected area.*

*Provide and maintain on-scene security and meet the protection needs of the affected population over a geographically dispersed area while eliminating or mitigating the risk of further damage to persons, property, and the environment.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, provide security and law enforcement services to protect emergency responders and **(#)** people affected.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

On-scene Security, Protection, & Law Enforcement

## Planning & Exercise

**Functional Areas:** Law enforcement. || Protecting response personnel. || Securing disaster areas. || Force and critical infrastructure protection services. || Security planning and technical assistance. || Logistical management of responder resources. || Interoperable communication. || Assess capabilities and expected needs for surge capacity. || Development of mutual aid and assistance agreements. || Coordinate planning and operational analysis. || Locate and inventory equipment to deliver on-scene. || Coordinate alerts and notifications. || Prioritize missions: lifesaving, protection of infrastructure/ property. || Rotate resources. || Development/utilization of a model response program. ||

**Potential Partners:** Law Enforcement Officials || community Policing || Outreach Groups || Community Emergency Response Teams || CBRNE/HAZMAT Responders || Fire and Medical Services || Venue or Site Security || Private Security Groups ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Operational Communications

### Core Capability Description

Ensure the capacity for timely communications in support of security, situational awareness, and operations, by any and all means available, among and between affected communities in the impact area and all response forces.

### Critical Task(s)

*Ensure the capacity to communicate with both the emergency response community and the affected populations and establish interoperable voice and data communications between Federal, tribal, state, and local first responders.*

*Re-establish sufficient communications infrastructure within the affected areas to support ongoing life-sustaining activities, provide basic human needs, and a transition to recovery.*

*Re-establish critical information networks, including cybersecurity information sharing networks, to inform situational awareness, enable incident response, and support the resilience of key systems.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, establish interoperable communications across **(#)** jurisdictions affected and with **(#)** partner organizations involved in incident management. Maintain for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Operational Communications

## Planning & Exercise

**Functional Areas:** Interoperable communications between responders. || Voice communications. || Re-establishing communications infrastructure. || Data communications. || Re-establishing critical information networks and communication between responders and the affected population. || Develop priority telecommunications services during congestion scenarios. || Information sharing. || Joint planning. || Radio communications. || In-field operations. || Data exchange. || Detection of service outages or disruptions. || Establishment of formal decision-making bodies. || Identify and include missing or underrepresented stakeholders. || Incorporate commercial and non-traditional communications partners. || Assess and improve timeliness of notification, activation and response of communications systems providers. ||

**Potential Partners:** HAM Handlers || News Media || Public Information Officers || Critical Infrastructure Owner-Operators || Private Sector Partners || Incident Command Personnel || Information/Cyber Security || Information and Communications Technology || 911 Operators, Call Takers and Dispatchers || Decision Makers/Policy Makers ||

## Training

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Public Health, Healthcare, & Emergency Medical Services

### Core Capability Description

**Provide lifesaving medical treatment via Emergency Medical Services and related operations and avoid additional disease and injury by providing targeted public health, medical, and behavioral health support and products to all affected populations.**

### Critical Task(s)

*Deliver medical countermeasures to exposed populations.*

*Complete triage and initial stabilization of casualties, and begin definitive care for those likely to survive their injuries and illnesses.*

*Return medical surge resources to pre-incident levels, complete health assessments, and identify recovery processes.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, complete triage, begin definitive medical treatment, and transfer to an appropriate facility **(#)** people requiring medical care.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Public Health, Healthcare, & Emergency Medical Services

## Planning & Exercise

**Functional Areas:** Triage and initial stabilization. || Emergency medical services. || Definitive care. || Health assessments. || Clinical laboratory testing. || Medical countermeasures. || Point of dispensing. || Public health interventions. || Medical surge. || Pandemic including: isolation and quarantine. || Determine mass care health needs. || Monitor mass care population. || Public health surveillance and detection. || Opening, running and closing a POD. || Receiving, distributing and dispensing of DSNS material. || Identify resources for containment measures. ||

**Potential Partners:** Horizontal and Vertical Jurisdictions || Non-Governmental Organizations || Community Emergency Response Teams (CERT) || Emergency Management || CBRNE/HAZMAT Responders || Critical Infrastructure Owner-Operators (including hospitals) || Private Sector Partners (including private hospitals || primary care offices, dentists, dialysis centers) || Emergency Responders (including Fire, Medical and Law Enforcement) || Incident Command Personnel || Healthcare || Mental Health Practitioner || Occupation Health || Public Health

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.**

## Situational Assessment

### Core Capability Description

Provide all decision makers with decision-relevant information regarding the nature and extent of the hazard, any cascading effects, and the status of the response.

### Critical Task(s)

*Deliver information sufficient to inform decision making regarding immediate lifesaving and life-sustaining activities, and engage governmental, private, and civic sector resources within and outside of the affected area to meet basic human needs and stabilize the incident.*

*Deliver enhanced information to reinforce ongoing lifesaving and life-sustaining activities, and engage governmental, private, and civic sector resources within and outside of the affected area to meet basic human needs, stabilize the incident, and transition to recovery.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of incident, and on a **(#) (time)** cycle thereafter, provide notification to leadership and **(#)** partner organizations involved in incident management of the current and projected situation. Maintain for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Situational Assessment

## Planning & Exercise

**Functional Areas:** Stakeholder engagement. || Assessing hazard impacts. || Tracking response activities. || Analyzing information and delivering situation reports. || Collect, process and organize situation information. || Prepare situation summaries. || Develop projections and forecasts of future events. || Timely data dissemination. || Development of damage assessment action plan. || Maintain shared situational awareness with policy/decision makers. || Develop and utilize a formal method to track information and resource requests. || Standard reporting system across whole community response. ||

**Potential Partners:** Decision Makers/Policy Makers || Emergency Management || Incident Command Personnel || Horizontal and Vertical Jurisdictions || Non-Governmental Organization || Private Sector Partners || Volunteer Organizations Active in Disaster (VOAD) ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:

Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

## Planning

### Core Capability Description

Conduct a systematic process engaging the whole community as appropriate in the development of executable strategic, operational, and/or tactical-level approaches to meet defined objectives.

### Critical Task(s)

*Convene the core of an inclusive planning team (identified pre-disaster), which will oversee disaster recovery planning.*

*Complete an initial recovery plan that provides an overall strategy and timeline, addresses all core capabilities, and integrates socioeconomic, demographic, accessibility, technology, and risk assessment considerations (including projected climate change impacts), which will be implemented in accordance with the timeline contained in the plan.*

### Core Capability Standardized Target(s)

Within every **(#) (time)**, update all emergency operations plans that define the roles and responsibilities of **(#)** partner organizations involved in incident management across **(#)** jurisdictions affected, and the sequence and scope of tasks needed to prevent, protect, mitigate, respond to, and recover from events.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Planning

## Planning & Exercise

**Functional Areas:** Strategic direction and objectives. || Communication, priority setting and information sharing. || Training and exercises. || Desired end state. || Post-disaster community-based recovery planning. || Public, private and non-governmental integration. || Coordination with mitigation plans. || Description of sustainability and resilience principles. || Demobilization || Inform recovery stakeholders of type, scope and nature of RSF recovery support. || Community-based recovery planning process. || Setting of recovery goals and priorities and allocation of resources. || Facilitation of peer-to-peer planner support. || Leverage partner capabilities. || Implementation management including defining lead partnership roles. || Status and expected completion tracking. || Coordinated transition among all partners. ||

**Potential Partners:** Emergency Management || Decision Makers/Policy Makers || Horizontal and Vertical Jurisdictions || Non-Governmental Organizations || Community/City/County Planners || Business Owners/Managers || Critical Infrastructure Owner-Operators || Private Sector Partners || Community Trusts, Boards and Services ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:

Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

## Public Information and Warning

### Core Capability Description

Deliver coordinated, prompt, reliable, and actionable information to the whole community through the use of clear, consistent, accessible, and culturally and linguistically appropriate methods to effectively relay information regarding any threat or hazard and, as appropriate, the actions being taken, and the assistance being made available.

### Critical Task(s)

*Reach all populations within the community with effective actionable recovery-related public information messaging and communications that are accessible to people with disabilities and people with limited English proficiency; protect the health and safety of the affected population // help manage expectations; and ensure stakeholders have a clear understanding of available assistance and their roles and responsibilities.*

*Support affected populations and stakeholders with a system that provides appropriate, current information about any continued assistance, steady state resources for long-term impacts, and monitoring programs in an effective and accessible manner.*

### Core Capability Standardized Target(s)

Within **(#) (time)** notice of an incident, deliver reliable and actionable information to **(#)** people affected, including **(#)** people with access and functional needs (affected) and **(#)** people with limited English proficiency affected.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Public Information and Warning

## Planning & Exercise

**Functional Areas:** Recovery communication strategy including AFN sharing capacity and ensuring stakeholders understand their responsibilities. || Two-way communication process to allow the community the opportunity to provide feedback and input in the recovery planning process. || Use of ASL, captioning and computer assisted real time translation. || Use of split-screen translation during public announcements. || Provide an opportunity for the community to communicate with community leaders. || Development of tangible recovery goals. || Provide frequent progress reports. ||

**Potential Partners:** Public Information Officers || News Media || Decision Makers/Policy Makers || Emergency Management || Incident Command Personnel || 911 operators, Call Takers and Dispatchers || Critical Infrastructure Owner-Operators || Private Sector Partners ||

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

## Operational Coordination

### Core Capability Description

Establish and maintain a unified and coordinated operational structure and process that appropriately integrates all critical stakeholders and supports the execution of Core Capabilities.

### Critical Task(s)

*Establish tiered, integrated leadership and inclusive coordinating organizations that operate with a unity of effort and are supported by sufficient assessment and analysis to provide defined structure and decision-making processes for recovery activities.*

*Define the path and timeline for recovery leadership to achieve the jurisdiction’s objectives that effectively coordinates and uses appropriate local, state, tribal, territorial, insular area, and Federal assistance, as well as nongovernmental and private sector resources. This plan is to be implemented within the established timeline.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of a potential or actual incident, establish and maintain a unified and coordinated operational structure and process across **(#)** jurisdictions affected and with **(#)** partner organizations involved in incident management. Maintain for **(#) (time)**.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Operational Coordination

## Planning & Exercise

**Functional Areas:** Community recovery coalition or other leadership and coordination mechanisms. || Recovery priorities including universal goals such as resilience and health communities. || Stakeholder engagement. || Current or future recovery initiatives. || Recovery process improvement. || Pre-event disaster recovery readiness. || Establish a recovery focused organizational structure. || Providing timely assistance. || Monitor for duplication of assistance. || Consolidate environmental reviews. || Coordinate disaster impact assessments. || Develop recovery funding mechanisms and sources. || Integrate resilience and sustainability into recovery efforts such as hardening critical infrastructure. || Diversify the economy and incorporate mitigation measures for homes and businesses. ||

**Potential Partners:** Emergency Responders (Including Fire, Medical and Law Enforcement) || Decision Makers/ Policy Makers || Incident Command Personnel || Horizontal and Vertical Jurisdictions || Business Owners/Managers || Community/City/County Planners || Community Trusts, Boards and Services || Building Officials, Architects, and Engineers || Governance Boards || Regional Consortiums || Small Business Association ||

**MISSION AREA**

Mission Area Definition: **Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.**

## Infrastructure Systems

### Core Capability Description

Stabilize critical infrastructure functions, minimize health and safety threats, and efficiently restore and revitalize systems and services to support a viable, resilient community.

### Critical Task(s)

*Restore and sustain essential services (public and private) to maintain community functionality.*  
*Develop a plan with a specified timeline for redeveloping community infrastructures to contribute to resiliency, accessibility, and sustainability.*  
*Provide systems that meet the community needs while minimizing service disruption during restoration within the specified timeline in the recovery plan.*

### Core Capability Standardized Target(s)

#### *Water Treatment and Provision*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without water service*).

#### *Sanitation*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without wastewater service*).

#### *Communication Systems*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without communication service*).

#### *Power Restoration*

Within **(#) (time)** of an incident, restore service to **(#)** customers (*without power service*).

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Infrastructure Systems

## Planning & Exercise

**Functional Areas:** Community current and projected demand and capacity of all infrastructure systems. || Coordination of infrastructure recovery goals. || Long-term infrastructure projects. || Provide assistance to affected critical infrastructure business owners. || Develop courses of action for temporary and permanent repairs. || Incorporate mitigation opportunities such as leverage innovative and green technologies. || Create an avenue to incorporate local needs and expectations into recovery planning. || Facilitate improvement measures to infrastructure systems including installing generators enhancing storage of oil. || Develop long-term solutions to address future water and wastewater disruptions and updating communication systems. || Develop a specified timeline for enhancing community infrastructures which promote resilience and sustainability. ||

**Potential Partners:** Emergency Management || Importers, Suppliers and Service Providers || Manufacturing Personnel || Business Owners/Managers || Critical Infrastructure Owner-Operators || Private Sector Partners Waste Management ||

Mission Area Definition:

Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

## Economic Recovery

### Core Capability Description

Return economic and business activities (including food and agriculture) to a healthy state, and develop new business and employment opportunities that result in an economically viable community.

### Critical Task(s)

*Conduct a preliminary assessment of economic issues and identify potential inhibitors to fostering stabilization of the affected communities.*

*Return affected area's economy within the specified timeframe in the recovery plan.*

*Ensure the community recovery and mitigation plan(s) incorporates economic revitalization and removes governmental inhibitors to post-disaster economic sustainability, while maintaining the civil rights of citizens.*

### Core Capability Standardized Target(s)

Within **(#)** **(time)** of an incident, reopen **(#)** businesses closed due to the incident.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Economic Recovery

## Planning & Exercise

**Functional Areas:** Local business and community concerns. || Economic impact data tools. || Public-private sector partnerships. || Recovery priorities based on whole community input. || Role of private sector in economic recovery. || Pre-disaster recovery planning and programs. || Use of customizable online planning tools. || Share, aggregate, and integrate economic impact data to assess economic issues. || Proactively remove inhibitors to incorporate economic recovery, while maintaining the rights of all individuals. ||

**Potential Partners:** Critical infrastructure Owner-Operators || Business Owners-Managers || Horizontal and Vertical Jurisdictions || Non-Governmental Organizations || Decision Makers/Policy Makers || Emergency Management || Private Sector Partners || Community/City/County Planners || Community Trusts, Boards and Services || Governance Boards || Regional Consortiums || Building Officials, Architects, and Engineers || Small Business Association ||

Mission Area Definition:

Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

## Health and Social Services

### Core Capability Description

Restore and improve health and social services capabilities and networks to promote the resilience, independence, health (including behavioral health), and well-being of the whole community.

### Critical Task(s)

*Identify affected populations, groups, and key partners in short-term, intermediate, and long-term recovery.*

*Complete an assessment of community health and social service needs; prioritize these needs, including accessibility requirements, based on the whole community's input and participation in the recovery planning process; and develop a comprehensive recovery timeline.*

*Restore health care (including behavioral health), public health, and social services functions.*

*Restore and improve the resilience and sustainability of the health care system and social service capabilities and networks to promote the independence and well-being of community members in accordance with the specified recovery timeline.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, restore functions at **(#)** affected healthcare facilities and social service organizations.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Health and Social Services

## Planning & Exercise

**Functional Areas:** Pre-disaster community health and social services deficits. || Pre-identified health system priorities (hospitals, dialysis centers, etc.). || Pre-identified social services (childcare, head start providers, etc.). || Community health strategies and programs. || Long-term health issues and protection measures for responders. || Perform a community rapid health assessment and reassessment throughout recovery operations. || Perform an assessment of social service needs. || Assess incident-related disaster impacts. || Prioritize community health and social services needs based on whole community input. || Develop health and wellbeing strategy for those affected. || Develop and implement strategies to protect health and safety of public and recovery workers. ||

**Potential Partners:** State and Local Epidemiologists || Emergency Management || Public Health || Mental Health Practitioner || Healthcare || Health Surveillance Networks ||

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition: **Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.**

## Housing

### Core Capability Description

Implement housing solutions that effectively support the needs of the whole community and contribute to its sustainability and resilience.

### Critical Task(s)

*Assess preliminary housing impacts and needs, identify currently available options for temporary housing, and plan for permanent housing.*

*Ensure community housing recovery plans continue to address interim housing needs, assess options for permanent housing, and define a timeline for achieving a resilient, accessible, and sustainable housing market.*

*Establish a resilient and sustainable housing market that meets the needs of the community, including the need for accessible housing within the specified timeframe in the recovery plan.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, **(#)** people requiring long-term housing, including **(#)** people with access and functional needs (requiring accessible long-term housing), find and secure long-term housing.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Housing

## Planning & Exercise

**Functional Areas:** Disaster housing process (shelter, temporary, permanent). || Local government housing goals and expectation management of individuals. || Insurance and the responsibilities of individuals. || Cost recovery process/reimbursement for the general public, local responders, officials, departments and agencies. || Pending federal disaster declaration describe public assistance programs and individual assistance. || Other needs assistance programs and small business administration programs. || Assess preliminary housing impacts, available temporary housing options, and support development of the permanent housing plan. || Assess and address affordable, accessible, and workforce housing needs. || Define an achievable timeline for a resilient and stainable housing market. ||

**Potential Partners:** Emergency Management || Horizontal and Vertical Jurisdictions || Decision Makers/Policy Makers || Community/City/County Planners || Building Officials, Architects, and Engineers

Introduction to Individual Assistance	IS403	FEMA

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

Mission Area Definition:

Recover through a focus on the timely restoration, strengthening and revitalization of infrastructure, housing and a sustainable economy, as well as the health, social, cultural, historic and environmental fabric of communities affected by a catastrophic incident.

## Natural and Cultural Resources

### Core Capability Description

Protect natural and cultural resources and historic properties through appropriate planning, mitigation, response, and recovery actions to preserve, conserve, rehabilitate, and restore them consistent with post disaster community priorities and best practices and in compliance with applicable environmental and historic preservation laws and Executive orders.

### Critical Task(s)

*Implement measures to protect and stabilize records and culturally significant documents, objects, and structures.*

*Mitigate the impacts to and stabilize the natural and cultural resources, and conduct a preliminary assessment of the impacts that identifies protections that need to be in place during stabilization through recovery.*

*Complete an assessment of affected natural and cultural resources, and develop a timeline for addressing these impacts in a sustainable and resilient manner.*

*Preserve natural and cultural resources as part of an overall community recovery that is achieved through the coordinated efforts of natural and cultural resource experts and the recovery team in accordance with the specified timeline in the recovery plan.*

### Core Capability Standardized Target(s)

Within **(#) (time)** of an incident, restore **(#)** damaged natural and cultural resources and historic properties registered in the jurisdiction.

# Core Capability Development Sheets

Originally Developed by FEMA, Adapted for Washington State Use

MISSION AREA

Natural and Cultural Resources

## Planning & Exercise

**Functional Areas:** Post disaster community priorities specifically how natural and cultural resource restoration align with these priorities. || Current long-term natural and cultural resource programs such as coastal barriers, flood plain and wetland development. || Conduct a preliminary assessment of the impacts. || Identify protections which need to be in place through recovery. || Utilize current community programs to leverage opportunities for natural and cultural resource protection. || Include hazard mitigation strategies. || Develop a natural and cultural resource action plan. || Identify natural and cultural resource interdependencies. || Identify impediments to following natural and cultural preservation policy during recovery operations. || Identify, protect and stabilize records, culturally significant documents, objects and structures. ||

**Potential Partners:** Emergency Management || Horizontal and Vertical Jurisdictions || Decision Makers/Policy Makers || Community Trusts, Boards and Services || Community/City/County Planners
