

EAS-WA -Tab 10C WA-PAWS- Tab C5C	<b>Participating National (PN) Monitoring Matrix</b>	Approved by SECC 5.12.20 Rev 11.15.20
-------------------------------------	--	---

## **INTRODUCTION**

The following pages detail the over-the-air Monitoring Sources available to all Participating National (Not Local Primary) AM, FM, TV and Cable facilities in each Operational Area of Washington State. Changes to these tables may only be made by the express written approval of the Washington State SECC.

## **NOTES**

See – 47 CFR Part 11 <https://ecfr.io/Title-47/pt47.1.11>

- 1- To contact Emergency Management Offices in each Operational Area, see EAS-Tab 2 or WAPAWS Tab D1.
- 2- Changes, corrections and updates should be directed to the SECC via the Washington State EAS Remailer.
- 3- To comply with FCC Rules, every Participating National (PN) facility must monitor-- at a minimum – two LP's.
- 4- In addition, to effectively provide emergency information, monitoring the NWS, SRN and LRN is highly encouraged.
- 5- The States of Washington and Oregon make use of networks of broadcast stations to distribute National-Level alerts. These systems are identified within the 'Frequency' column with a number suffix as follows:  
NWPB (1), KNKX (2), KPBX (3) and Oregon Public Broadcasting (OPB) (4)
- 6- As you make the decision about which frequencies to monitor, you are always welcome to reach-out to either your local Emergency Communications Committee (LECC) or the State Emergency Communications Committee (SECC) for advice.
