Preface

THE NATIONAL GUARD ORGANIZATION AND MISSION

The Army and Air National Guard of the United States are integral parts and first line Reserve components of the Army of the United States and the United States Air Force. The National Guard of the States and Territories continues to exist and in time of emergency may be called or ordered into the Army of the United States and the United States Air Force through its National Guard of the United States status. All federally recognized units and elements of the Active National Guard and the personnel of the Inactive National Guard of the several states, the District of Columbia and Puerto Rico together constitute the National Guard of the United States.

The mission of the Army National Guard of the United States is to provide units of the Reserve components for the Army, adequately organized, trained and equipped, available for mobilization in the event of national emergency or war, in accordance with the deployment schedule, and capable of participating in combat operations in support of the Army's war plans. This mission may include the defense of critical areas of the United States against attack.

The mission of the Air National Guard of the United States is to provide trained units and qualified individuals to be available for Active Duty in the United States Air Force in time of war or national emergency and at such other times as the national security may require to meet the requirements of the United States Air Force in excess of those of the regular components thereof, during and after the period needed for procurement and training of additional trained units and qualified individuals to achieve the planned mobilization.

The mission of the National Guard of the several states is to provide sufficient organizations in each state so trained and equipped as to enable them to function efficiently at existing strength in the protection of life and property and the preservation of peace, order, and public safety under competent orders of the state authorities.

Commander-in-Chief: The Governor is the Commander-in-Chief of the Washington National Guard.

The Adjutant General: The Adjutant General is responsible for the administration of National Guard affairs as prescribed in Section 38.12.020 of the Revised Code of Washington.

The Assistant Adjutant General, Army Division supervises and coordinates all matters pertaining to Army National Guard units and also functions as Deputy Adjutant General.

The Assistant Adjutant General, Air Division supervises and coordinates all matters pertaining to Air National Guard units.

Federal Advisors: The United States Army and the United States Air Force detail officers and enlisted men to duty with the Washington National Guard as advisors for instructional purposes. These individuals are a part of the Army or Air Force command and are not subject to orders of State

authorities. Their primary mission is to advise and assist in the training of National Guard units.

Army Advisors: The United States Army Advisor Group (NGUS), Washington, is headed by the Senior Army Advisor with station at Camp Murray. The Army Advisor Group is composed of twenty-three officer advisors and thirty-three sergeant advisors who are stationed in seventeen localities throughout the State with units of the Washington National Guard.

Due to personnel shortage, Department of the Army has reduced the overall authorization to eighteen officer advisors and twenty-six sergeant advisors.

Air Advisors: The Air Advisor Group is headed by the Senior Air Advisor with station at Spokane, Washington. This group is composed of seven officer advisors and eight sergeant advisors who are stationed in Spokane, Seattle and Bellingham with units of the Washington Air National Guard.

SECTION I
ARMY NATIONAL GUARD
Military Personnel Section

PART I

General Functions

The Military Personnel Section is charged with the responsibility for the planning and coordination of those functions which pertain to the management of the Army National Guardsman as individuals. Primary staff responsibilities include the development, issue and enforcement of personnel policies and procedures required by applicable laws, regulations, directives, etc.; the handling of incoming correspondence from, and the maintenance of necessary liaison with other governmental agencies. Its operations are in accordance with approved policies, the State Military Code, National Guard Regulations, and pertinent Army Regulations.

PART II

Detailed Summary

Officer Personnel: Statistical data on the personnel actions handled during the reporting period by this subsection is indicated on the chart entitled "Officer Personnel Strength". In addition to such common functions as recruiting, maintenance of individual 201-file records, issue of General and Special Orders, and preparation of periodic statistical reports, the daily activities of its sub-sections are concerned with are:

Appointment, promotion, assignment, separation and retirement of commissioned and warrant officers.

Processing annual and special officer efficiency reports.

Processing reports of physical examination.

Monitoring technical waivers granted by Federal recognition boards.

Processing applications for voluntary recall to extended Active duty.

Issue and control of identification cards to officers and key enlisted men.

Monitoring uniform allowance program.

Processing reports of vehicle accidents, claims and line of duty investigations.

Assisting in preparation and submission of requests for placement on Army of the United States retired list.

Monitoring attritive provisions of Reserve Officer Personnel Act of 1954 insofar as they affect commissioned officers of the WashARNG.

Monitoring and controlling the administering of tests required by the US Army Enlisted Evaluation System as it pertains to enlisted men in pay grade E-4 and above.

Enlisted Personnel: Statistical data on the personnel actions handled during the reporting period by this subsection is indicated on the chart entitled "Enlisted Personnel Strength". Other important functions performed include:

Maintenance of 201-files and status cards for each individual.

Processing end-of-the-month morning reports and penching cards.

Preparation of statements of service in response to requests received from units, individuals and other government agencies.

Processing certifications for priority induction.

Monitoring Ready Reserve obligations and retirement credits.

Programmed Strength

The personnel trends of the Washington Army National Guard have been as indicated in the following recapitulation showing a net loss of 28 officers, a net loss of 6 warrant officers and a net loss of 274 enlisted men during the reporting period.

	Officer	Warrant Officer	Enlisted	Aggregate
1 July 1962.....	527	111	5186	5824
30 June 1963.....	497	106	4643	5246
30 June 1964.....	499	105	4946	5550

In connection with the foregoing recap, the Chief, National Guard Bureau reduced the WashARNG strength ceiling to 5,840 during the reporting period. At the same time certain other changes were made in the assignment of priorities and policies governing the Army National Guard. The overall realignment was designed to make the Army National Guard more responsive to present day mobilization requirements. Experience factors gained as a result of the Berlin call-up of 1961 were used to develop the "re-alignment" plan. In order to accelerate the transition which emanates during a mobilization, the administration of personnel records keeping is gradually being changed to conform to the standards of the active Army.

In addition to the realigning of the Washington Army National Guard, the Secretary of Defense made three stipulations that have a direct effect on the strength performance and capability to maintain authorized strength. The stipulations were:

1. Recruiting standards to be the same as the Active Army.
2. As a minimum, 90% of all personnel must be qualified in their assigned Military Occupational Specialty.
3. That no unit will exceed its priority aggregate strength, except that units within a "mobilization entity" may fluctuate 10% above or below authorized strength. A mobilization entity is defined as a division, separate brigade, separate regiment (or battle group), separate company and a separate detachment.

The third stipulation is the most restrictive to the attainment of our authorized strength in that it prohibits overprogramming. Overprogramming in all units is necessary if we are to attain the average year end strength as authorized by the Chief, National Guard Bureau.

Administrative Services: This sub-section of the Military Personnel Section provides the following services: Mail, message center, teletype, PBX, central files and the reproduction and distribution of all publications. In addition the Chief of this sub-section serves as the Archivist; monitors the awards program; and processes all surveys and quarterly droppages for the Installation Commander. He is also responsible for coordination of the micro-film program which is scheduled to begin during the next biennium. This is to conform with instructions from State Civil Defense Chief in connection

with the alternate location of the State Capitol. In addition plans during the next biennium envisage the beginning of the micro-filming of Military Department records of some 250,000 men, with the resultant savings in standard filing equipment.

During this biennium, Volume 6 of the official history of the Washington National Guard was completed and distributed. The acting Archivist is currently preparing Volume VII which will cover the Washington National Guard in the Korean Incident and subsequent reorganization of the National Guard of Washington under the Pentomic concept.

OPERATIONS AND TRAINING SECTION

PART I

GENERAL RESPONSIBILITIES AND FUNCTIONS ASSIGNED TO SECTION

The Military Operations and Training Section prepares the plans for the organization and utilization of the State Military Forces in the event of disaster, civil disturbances, or National Defense, either separately or in conjunction with Federal Military Forces. This section is responsible for periodic evaluation reports, troop movements, mobilization and coordination of all State Military Forces. All matters affecting Organization and Training, including procurement and distribution of training aids and implementation of Training Programs, policies and directives, is supervised by the Operations and Training Section. It controls the Federal Funds allocated for Army Service Schools, and other military activities of individual guardsmen; in this connection, all applicants for these Service Schools to include the six-months Recruit Trainees are processed through this section. In addition, this section controls and coordinates the Army Extension Course Program and is responsible for all matters incidental to State Security of classified information and material. Applications for Personnel Security Clearances are screened and processed through this section and records maintained.

PART II

RESIDENT INSTRUCTION

During this reporting period 610 officers and 688 enlisted men attended a course at one of the Army service schools, Army area schools, or training during a short tour of active duty. Personnel attending resident courses or training periods are ordered to active duty for training in their military status and are entitled to similar benefits afforded active Army personnel.

Reduction of Federal support funds during FY 64 reduced the attendance of ARNG personnel at school courses offered by the Fort Lewis Schools Center. These courses, for the most part, were hard skill MOS courses. Personnel requiring this training for MOS qualification were encouraged to enroll in the extension course equivalent or receive on-the-job training if available at the unit level.

During this period 46 newly commissioned second lieutenants successfully completed their basic branch course, 23 company or field grade officers attended branch career courses and 14 enlisted men completed Special ARNG OCS at the US Army Infantry and US Army Artillery Schools. A complete listing of schools attended and active duty for training tours follows:

RESERVE COMPONENT ENLISTED TRAINING PROGRAM (Formerly Six-Months Training Program)

Effective on 11 August 1963, all enlistments of non-prior service personnel were obligated for a variable period of initial active duty for training from a minimum of 4 months to a period required to properly qualify the individual in the designated military occupational specialty (MOS). As in the former Six-Months Training program, all personnel are ordered to the US Army Training Center for 8 weeks basic training and then assigned to an active army installation for MOS training. MOS training duration is from 6 weeks in certain MOS's up to 20 weeks for some of the hard skill MOS's. The average active duty time under this new program has been reduced to about 5 months.

This program continues to be main source of recruitment for the National Guard and maximum emphasis has been placed on full utilization of allotted quotas.

For the purpose of this report the current RCETP program has been consolidated with the former Six-Months Training program. The following breakdown indicates input during this period.

	FY 1963	FY 1964
41st Infantry Division Units.....	468	820
Non-Division Units	231	361
TOTALS	699	1181

ARMY EXTENSION COURSE PROGRAM

The Army Extension Course Program provides Army service school instruction to Army National Guard officers and enlisted men through correspondence study. All texts, manuals, and necessary equipment are furnished the student on a loan basis at no cost to the individual.

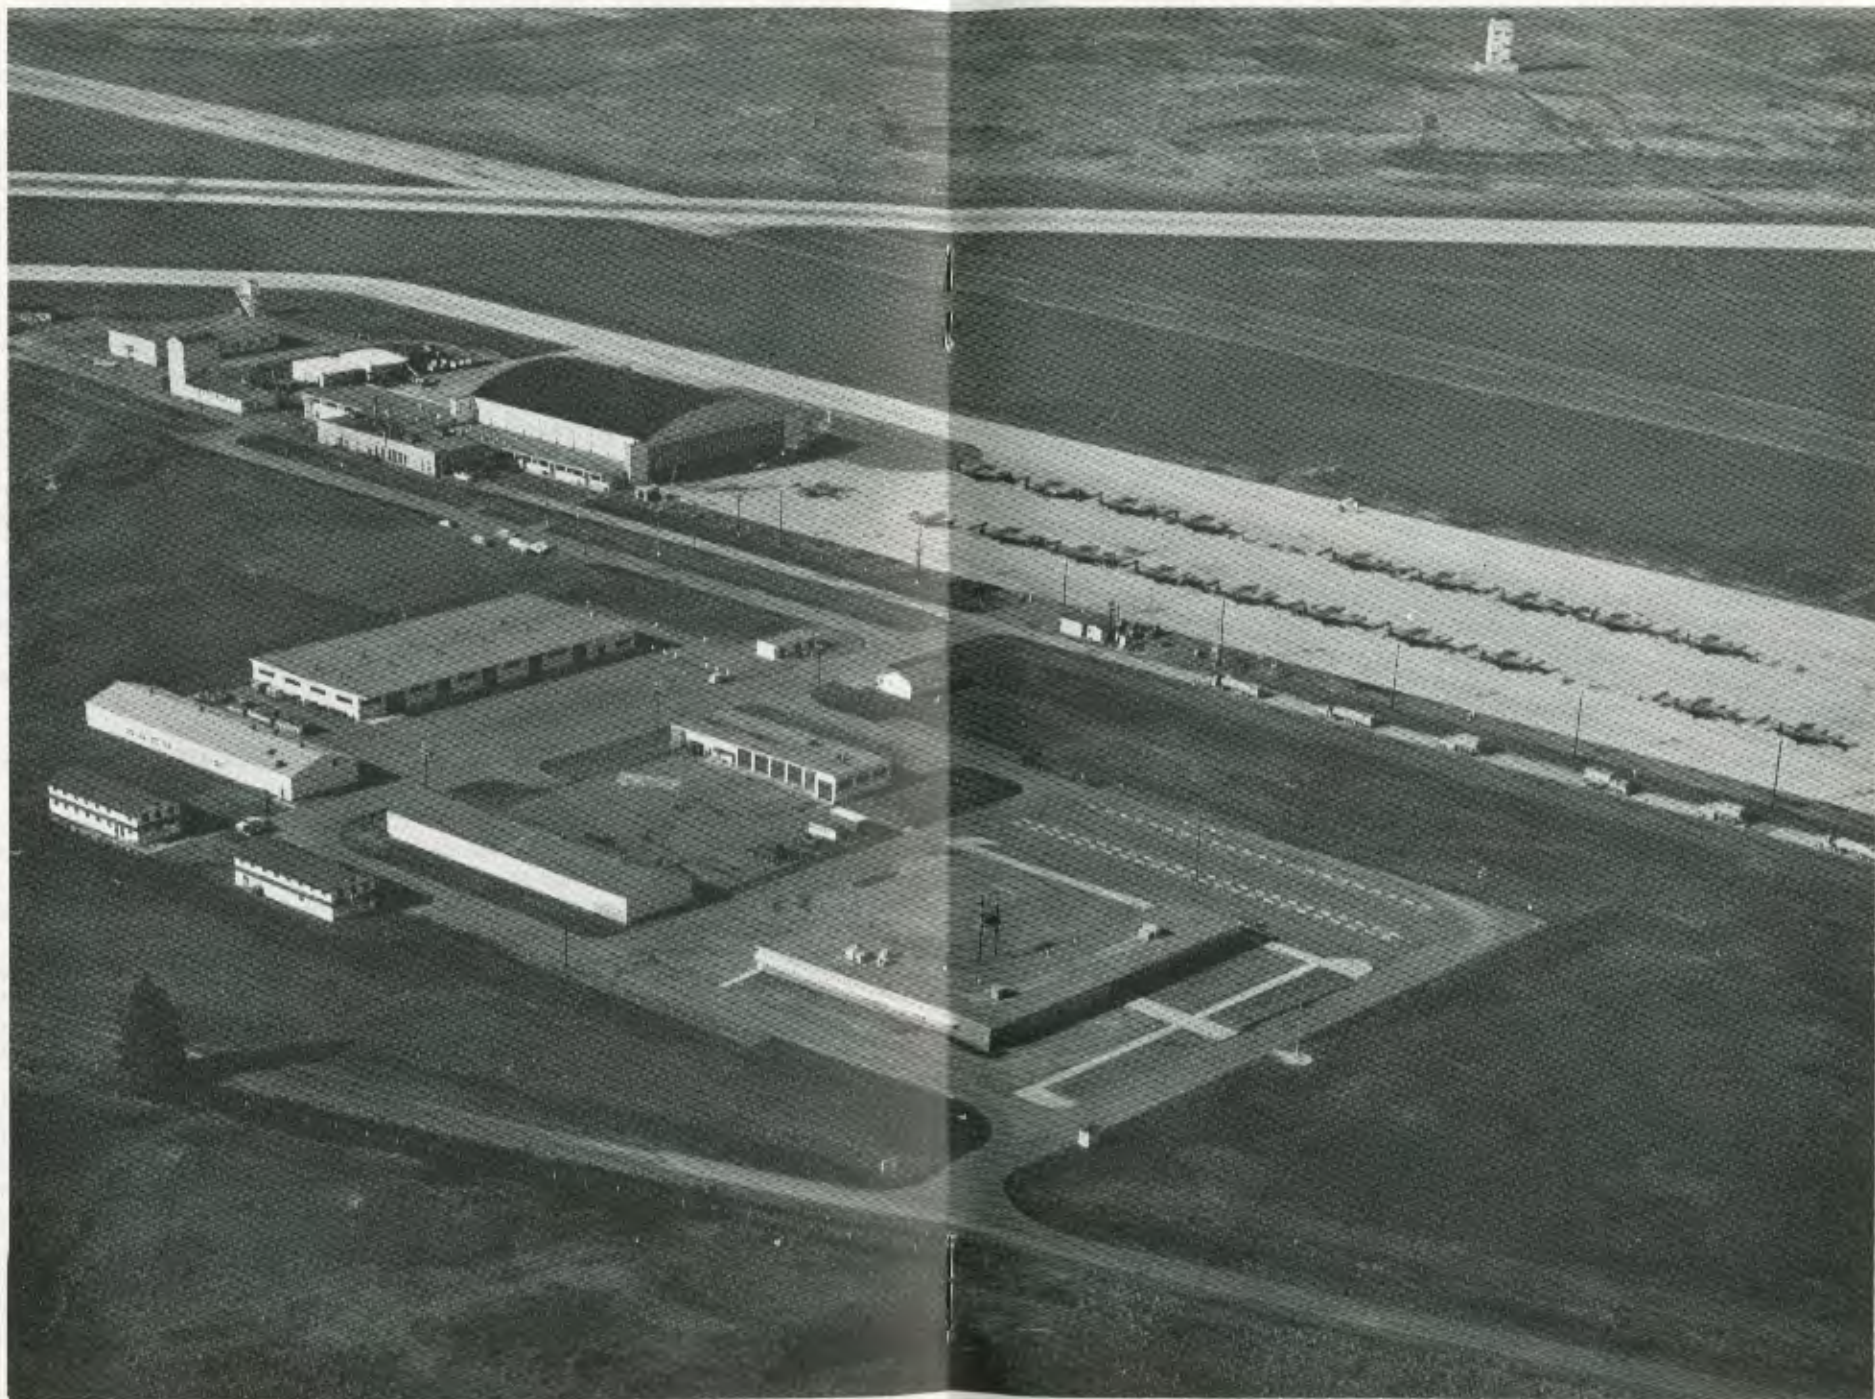

Each course curriculum will parallel as closely as possible a corresponding resident course of instruction.

Recent changes to the program permit officers enrolled in career courses to complete up to 50% of the course by examination, by passing many hours of lessons leading up to the examination. Other advances now permit officers enrolled in career courses to select a course offering a combination of extension instruction and resident phases at the service school.

Time required to complete an extension course varies from the 572 credit hours required for the Command and General Staff College Extension Course to the 20 credit-hour Non-Commissioned Officers Leadership and Career Development Course. Individuals may enroll in an entire course or one sub-course, depending upon the training requirement.

Number of individuals enrolled in extension courses at the end of this reporting period are indicated as follows:

	Officer	Enlisted	Total
Adjutant General School.....	5	14	19

ANNUAL ACTIVE DUTY FOR TRAINING

Units of the Washington National Guard have continued to progress to a degree of proficiency unsurpassed in the history of the Washington National Guard. The high ratings obtained at Annual Field Training reflect this excellent progress. Organizations conducted Annual Field Training at the following sites:

ANNUAL GENERAL INSPECTIONS

Annual General Inspections are now conducted on a "saturation" type procedure. Seven teams, consisting of an officer and enlisted man each, are detailed from Hq Sixth US Army. All Army National Guard units are inspected within a two week period. Results of inspections for period covered by this report are as follows:

Year	Superior	Excellent	Satisfactory	Unsatisfactory
1963	8	56	8	0
1964	7	58	10	0

ORGANIZATIONAL ACTIVITIES

During the past Biennial period the Washington National Guard was reorganized to keep pace with the latest Department of Defense concepts. All 41st Infantry Division units of the Washington National Guard were converted from ROCID to a ROAD Type organization.

SECURITY PROGRAM

The Department of the Army prescribes policy and procedures for issuing classified defense information and the granting, denial or revocation of security clearances for all WashARNG units and personnel.

It is the State's responsibility to insure that classified information and material issued is safeguarded and controlled at all time. This office must also insure that personnel who have access to defense information are appropriately cleared in accordance with Department of the Army regulations.

In the discharge of his responsibilities, the Adjutant General continually reviews control methods, classified files and personnel records to insure compliance with higher headquarters regulations.

Recent upgrading of security clearances for numerous positions within the On-Site Program has resulted in a heavy increase of clearance applications. It is estimated that each month from 50 to 75 clearance requests are processed through this office. At the close of this reporting period, 4042 officers, enlisted men and civilian employees have been granted final clearance for access to classified information and material. Forty-two applications are presently pending final action by Headquarters, Sixth US Army.

WASHINGTON NATIONAL GUARD RIFLE TEAM

The Washington National Guard entered a rifle team in the National Rifle Matches at Camp Perry, Ohio during both years of the reporting period. Each year the team was selected from those individuals achieving the highest scores in the NBPRP match at either the Army or Regional Matches conducted prior to the National Matches.

During the 1962 National Matches, a six man team consisting of Captain John R. Easley, 1st Lieutenant Charles C. Gregg, 1st Lieutenant Alyer R. Hudlow, 2d Lieutenant Eugene A. Weir, Sp5 John W. McGee and Sp5 John E. Ogden won first place reserve in the Enlisted Mens Trophy Team Match with a score of 851V25. The team was captained by Colonel Paul C. James and coached by First Sergeant George A. Rahn.

The same team with the exception of Staff Sergeant R. Kroner who substituted for 1st Lieutenant Alyer R. Hudlow, finished fifteenth out of forty-one National Guard Teams.

During the 1963 National Matches, two Washington National Guard team members placed in the National Trophy Individual Match. 2d Lieutenant Roger D. Lovitt placed in the silver medals with a score of 245V19 and Staff Sergeant Kenneth E. Bailey placed in the silver medals with a score of 243V21.

A six man team composed of 1st Lieutenant Vincent D. Aguirre, 1st Lieutenant Thomas M. Burgess, 2d Lieutenant Alyer R. Hudlow, 2d Lieutenant Roger D. Lovitt, Staff Sergeant Kenneth E. Bailey and Staff Sergeant Wilburt R. Kroner finished eighth out of thirty-eight National Guard Teams. The team was captained by Colonel Paul C. James and coached by Sp5 John E. Ogden.

WASHINGTON NATIONAL GUARD PISTOL TEAM

The Washington National Guard Pistol Team entered the following matches during the period indicated:

1963:

Entered 5-man team in the Sixth US Army Pistol Matches, Ft Ord, California, 27 Mar 1963.

Entered 8-man team in the Tacoma Twilight League, Tacoma, Washington, May and June 1963.

Entered 8-man team in the North Pacific Championship Matches, Tacoma, Washington, Jun 1963. Twenty-seven individual awards.

Entered 8-man team in the National Pistol Matches, Camp Perry, Ohio, Aug 1963. Team placed 15th in National Guard competition.

1964:

Entered 10 men in the Sixth US Army Pistol Matches, Ft Ord, California, 15 Apr 1964. Twelve individual awards.

Entered 10 men in the Paul Bunyan Pistol Match, Puyallup, Washington, 14 Mar 1964. Twenty-five individual awards and three team awards.

Entered 4-man team at Pistol Match, Custer, Washington 18 Apr 1964.

Entered 8-man team in the Paul Bunyan Pistol Matches, Puyallup, Washington, 23 May 1964. Thirty-one individual awards and three team awards.

Entered 10-man team in the Tacoma Twilight League, Tacoma, Washington, May and June 1964.

Entered 11-man team in the North Pacific Regional Championship Matches, Tacoma, Washington Jun 1964. Forty-one individual and three team awards. One Northwest Championship Match winner.

Entered 8-man team at the National Pistol Matches, Camp Perry, Ohio, 31 Jul 1964. Nine individual awards. Placed 5th in National Guard competition.

WASHINGTON MILITARY ACADEMY

The Washington Military Academy was established 15 February 1957 as the first Resident Officer Candidate School for the Washington Army National Guard. The Academy was organized as part of a National Guard Bureau plan to eliminate extension course training for future officers and replace it with an aggressive Resident Training Program in each state. The program of instruction consists of approximately 450 hours of training conducted during two Annual Field Training Periods and eight two-day weekend assemblies spaced throughout the year. The course is divided between academic subjects and leadership training. Strong emphasis is placed on the leadership phase to develop this most essential quality in future officers. Lack of leadership training and evaluation was the most serious defect in the former pre-commission extension course programs. The new course requires nearly one year to complete, with a new class starting each August and graduating the following July.

One hundred sixty-nine outstanding young Guardsmen graduated from this Academy prior to the start of this biennium. An additional one-hundred new second lieutenants were graduated from classes 6 and 7 during this reporting period to bring the school output to 269 thus far.

Class number 8 was scheduled to enter training in August 1964 with 105 candidates. Eighty seven of the original group were enrolled following the

first Annual Field Training Period, and it is estimated that a minimum of seventy five will be commissioned upon graduation next year.

For the first time the school accepted applications from the United States Army Reserve, and will have 14 USAR students. This represents a new phase in the Academy program whereby the USAR receives an additional source of company grade officers.

The Academy is considered a valued asset, and plans now call for a continuous output of sixty to eighty-five new second lieutenants each year.

WASHINGTON STATE GUARD RESERVE

The Washington State Guard Reserve primary mission is to provide a cadre of officers capable of organizing and training a State militia for use in time of National or State emergency and in the event of partial or complete Federal induction of the National Guard.

The Washington State Guard Reserve was activated by Executive Order on 19 May 1960. Present strength is 135 officers, many of whom were former Washington National Guard or other military service personnel. All personnel serve without pay. Units drill twice a month at local armories as indicated below. Training is conducted from a Training Guide published by this headquarters and consists of instruction in military police work and general military subjects. A two-day exercise or seminar is held at least once during each training year at Camp Murray where all WSGR units and personnel participate.

A secondary mission of this organization includes a cooperative role with State Civil Defense. Within the capabilities of the Reserve units, the WSGR will assist Civil Defense in (1) civil disturbances, (2) security of public installations, (3) safeguarding of emergency food and medical supplies and (4) provide professional assistance where required.

In addition to the above, a Civil Defense Liaison Section has been organized as a section within the Hq Hq Det, WSGR. This unit consists of the headquarters and five lettered detachments. The detachments, consisting of 5 officers, are located throughout the State in close proximity to Civil Defense Relocation (RELO) Sites. The Civil Defense Liaison Section will (1) serve as liaison between Civil Defense and this headquarters, (2) will assist State Civil Defense in development and maintaining of RELO sites, and (3) in the event of an emergency, will assume immediate control of RELO sites making the site operational, and establish necessary security. Location of this section is indicated as follows:

Hq, Civil Defense Liaison Section: Camp Murray

Detachment A—Camp Columbia, Ilwaco and Long Beach

Detachment B—Fort Worden at Port Townsend

Detachment C—Fort Hayden at Port Angeles

Detachment D—Wash State University, Pullman (to be activated)

Detachment E—Olympia Civil Defense Com Center (to be activated)

Organizations of the Washington State Guard Reserve, together with location and unit strength, are listed as follows:

AIR DEFENSE SECTION

PART I

It is the responsibility of this section to administer and supervise the Air Defense Program known as BP 7600, for the Adjutant General. The program, at the beginning of this biennium, supported a total of 205 Army National Guard technicians to man and operate four Nike-Ajax Missile Sites in the Seattle sector of the North American Air Defense System. At the present time the program supports 195 ARNG technicians to man two Nike-Hercules Sites, one at Redmond and the other near Burton on Vashon Island.

The duties of the section include program funding management, supervision and perpetual liaison with agencies of the US Army Defense Command, such as Headquarters 7th Region and Headquarters 26th Arty Group. During the biennium this program has brought into the state the sum of \$2,711,000.00 in Federal funds for salaries, supplies and other services.

PART II

At the beginning of the biennium the goals established were centered on improved operational readiness with the Nike-Ajax system, reorganization and retraining incident to the operation of the Nike-Hercules system. The specific goals established for the improvement of operational readiness were the attainment of a one-hundred percent record on Operational Readiness

Evaluations (ORE) and attainment of ARADCOM honor roll records on service practice firings.

Goals established for reorganization and retraining included the reduction of the battalion from four to two missile units, the reduction of the technician force from 205 to 195 and the retraining—both at the Air Defense school and on active Army Sites, of the remaining technicians to operate the Hercules system.

PART III

As to the goals established for improvement of Operational Readiness, the following results of ORE's and service practice firings are tabulated:

Operational Readiness Evaluation:

UNIT	Nr of Eval	Operational	Non-Operational
Battery A-2/205	12	11	1
Battery B-2/205	12	9	3
Battery C-2/205	13	11	2
Battery D-2/205	14	13	1

Service Practice Scores

Battery A-2/205	90.1%	
Battery B-2/205	88.4	
Battery B-3/205	91.6	
Battery C-3/205	93.3	(Honor Roll)
Battery A-2/205	95.6	(Honor Roll)
Battery B-2/205	98.5	(Honor Roll)
Battery C-2/205	98.5	(Honor Roll)
Battery D-2/205	96.5	(Honor Roll)

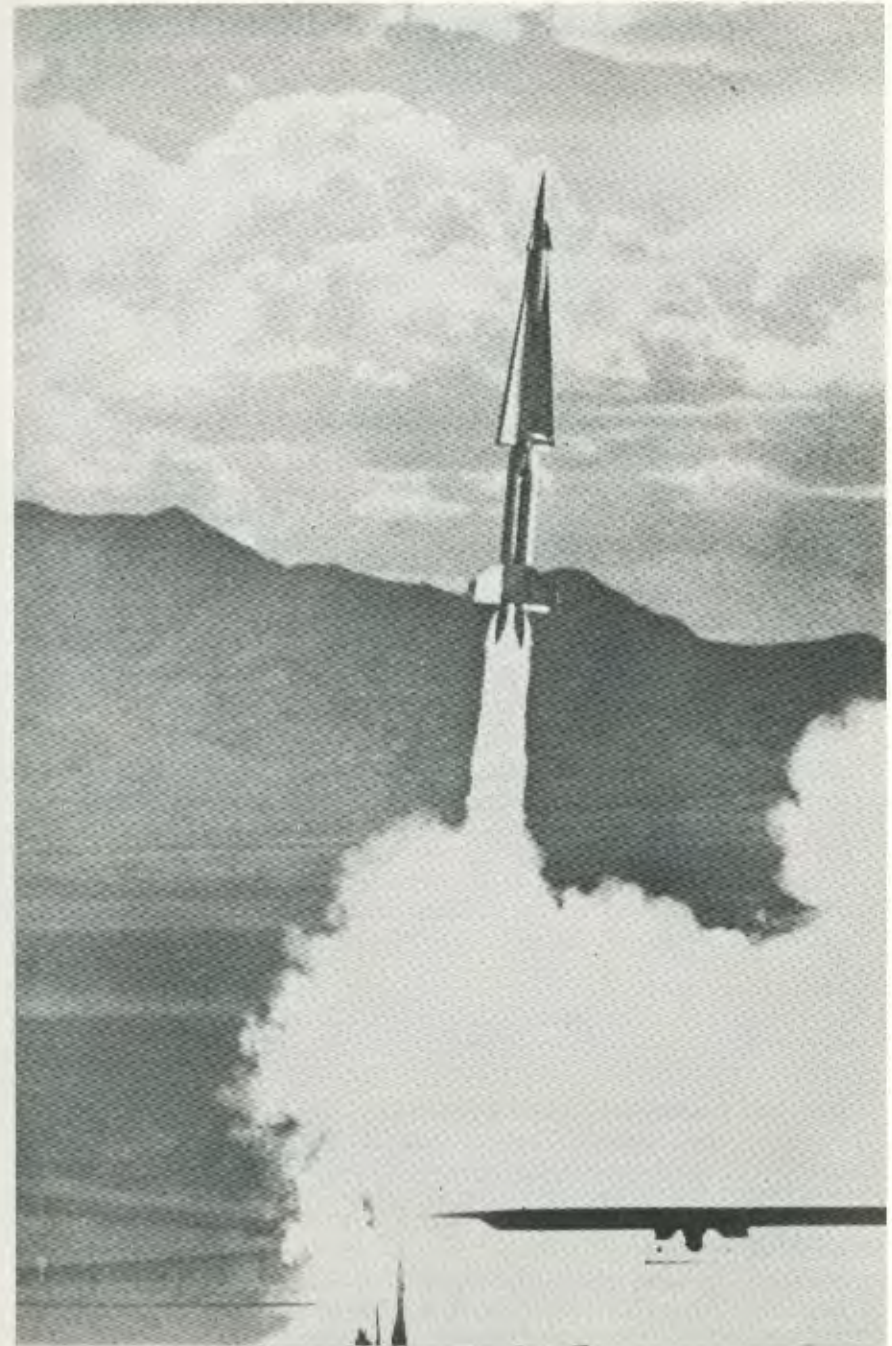

As to the goals established for reorganization and retraining the following is submitted:

At the start of the biennium there were two Missile battalions consisting of four Missile batteries each. These battalions were designated the 2d and 3rd Msl battalions, 205th Arty. Each had two batteries manning Missile Sites and two in an armory drill status. On 1 March 1963 the 3rd Msl battalion, 205th Arty and four armory type Missile batteries were inactivated. The two on-site batteries (B&C) of the 3rd Msl battalion were redesignated batteries D and C respectively of the 2d Msl battalion 205th Arty. This left but one Missile battalion consisting of four batteries on site.

On 3 March 1964 our Nike-Ajax Sites were phased out and the battalion was reorganized as a Nike-Hercules battalion with batteries A and B. At the same time the number of air defense technicians was reduced to 195 and the structure tailored to meet the manning requirements of the Hercules Missile Sites at Redmond and Burton. As a result of the most recent reorganization, approximately one-half of the technicians retained had to be reduced in military grade.

At the close of the biennium a total of ninety-nine (99) air defense technicians were being retrained at the US Air Defense Center, Ft Bliss, Texas and ninety-one (91) were performing on the job training at active Army sites in the Seattle area. This retraining, which began on 8 January 1964, is right on schedule.

The goals established for the biennium have been attained.

NIKE-HERCULES—On the Way

THE STATE MAINTENANCE SECTION

PART I

General Functions

The State Maintenance section under the direction of the State Maintenance Officer operates repair and Maintenance facilities for all Federal Equipment issued to the Washington Army National Guard. The mission of maintaining Army National Guard equipment is accomplished by a Combined Support Maintenance Shop, a Field Training Equipment Concentration Site, an Army Aviation Maintenance Shop and nineteen Organizational Maintenance Shops.

PART II

Detailed Summary

The equipment maintained includes over 2,000 wheeled and tracked vehicles of all types ranging from Jeeps to Tanks. Approximately 200 pieces of artillery from 76mm Guns mounted on M41 light tanks to 8-inch towed Howitzers. There are also approximately 11,000 small arms of all types, 2,800 pieces of Signal equipment and over 1,100 fire control instruments. Numerous miscellaneous items, such as tarpaulins for military vehicles and Field Ranges, are also repaired by the Maintenance Section. This section is also responsible for maintaining a fleet of Marine equipment consisting of two Harbor Tugs, six Landing Craft, a Freight Supply Ship, two Passenger and Cargo Vessels, two Barges, one Patrol Boat and a two hundred and ten foot Floating Craft Depot Maintenance Barge.

The Combined Support Maintenance Shop is responsible for performing repairs necessary to Army National Guard equipment, with the exception of Army Aircraft. It also provides Maintenance specialists on an on-call basis to all units throughout the State for the purpose of repairing equipment. This system of sending contact teams to the unit is often more economical than evacuating the equipment to Camp Murray for repairs. Command Maintenance Management Inspections, previously performed by a team from Headquarters, Sixth U. S. Army are now the responsibility of the Army National Guard. These command maintenance inspections are accomplished by a team from the Combined Support Maintenance Shop. This important function gives a good indication of the maintenance operational readiness of all military equipment in the hands of the Army National Guard units.

The Field Training Equipment Concentration Site, located at Camp Murray, receives and maintains heavy items of equipment such as Special Purpose Vehicles, Graders, Tractors, Tanks and Artillery material of all types. The equipment maintained at this site is usually items that are not required for use at the unit Armory during the training year, but are required for Annual Field Training.

The Army Aviation Maintenance Section is responsible for maintenance of all Army Aircraft. At the close of this biennium there were ten Light Aircraft and seven Helicopters within the Washington Army National Guard. A supervisor, who is a rated pilot, and aircraft maintenance technicians perform the required maintenance on all Army Aircraft.

The Organizational Maintenance Shops located throughout the State perform all organizational maintenance beyond the capabilities of the using unit: These shops are designed to service the equipment of a Battalion sized unit. They have the responsibility of maintaining administrative storage compounds for unit vehicles and material not required for training. The technicians who operate these shops are also used to evacuate equipment to the Combined Support Maintenance Shop when the maintenance requirement is beyond their capability.

Maintenance of National Guard equipment is a full time project with the ultimate goal of having equipment in safe operating condition at all times. Equipment is scheduled for repair over a full year. All equipment is maintained in accordance with directives published by the Departments of the Army and the Air Force.

During the period of this report the following items were processed through the Combined Support Maintenance Shop:

Vehicles	2,947
Artillery	548
Small Arms	4,310
Instruments and Fire Control.....	1,321
Signal	2,892
Engineer	357
Quartermaster	5,325
Miscellaneous	21,675

These repairs ranged from minor projects to complete rebuild of equipment evacuated to the Combined Support Maintenance Shop.

Section II

AIR NATIONAL GUARD

PART I

The Air National Guard is that part of the organized militia of the several states that is constantly in training with equipment furnished by the federal government to support the requirements of the active Air Force in time of national emergency or the state in the event of local emergency or disaster. The general responsibility of the Air Division of the State Military Department is to insure that training is accomplished and is directed toward the ultimate objective—a trained, ready, effective argumentation reserve force. In conjunction with this general responsibility the Air Division must insure that the resources—equipment, supplies, funds, facilities, and personnel—are utilized and managed in the most effective manner and directed towards the attainment of the objective. To insure that all resources are objective oriented, function responsibilities have been established in the Personnel Administration, Comptrollership, Operations and Training, and Programs and Requirements.

PART II

Narrative Summary

The Air National Guard's prime objective is the maintenance of a trained and ready reserve force oriented to meet the requirements of the Air Force gaining command in the event units are called upon in a national emergency. This objective has been obtained and maintained during the past two years. All units have successfully qualified for Satisfactory ratings as verified by Annual General Inspection Reports initiated by the gaining commands. In addition, the 141st Fighter Group (AD) successfully performed during two Tactical Evaluations and one Operational Readiness Test conducted by the major gaining command. Those units not subjected to operational test have proven their capabilities to perform their assigned missions during their field training periods.

The desired goal of 100 percent manning for all units has not been attained. This situation is due primarily to restrictions placed on all Air National Guard units by the National Guard Bureau. However, the operational readiness rating of all units has continued to increase as a result of on-the-job-training programs conducted by the units and through the utilization of available Air Force Technical School training spaces.

The continued participation of the 141st Fighter Group (AD) in the active air defense program under the supervision of North American Air Defense Command additionally support the contention that the units have obtained a high degree of operational readiness. At the present time, this unit has four aircraft and nine aircrew (18 Personnel) on a 24 hour schedule.

Section III

GENERAL SUPPORT ACTIVITIES

INSTALLATIONS SECTION

PART I

The Installations Section is responsible for the new construction, modifications, maintenance and operation of all the facilities controlled by the Washington National Guard. It is also responsible for the state property utilized within these facilities. There were forty-five installations located in thirty-five communities throughout the State. The installations vary in size from less than acre of land with one building to the Camp Murray Reservation with two hundred and thirty-four acres and sixty-nine buildings. During the past biennial period, over \$1,500,000 dollars have been spent in new construction, major improvements, and maintenance. Of this total expenditure, over \$850,000 was secured from Federal Funds.

PART II

New construction has been centered around five major projects. New armories were completed at Colville and Anacortes; the Everett Armory was completely rehabilitated; and Army Aviation Shop-Hangar at Gray Field, Fort Lewis, Washington is nearing completion; and a large expansion of the Bellingham Air National Guard Armory is under construction. The Colville and Anacortes armories were constructed with Federal matching funds. Both facilities contain 1300 square feet of functional space and were provided with parking areas, site improvements and new equipment. These armories provide ideal facilities for one unit stations.

The Everett Army rehabilitation was accomplished with State Funds. The project completely rehabilitated the facility and modernized the exterior and interior. With the re-arrangement of space utilization, a more functional layout was secured. This added greatly to the utilization of the building. The rehabilitation extended the life of the Armory for many years.

Construction of the new Army Aviation Maintenance Shop-Hangar at Gray Field, Fort Lewis, was required to allow the Army to remove the old facility licensed to the National Guard. The project is being accomplished with Federal Funds made available by the National Guard Bureau. It includes a shop-hangar building, aircraft parking apron, automotive parking area, aviation fueling system, taxiways and other facilities required for a complete maintenance activity.

The expansion of the Bellingham Air National Guard Armory will triple the size of the building. The original armory building was constructed in 1950 to provide facilities for a detachment with a strength of approximately 80. The current unit assigned has an authorized strength of 229. The lack of adequate facilities has materially affected the strength and training of this unit. The project will provide more adequate space to house and train the personnel. This project is being done by the Bureau of Yards and Docks, U. S. Navy, and is supported with Federal Funds.

During this biennial period, a major maintenance program has been developed. Funds were provided in the current biennium for the initiation

of this program. For many years, maintenance of National Guard facilities was deferred through lack of funding. A six-year program, covering the major maintenance work, will bring all of the buildings into condition, where preventive maintenance can provide necessary upkeep. Emphasis is being placed on roof repair and painting. Savings in the costs of operations made during the past year, have been applied to the maintenance work. Continued funding, at the current level, will allow the successful completion of the program.

Legislation was secured in the last session of the Legislature to allow the Adjutant General to sell the Seattle Armory to the City of Seattle. Funds from the sale must be enough to construct new facilities for the Seattle units. The armory is located in the center of Seattle Civic Center area. Temporary facilities for all units were secured at the U.S. Naval Supply Depot (Pier 91) for use during the Worlds Fair. Use of these facilities has been extended during the period of negotiation with the City.

The majority of the state property and equipment in use at this time was secured prior to World War II or received from the Selective Service system at the close of the War. Much of this equipment will require replacement within a short period of time. A budget program is being prepared for presentation in the 1965-1967 Budget. A complete inventory and condition report of all state property has been made. A new property authorization for each Station has been developed. With this information, a program for procurement and replacement can be presented. The proposed program covers an expenditure of \$171,500.00 over a ten year period.

PART III

The following project lists cover the work completed or contracted during this period:

Capital Improvement Projects

Anacortes, Construction of Armory.....	State	\$ 94,596.00

FINANCE SECTION

During the period of this report, a total of \$2,317,721.03 in Appropriated Funds was expended in support of the organized militia of Washington. Of this amount, \$1,927,423.70 was expended from the General Fund of the State, and the balance of \$390,297.33 came from the Armory Fund.

Forty-four installations were occupied by units and activities of the Washington National Guard, including the on-site positions which are being used by National Guard Nike Battalions. Thirty of the facilities are state owned, and the remainder are leased or occupied under license or use permits from the Federal Government. In addition, the State owns two buildings in the City of Seattle, one of which is unoccupied and the other leased to the city.

The Departments of the Army and the Air Force assist the State of Washington in maintaining certain Army and Air National Guard installations. Service contracts have been arranged whereby the Federal Government reimburses this Department on a 75%-25% basis. 75% of the costs of maintenance, repair and operation of these facilities are paid by the Federal Government, and this Department assumes the 25% portion. These contracts cover installations at Bellingham, Camp Murray, Seattle, Spokane, Gray Field, Vancouver, and certain facilities at Port Orchard, Centralia, Olympia, Seattle, Walla Walla, Yakima and Felts Field in Spokane.

In past reports, the Armory Fund has been referred to as Local Funds, but during this period these funds have been transferred from local banks to the State Treasurer. Funds for the operation of this Department are appropriated by the Legislature from the Armory Fund, based on the estimated receipts to the Fund. Revenue sources of the Armory Fund are Federal Reimbursements, as explained above, proceeds from Armory rentals as authorized by RCW 38.20.010, and interest earnings on deposits. During the period of this report, Federal Reimbursements to the Armory Fund amounted to \$172,584, Armory rental receipts were \$238,435 and interest earnings on deposits was \$7,260. In addition, the State General Fund received Federal Reimbursements of \$22,954.

There is set forth opposite a summary of disbursements from all appropriations and allotments in effect during the period of the report. Additional Federal funds of \$338,429, not included in this summary, were expended for Armory Construction.

SUMMARY OF MAJOR DISBURSEMENTS

Title	General Funds	Armory Funds	Total
Salaries and Wages.....	\$ 734,831.39	\$ 87,420.18	\$ 822,251.57

UNITED STATES PROPERTY AND FISCAL OFFICE

The United States Property and Fiscal Officer is assigned the responsibility of G-4 on the staff of the Adjutant General with the mission to procure, store and distribute to the Washington National Guard such equipment and supplies as are authorized by the Departments of the Army and Air Force, and for which necessary federal funds are provided. Further, he is responsible for obligating, accounting, reporting and financial planning and administrative control of all federally appropriated funds allotted to the State of Washington

for National Guard use. In accomplishing the above mission, he functions as accountable officer to the Federal Government for all federal property, as Class B Agent Officer to U. S. Army Finance and Accounting Officer for payment of troops, as Transportation Officer and as Purchasing and Contracting Officer. In order to accomplish this mission, federally paid employees are provided. Also federally paid employees are provided for the State Maintenance Officer, to individual units of the Army National Guard, for the Air National Guard and for the Air Defense units. As of 30 June 1964, there were 766 employees on the payroll.

Federal funds furnished to the USPFO for support of National Guard units within the state are as follows:

	Army	Sixth Army	Air
Medical Care	\$ 12,900.00	\$ 15,513.00
Field Training	1,562,318.00	534,560.00
Alert Pay and Other Exercises.....	287,496.00
Schools, incl Tvl & Hosp Pay	562,898.00	\$ 6,308.00	172,393.00
Subsistence	277,070.00	36,686.00
Individual Clothing	337,990.00	116,524.00
Organizational Equip	177,635.00	49,964.00
Petroleum Products	176,050.00	1,028,825.00
Operating Supplies & Civ Tvl....	466,388.00	34,010.00	494,520.00
Technicians Pay	6,770,567.00	3,399,753.00
Repair & Util, incl Svc Contract..	133,289.00	246,151.00
Construction	517,505.00	16,378.00
On-Site Expense (Air Defense)..	124,144.00
Total	\$11,118,754.00	\$ 40,318.00	\$6,398,763.00
GRAND TOTAL	\$17,557,835.00		

This represents an increase of \$2,654,183.00 over the past reporting period of 1 July 60—30 June 62.

The United States Property and Fiscal Officer does not account for Federal funds expended for armory drill or unit training assemblies for National Guard troops or for the pay and allowances for Army and Air Force officers and enlisted men assigned to the Guard as advisors. Although exact figures are not available, in order to present a realistic picture of the Federal funds expended in support of the Washington National Guard, the following figures based on reports of drill pay submitted by units of the Washington National Guard and an estimate of the pay of Federal advisors during the period of this report, are submitted as follows:

Armory Drill & Unit Training Assembly Pay.....	\$ 4,042,251.00
Advisors' Pay (Estimated).....	1,162,640.00
Federal funds accounted for by USPFO.....	17,557,835.00

TOTAL FEDERAL FUNDS..... \$22,762,726.00

Effective 1 March 1963 we had a major reorganization of the Army National Guard units. This included the entire Washington part of the 41st Infantry Division which was reorganized to conform with modern Army doctrine. This reorganization resulted in a state-wide redistribution of organizational equipment and due to the many changes involved, proved to be of major proportions.

As a further result of modernization and reorganization, a total of 8 Nike-Ajax Missile sites, manned by National Guard units, were closed and the mission equipment returned to Active Army. Seven sites were released to the Army while one is being used by the 241st Signal Battalion for an armory area. Two new Nike-Hercules sites will be accepted and manned by Army National Guard units in the near future.

Under National Guard Bureau direction and guidance, the USPFO is now compiling and forwarding equipment authorization and asset data of all units of the Washington Army National Guard. This report, prepared in punch card format on IBM equipment, is made upon any change involving reportable equipment. The purpose of this report is to furnish the National Guard Bureau and the Adjutant General immediate information concerning organizational property on hand in comparison to authorizations.

During the period of this report excess property in the amount of \$976,178.90 was reported for disposition. Much of this property resulted from the reorganization and modernization of Army National Guard units.

During the period of this report some of the equipment lost to the Active Army during the Berlin crisis of 1961 was replaced. While most of this equipment was received in "as is" condition, nevertheless we have been able to recondition and issue to alleviate unit shortages. During this period we have also received some new, modern equipment for specific units. The following equipment was received during the report period:

- 40 ea commercial sedans and trucks (new)
- 141 ea 2½ ton trucks
- 107 ea ¾ ton trucks
- 2 ea Shop vans, 2½ ton
- 3 ea Trucks, wreckers
- 5 ea 1200 gallon gasoline trucks
- 18 ea Ammunition trailers (new)
- 1 ea Tank Recovery vehicle (new)
- 5 ea Semi-trailers

At the end of the reporting period the supply section is maintaining approximately 5,425 active stock record cards, including direct exchange and Self-Service Supply Center items. This reflects a small increase from the last reporting period. Increases and decreases occur from time to time as "fringe" items qualify for stockage or items excessed, as appropriate.

FUNDS EXPENDED FOR WASHINGTON NATIONAL GUARD

(1 JUL 62 - 30 JUN 64)

STATE
\$2,317,000

6 MILLION - DRILL PAY
10 " - TECHNICIAN PAY
1 " - ADVISOR PAY
4 " - SUPPLIES
1.7 " - SCHOOLS, CONSTRUCTION
& MISC

I am the Guard

Civilian in Peace, Soldier in War . . . of security and honor, for three centuries I have been the custodian, I am the Guard.

I was with Washington in the dim forests, fought the nily warrior, and watched the dark night bow to the morning. At Concord's bridge, I fired the fateful shot heard 'round the world. I bled on Bunker Hill. My footprints marked the snows at Valley Forge. I pulled a muffled oar on the barge that bridged the icy Delaware. I stood with Washington on the sun-drenched heights of Yorktown. I saw the sword surrendered . . . I am the Guard. I pulled the trigger that loosed the long rifle's havoc at New Orleans. These things I knew—I was there! I saw both sides of the War between the States—I was there! The hill at San Juan felt the fury of my charge. The far plains and mountains of the Philippines echoed to my shout . . . On the Mexican border I stood . . . I am the Guard. The dark forest of the Argonne blazed with my barrage. Chateau Thierry crumbled to my cannonade. Under the arches of victory I marched in legion—I was there! I am the Guard. I boned briefly on the grim Corregidor, then saw the light of liberation shine on the faces of my comrades. Through the jungle and on the beaches, I fought the enemy, beat, battered and broke him. I raised our banner to the serene air on Okinawa—I scrambled over Normandy's beaches—I was there! . . . I am the Guard. Across the 38th Parallel I made my stand. I flew MIG Alley—I was there! . . . I am the Guard.

Soldier in war, civilian in peace . . . I am the Guard.

I was at Johnstown, where the raging waters boomed down the valley. I cradled the crying child in my arms and saw the terror leave her eyes. I moved through smoke and flame at Texas City. The stricken knew the comfort of my skill. I dropped the food that fed the starving beast on the frozen fields of the west and through the towering drifts I ploughed to rescue the marooned. I have faced forward to the tornado, the typhoon, and the horror of the hurricane and flood—these things I know—I was there! . . . I am the Guard. I have brought a more abundant, a fuller, a finer life to our youth. Wherever a strong arm and valiant spirit must defend the Nation, in peace or war, wherever a child cries, or a woman weeps in time of disaster, there I stand . . . I am the Guard. For three centuries a soldier in war, a civilian in peace—of security and honor, I am the custodian, now and forever . . . I am the Guard.
