

Sasquatch knew to **drop, cover, and hold on** during the earthquake! Now he needs to evacuate his home, but there are hazards like fallen furniture and broken glass in the way.

Can you help him find his way to the exit?

Good job helping Sasquatch safely evacuate his house! It would have been easier if he had done a **home hazard hunt** before, though. Ask an adult to do a home hazard hunt with you so you can make your home earthquake safe!
