MILITARY DEPARTMENT
Office of the Adjutant General
Tacoma, Washington 98430**

31 October 1966

The Honorable Daniel J. Evans
Governor of the State of Washington
Olympia, Washington 98501

Dear Governor Evans:

In compliance with Paragraph 1, Section 38.12.020 of the Military Code of the State of Washington, this Biennial Report of the activities of the Military Department is transmitted.

This report is for the period 1 July 1964 through 30 June 1966.

Respectfully submitted,

HOWARD S. MCGEE
Major General
The Adjutant General

Preface

THE NATIONAL GUARD

ORGANIZATION AND MISSION

The "Organized Militia" is the general term including both State and National Guard, authorized under the provisions of Title 38, RCW.

The "National Guard" is that part of the military force of the State that is organized, equipped, and federally recognized under the provisions of the National Defense Act of the United States. The "State Guard" is organized under State authority only.

The National Guard is maintained by the State, with Federal advice and financial aid in such strength of officers and enlisted men as authorized by the Federal Government and approved by the Governor.

The State Guard is maintained in such organizations and numbers as authorized by the Governor. It exists now as a Cadre only.

The State Mission of the National Guard is to provide sufficient organizations so trained and equipped as to enable them to function efficiently at existing strength in the protection of life and property and the preservation of peace, order, and public safety under competent orders of the State authorities.

The Federal Mission of the National Guard of the United States is to provide units of the Reserve components for the Army and Air Force, adequately organized, trained, and equipped, available for mobilization in the event of National emergency or war.

The mission of the State Guard is to replace the National Guard while in Active Federal Service.

The primary role of the Military Department is overall supervision, administration and housing of National Guard units and personnel. This is accomplished through a combination State and Federal system of employees and facilities.

Commander-in-Chief: The Governor is the Commander-in-Chief of the Washington National Guard.

The Adjutant General: The Adjutant General is responsible for the administration of National Guard affairs as prescribed in Section 38.12.020 of the Revised Code of Washington.

The Assistant Adjutant General, Army Division: Supervises and coordinates all matters pertaining to Army National Guard units and also functions as Deputy Adjutant General.

The Assistant Adjutant General, Air Division: Supervises and coordinates all matters pertaining to Air National Guard units.

Federal Advisors: The United States Army and the United States Air Force detail officers and enlisted men to duty with the Washington National Guard as advisors for instructional purposes. These individuals are a part of the Army or Air Force command and are not subject to orders of State authorities. Their primary mission is to advise and assist in the training of National Guard units.

Army Advisors: The United States Army Advisor Group (NGUS), Washington, is headed by the Senior Army Advisor with station at Camp Murray. The Army Advisor Group is composed of 12 officer advisors and 23 sergeant advisors who are stationed in 11 localities throughout the State with units of the Washington National Guard.

Due to personnel shortage, Department of the Army has reduced the overall authorization to 12 officer advisors and 24 sergeant advisors.

Air Advisors: The Air Advisor Group is headed by the Senior Air Advisor with station at Spokane, Washington. This group is composed of 6 officer advisors and 10 sergeant advisors who are stationed in Spokane, Seattle and Bellingham with units of the Washington Air National Guard.

PERSONNEL

Personnel engaged in the various activities of the Military Department and the Washington National Guard, paid from State funds, are listed below:

Title	Authorized Positions
The Adjutant General.....	1
Assistant Adjutant General for Army.....	1
Assistant Adjutant General for Air.....	1

Gardener	1
Assistant Gardener	1
Plant Manager	1
Station Engineer	2
Trades Helper	2
Watchman	2
 Total authorized positions—State.....	 87

*Includes 17 part-time Caretakers.

FEDERAL TECHNICIAN PROGRAM

Personnel engaged in training and logistical activities of the Military Department and the Washington Army and Air National Guard are Federally recognized members of the units employed to assist the commanders in the day to day training and administrative responsibilities.

The basic authority for the National Guard Technician Program is Section 709, Title 32, United States Code. Technicians are paid from Federal funds. The Secretary of the Army and the Secretary of the Air Force have delegated to the Chief, National Guard Bureau, authority to administer the Technician Program and to regulate the maximum rates of compensation of all technicians and temporary employees.

The State Adjutant General is responsible for implementing and administering the Technician Program authorized for the state by the Chief of the National Guard Bureau.

Significant events affecting the Technician Program during this period included:

The National Guard Bureau authorized the implementation of the Military Support of Civil Defense Section consisting of five (5) technicians to plan and coordinate military resources available for supporting the civil defense mission.

The Army National Guard published a regulation in May 1965 establishing a personnel proficiency rating and a career incentive program.

Legislation which would establish a Federal retirement system for National Guard Technicians was presented to the Congress of the United States. The proposed legislation did not pass the Congress during this period.

The National Guard Bureau supported the following technician positions with man days and funds during the period.

Army National Guard:	Training	131
	Maintenance	161

BRIGADIER GENERAL LYLE E. BUCHANAN
Assistant Adjutant General, Army

Section I

ARMY NATIONAL GUARD

MILITARY PERSONNEL SECTION

Part I

General Functions

The Military Personnel Section is charged with the responsibility for the planning and coordination of those functions which pertain to the management of the Army National Guardsman as individuals. Primary staff responsibilities include the development, issue and enforcement of personnel policies and procedures required by applicable laws, regulations, directives, etc.; the handling of incoming correspondence from, and the maintenance of necessary liaison with, other governmental agencies. It's operations are in accordance with approved policies, the State Military Code, National Guard Regulations, and pertinent Army Regulations.

PART II

Detailed Summary

Officer Personnel: Statistical data on the personnel actions handled during the reporting period by this subsection is indicated on the chart entitled "Officer Personnel Strength". In addition to such common functions as recruiting, maintenance of individual personnel records, issue of General and Special Orders, and preparation of periodic statistical reports, the daily activities its sub-sections are concerned with are:

- Appointment, promotion, assignment, separation and retirement of commissioned and warrant officers
- Processing annual and special officer efficiency reports
- Processing reports of physical examination
- Monitoring technical waivers granted by Federal recognition boards
- Processing applications for voluntary recall to extended Active Duty
- Issue and control of identification cards to officers and key enlisted men
- Monitoring uniform allowance program
- Processing claims and line of duty investigations
- Assisting in preparation and submission of requests for placement on Army of the United States retired list
- Monitoring attritive provisions of Reserve Officer Personnel Act of 1954 insofar as they affect commissioned officers of the WashARNG

Enlisted Personnel: Statistical data on the personnel actions handled during the period by this subsection is indicated on the chart entitled "Enlisted Personnel Strength". Other important functions performed include:

- Monitoring and controlling the administering of tests required by the US Army Enlisted Evaluation System as it pertains to enlisted men in pay grade E-4 and above

- Maintenance of personnel files and status cards for each individual
- Processing morning reports and periodic strength reports
- Preparation of statements of service in response to requests received from units, individuals and other government agencies
- Processing certifications for priority induction
- Monitoring Ready Reserve obligations and retirement credits
- Reviewing and filing periodic physical examinations

Programmed Strength

The personnel trends of the Washington Army National Guard have been as indicated in the following recapitulation showing a net gain of 2 officers, a net gain of 4 warrant officers and a net gain of 1,225 enlisted men during the reporting period.

	Officer	Warrant Officer	Enlisted Men	Aggregate
1 July 1964.....	499	105	4,946	5,550
30 June 1965.....	497	108	4,756	5,361
30 June 1966.....	501	109	6,171	6,781

Authorized strength of the Washington Army National Guard as of 30 June 1966 is—6761

Selected Reserve Forces Program

On 15 November 1965, 14 selected company-size units of the Washington Army National Guard was reorganized under the "Selected Reserve Forces" concept. Briefly stated, the Selected Reserve Force is composed of units, designated by Department of The Army, ready for almost instantaneous mobilization into Federal Service. These units are maintained at 100% of full authorized (war) strength and equipped at a comparable level. Personnel, equipment, supply levels and administrative processing is maintained in such a manner as to allow mobilization into Federal service with a very minimum of advance notice.

Implementation of the Selected Reserve Force program, with a very minimum increase in the overall authorized strength of the WashARNG, has required substantial transfers of trained personnel, both Officer and Enlisted, from the other units within the State. Replacement of the transferred personnel has been accomplished by recruiting largely "non-prior service" enlisted men into the WashARNG. To date 1,391 of these "non-prior service" enlisted men have not departed for their required Active Duty for Training.

Administrative Services

The sub-section provides the following services: Mail, message center, teletype, PBX, central files and reproduction and distribution of all publications. In addition the Chief of this sub-section serves as the Archivist; monitors the awards program; and processes all surveys and quarterly reports of droppage for the Installation Commander. He is also responsible for the coordination of the microfilm program started during this reporting period. Microfilming of required personnel records has been completed and a program of microfilming of Financial records, and other records requiring 10 years or more retention, has begun.

During this period Volume VII of the official history of the Washington National Guard was completed and distributed. With the completion of Volume VII the official history is now up-to-date.

OPERATIONS AND TRAINING SECTION

PART I

General Responsibilities and Functions Assigned to Section

The Military Operations and Training Section prepares the plans for the organization and utilization of the State Military Forces in the event of disaster, civil disturbances, or National Defense, either separately or in conjunction with Federal Military Forces. This Section is responsible for periodic evaluation reports, troop movements, mobilization, and coordination of all State Military Forces. All matters affecting Organization and Training, including procurement and distribution of training aids and implementation of Training Programs, policies and directives, is supervised by the Operations and Training Section. It controls the Federal Funds allocated for Army Service Schools and other military activities of individual guardsmen; in this connection, applicants for these Service Schools, to include the six months Recruit Trainees, are processed through this Section. In addition, this Section controls and coordinates the Army Extension Course Program and is responsible for all matters incidental to State Security of classified information and material. Applications for Personnel Security Clearances are screened and processed through this Section and records maintained.

PART II

Resident Instruction

During this reporting period 795 officers and 421 enlisted personnel attended a military course at a United States Army Service School, Army Area School, or served varied periods of Active Duty for Training in a military status.

Personnel attending Resident courses and short tours are placed on official orders and receive the same pay, allowances, and benefits as Active Army personnel.

Prospective students are selected by commanders concerned as the best qualified and only after all published prerequisites are met. Quotas for attendance of ARNG personnel at service schools are issued by the Chief, National Guard Bureau based on spaces and funds available.

Successful completion of a course at one of the United States Army Service Schools provides the educational requirement for officer promotion and military occupational specialty (MOS) qualification. Similarly, enlisted personnel attend service school courses to qualify for commission appointment or MOS qualification and proficiency.

Following is a resume of service schools and special tours attended by Washington Army National Guard Personnel during the Fiscal Year 1965-1966 period:

US Army Service Schools

	FY 1965		FY 1966		Total

RESERVE COMPONENT ENLISTED TRAINING PROGRAM (REP-63)

The REP-63 program directs that all non-prior service personnel enlisting in the Army National Guard must successfully complete an initial period of active duty for training in a Federal status. The period of enlistment and Ready Reserve military obligation is six years.

The program authorizes a variable period of initial active duty for training of not less than four months depending on the time required to properly qualify the trainee in the desired military occupational specialty (MOS). The active duty period consists of two weeks in-and-out processing; eight weeks basic combat training; leave; and the time required for MOS training. The average active duty time is five months.

At the closing date of this report there was an approximate backlog of 1,400 trainees awaiting input quotas from higher headquarters. REP-63 input for this period is indicated as follows:

FY 1965	FY 1966	TOTAL
1,044	1,072	2,116

ARMY EXTENSION COURSE PROGRAM

The Army Extension Course Program provides Army Service School instruction to Army National Guard officers and enlisted men through correspondence study. All texts, manuals, and necessary equipment are furnished the student on a loan basis at no cost to the individual.

Each course curriculum will parallel as closely as possible a corresponding resident course of instruction.

This program permits officers enrolled in career courses to complete up to 50% of the course by examination, by-passing many hours of lessons leading up to the examination. Other advances permit officers enrolled in career courses to select a course offering a combination of extension instruction and resident phases at the service school.

Time required to complete an extension course varies from the 572 credit hours required for the Command and General Staff College Extension Course

to the 20 credit hours Non-Commissioned Officers Leadership and Career Development Course. Individuals may enroll in an entire course or one subcourse, depending upon the training requirement.

Since the last biennial report the program has increased 35%. The number of individuals enrolled in extension courses at the end of this reporting period are indicated as follows:

	OFF	EM	TOTAL
Adjutant General School.....	15	37	52
Air Defense	11	34	45
Armor School	6	2	8

ANNUAL GENERAL INSPECTIONS

All Army National Guard units are required to be inspected annually by a representative of the Commanding General, Sixth United States Army. Results of inspections for period covered by this report are as follows:

YEAR	Superior	Excellent	Satisfactory	Unsatisfactory
1965	7	54	9	0
1966	10	49	12	0

DISASTER AND CIVIL DISTURBANCE OPERATIONS

1. 1 December 1964.

Four Washington National Guardsmen were ordered to State active duty and dispatched from Camp Murray to Snohomish County. They operated two amphibious vehicles (DUKW) to support the Corps of Engineers and the State Director of Civil Defense during a period of extremely high water in the Snohomish River valley. During the months of December 1964 and January 1965 National Guard technicians were required to operate these amphibians at various times in this area because of the continuous flooding. The missions assigned during this period included evacuation of citizens living in the flooded area, damage survey, and emergency standby. The Snohomish County flood operation required over forty (40) National Guard man-days.

2. 3 December 1964.

Ten National Guardsmen were ordered to State active duty as a crew for the Floating Maintenance vessel. This vessel was towed to Friday Harbor, San Juan Island. Upon arrival at Friday Harbor, electrical generators on the maintenance vessel were put into operation to provide power to the residents of the island while a broken underwater electrical cable from the mainland was being repaired. These ten Guardsmen with their equipment supported this operation for fifteen days.

3. 1 January 1965.

Headquarters and Service Battery 1st Howitzer Battalion 248th Artillery was alerted for possible duty in the Aberdeen area during a period of extremely high water. Technicians were prepared to make 2½-ton and amphibious trucks available for emergency evacuation of the residential areas. The units involved were issued 2,000 sand bags that were also made available to the City of Aberdeen. These alerted units were not ordered to State active duty, however, volunteer guardsmen evacuated the patients of a hospital that was in danger of being inundated by the flood waters.

4. 4 September 1965.

Four National Guardsmen were ordered to State active duty to support the Washington State Patrol with two 2½-ton trucks in the Long Beach, Wash. area. During this operation "Bay Guard" all units of the Washington National Guard in the western half of the State were alerted for possible employment in a civil disturbance role. Disturbance at various beaches in the Puget Sound area and ocean beaches were anticipated by the State Law enforcement agencies. The National Guard units were alerted to support these

agencies when required. Other than liaison officers and technicians, personnel of the alerted units were not committed during this Labor Day weekend of 4-5 September 1965.

ORGANIZATIONAL ACTIVITIES

During the past biennial period the Washington Army National Guard was reorganized to meet the Department of Defense requirements. Three battalion size organizations and two company size units were designated as a part of the Nation's 150,000 man Selected Reserve Force (SRF). These units are required to maintain a greatly increased readiness posture. They are authorized 100% equipment and personnel, and additional training assemblies.

Emphasis is currently being given to the Department of Army Program of Improved Readiness for Selected Reserve Force. The fundamental purpose of this program is to improve operational readiness of Army National Guard units designated for this Force to permit them to move to mobilization stations after a seven day alert. To accomplish the program, SRF units have been brought to 100% strength, authorized 100% equipment, and required to increase drills at least 50%.

The State of Washington was authorized 14 units with a total of 2,585 men for this program on 1 November 1965. To date we have met all objectives set by the Department of Army and are continuing to maintain them in addition to the requirements of other units and our operational missions.

The following Troop List became effective 15 November 1965 showing strength as of 30 June 66:

SECURITY PROGRAM

The Department of the Army prescribes policy and procedures for issuing, storing, and destruction of classified defense information and material furnished this State. Through its agencies, the Department of the Army is also the final authority concerning the granting, denial, or revocation of security clearances for all WashARNG personnel.

It is the State's responsibility to insure that classified information and material issued is safeguarded and controlled at all times; that this information and material is disseminated only to personnel who have been cleared for access to such material and then only on a need-to-know basis.

In the discharge of his responsibilities, the Adjutant General continually reviews control methods, classified files, and personnel records to insure compliance with higher headquarters regulations.

Recent changes in personnel security directives requires the upgrading of security clearances for numerous positions and key-personnel. In addition, all officer and enlisted personnel assigned to the Selected Reserve Force (SRF) units must have a minimum clearance of Secret. During this reporting period 1,967 requests for security clearance have been processed. At the close of the reporting period 4,175 officers, enlisted men, and civilian employees are currently cleared for access to classified information and material.

SUMMER PREPARATION—Members of the 144th Transportation Battalion, only seagoing outfit in the entire National Guard, prepare the ships for two weeks' annual field training on Hood Canal and Puget Sound. The unit is based in Tacoma, but has many members from the Seattle-to-Olympia area.

WASHINGTON NATIONAL GUARD RIFLE TEAM

The Washington National Guard entered a rifle team in the National Rifle Matches at Camp Perry, Ohio during both years of the 1964-66 biennium. Each year the team was selected from those individuals achieving the highest scores in the NBPRP Match at either the Sixth U.S. Army or North Pacific States Regional Matches conducted at Fort Lewis, Washington prior to the National Matches.

During the 1964 National Matches, First Lieutenant Alyer R. Hudlow placed in the National Individual to win six credit points toward his distinguished rating and a six-man team, consisting of Captain John R. Easley, 1st Lieutenant Vincent D. Aguirre, 1st Lieutenant Alyer R. Hudlow, Master Sergeant Loren E. Gregory, Staff Sergeant Wilburt R. Kroner and Staff Sergeant John E. Ogden, placed 28th in the National Trophy Team Match among forty National Guard teams with a score of 1410V74. The team was captained by Colonel Paul C. James and coached by Staff Sergeant John E. Ogden.

During the 1965 National Matches a six-man team, consisting of Captain John R. Easley, Captain Richard T. Borneman, 1st Lieutenant Vincent D. Aguirre, 1st Lieutenant Alyer R. Hudlow, Staff Sergeant John E. Ogden and Sergeant Charles R. Lawrence, placed thirteenth among forty-one National Guard Teams in the National Trophy Team Match with a score of 1391V77. The team was captained by Colonel Paul C. James and coached by Captain John R. Easley. No member of the team placed in the National Trophy Individual Match.

WASHINGTON NATIONAL GUARD PISTOL TEAM

Equipment and ammunition furnished by Federal Government, entire fees for pistol matches furnished by State of Washington.

The Washington National Guard Pistol Team entered the following matches during the periods indicated:

- 1965: 20 men shooting in Mount Rainier Pistol League.
- 20-21Feb65 —12 man team entered Tenth United States Corps pistol match, Fort Lewis, Washington
 - 27Feb65 —18 Man Team Pistol Match, Ft Lewis, Washington
 - 2Mar65 —12 Man Team Paul Bunyon Pistol Match, Puyallup, Washington
 - 31Mar65 —10 Man Team Sixth Army Championship, Ft Ord, California
 - 27Apr65 —11 Man Team Paul Bunyon Pistol Match, Puyallup, Washington
 - 13May-8Jul65 — 9 Man Team Tacoma Police Athletic Association, Tacoma, Wash.
 - 26-27June65 — 9 Man Team North Pacific Regional Championship Team, Tacoma, Wash.
 - 29Jul-7Aug65 — 8 Man Team National Matches, Camp Perry, Ohio
 - 19th Place in National Grand Competition
 - 1 Man sent to Ft Ord for 5 days to study pistol repair
 - 1 Man sent to Ft Ord pistol coaches clinic
 - 20 shooters entered the Chief, National Guard Bureau Pistol Match

1966: 28 men shooting Washington National Guard Indoor Pistol League

9Apr66 —18 man team pistol match, Ft Lewis, Wash.

24Apr66 —12 man team Kitsap Rifle & Revolver Club pistol match, Bremerton, Wash.

30Apr66 — 8 man team pistol match, Kenmore, Wash.

5May-30Jun66—11 man team Tacoma Police Athletic Association Pistol Match, Tacoma, Wash.

22May66 — 3 man team Paul Buyon Pistol Match, Puyallup, Wash.

21-22May66 — 6 man team Pasco Rifle and Revolver Club Pistol Match, Pasco, Wash.

25Jun66 —14 man team Regional Pistol Match, Seattle, Wash.

16Jul66 — 7 man team Custer Pistol Matches, Custer, Wash.

28Jul-5Aug66 8 man team National Matches, Camp Perry, Ohio

3-8Aug66 —Placed 7th in National Guard Competition
1 man sent to Ft. Ord coaches clinic
40 shooters entered the Chief, National Guard Bureau's pistol match

WASHINGTON MILITARY ACADEMY

The Washington Military Academy was established and became an accredited Officer Candidate School on 15 February 1957. It is the first Resident Officer School for the Washington Army National Guard ever established. Its inception was brought about by the National Guard Bureau planning to eliminate extension course training to qualify future officers. It was felt that a more stringent and aggressive training program was needed in each State. This could be accomplished by organizing a Resident School Program. Thereby the Washington Military Academy became a reality.

The program of instruction totals approximately 450 hours of training conducted during two Annual Field Training periods and twelve two-day weekend assemblies spaced throughout the year. The course is divided between academic subjects and leadership training. Strong emphasis is placed on the leadership phase to develop this most essential quality in future officers. Lack of leadership training and evaluation was the most serious defect in the former pre-commissioned extension course program. The Academy course is presented in three phases set down by the United States Army Infantry School at Fort Benning, Georgia. Breakdown of instruction is as follows:

- PHASE I: Military Leadership
Map and Aerial Photograph Reading
Weapons
Drill & Command, Conduct of Physical Training
- PHASE II: Division Organization
Methods of Instruction
Administration and Logistics
Military Law
Signal Communications
Intelligence, Platoon Estimates & Orders
Counterinsurgency, Basic Medical Subjects
Motor Vehicle Operations and Maintenance
Associate Arms
- PHASE III: Small Unit Tactics

To date of this report eight classes have completed the Academy with graduates totaling 344. Of the graduating cadets twelve have been United States Army Reserve personnel. USAR personnel were accepted starting with class number 8 under a new expanded program allowing the Army Reserve to gain an additional source of company grade officers. Class number 9 will graduate 65 cadets on 23 July 1966, 10 of which are USAR personnel. Class number 10 will start its Phase I of the programmed instruction on 9 July 1966 and complete Phase III during the summer of 1967.

Although not programmed during the last biennium report, the Washington Military Academy established by authority of the Adjutant General, State of Washington on 1 January 1966, a non-commissioned officers course. The objectives of the course are to develop within the non-commissioned officer or the potential non-commissioned officer, those principles of sound leadership, professional knowledge and pride in personal appearance which will enable him to become a competent leader capable of performing the duties of a non-commissioned officer in the Washington National Guard. The course will also be an aid in developing young men who desire to attend the Officer Candidate School and become commissioned officers.

The Washington Military Academy goal is an output of 75 graduating cadets and approximately 200 graduating Non-Commissioned Officers each year.

WASHINGTON STATE GUARD RESERVE

The primary mission of the Washington State Guard Reserve is to provide a cadre of officers capable of organizing and training a State militia for use in time of National or State emergency and in the event of partial or complete Federal induction of the National Guard.

The Washington State Guard Reserve was activated by Executive Order on 19 May 1960. Present strength is 159 officers, many of whom were former Washington National Guard or other military service personnel. All personnel serve without pay. Units drill twice a month at local armories as indicated below. Training is conducted from a Training Guide published by this headquarters and consists of instruction in military police work and general military subjects. A two-day exercise or seminar is held at least once during each training year at Camp Murray where all WSGR units and personnel participate.

In addition to the above, a Civil Defense Liaison Section, organized within Headquarters and Headquarters Detachment, WSGR, is assigned the responsibility for operation of the Civil Defense State Government Relocation (RELO) Centers located at Fort Columbia and Fort Hayden. To provide immediate control of the RELO site in the event of an emergency, each site is assigned a Civil Defense Detachment of ten officers. These detachments, under the command of the Civil Defense Liaison Section, are charged with (1) assisting State Civil Defense in development of RELO sites, (2) in the event of an emergency, will assume control of the site making it operational for State Government, and (3) establishing internal security.

Organizations of the Washington State Guard Reserve, together with location and unit strength, are listed as follows:

UNIT	Location	Strength
Hq Detachment, WSGR.....	Camp Murray	51
Civil Defense Liaison Section.....	Camp Murray	(5)

TOTAL (as of 30 June 1966).....		159

AIR DEFENSE SECTION

PART I

It is the responsibility of this section to administer and supervise the Air Defense Program, known as BP 3720, for the Adjutant General. The program, at the beginning of this biennium, supported a total of 195 Army National Guard technicians to man and operate two Nike-Hercules Missile Sites in the Seattle sector of the North American Air Defense System. At the present time the program supports 196 ARNG technicians to man two Nike-Hercules sites—one at Redmond and the other near Burton on Vashon Island.

The duties of the section include program funding management, supervision and perpetual liaison with agencies of the United States Army Air Defense Command, such as Headquarters 6th Region and Headquarters 49th Artillery Group. During the biennium this program has brought into the State the sum of \$2,714,340.00 in federal funds for salaries, supplies and other services.

PART II

At the beginning of the biennium the goals established were centered on improved operational readiness with the Nike-Hercules system and reorganization and retraining incident to the operation of the Nike-Hercules system. The specific goals established for the improvement of operational readiness were attainment of a one-hundred percent record on Operational Readiness Evaluations (ORE) and attainment of ARADCOM honor roll records on service practice firings and awards of the "E", Excellence in Combat Proficiency, Award for FY 1966.

A target date of 9 October 1964 was established for completion of reorganization and retraining of units to fit them for take-over of the two Nike-Hercules Sites. Organization and training was accomplished accordingly and the two sites mentioned above were taken over from the Active Army as programmed.

PART III

As to the goals established for improvement of Operational Readiness, the following results of ORE's and service practice firings are tabulated:

Operational Readiness Evaluation:

UNIT	Nr of Eval	Operational	Non-Operational
Battery A-2/205	17	16	1
Battery B-2/205	16	15	1

Service Practice Scores:

Battery A-2/205	95.7%	(honor roll)	(Highest Scoring Army NG)
Battery B-2/205	95.2%	(honor roll)	Nike-Hercules Battalion in
Battery A-2/205	SAT	("E" Award)	CONUS)
Battery B-2/205	SAT	("E Award)	

On 3 March 1964 our Nike-Ajax Sites were phased out and the battalion was reorganized as a Nike-Hercules battalion with batteries A and B. At the same time the number of air defense technicians was reduced to 195 and the structure tailored to meet the manning requirements of the Hercules Missile Sites at Redmond and Burton. As a result of the most recent reorganization, approximately one-half of the technicians retained had to be reduced in military grade. The goals established for the biennium have been attained.

STATE MAINTENANCE SECTION

PART I

General Functions

The State Maintenance Section under the direction of the State Maintenance Officer operates repair and maintenance facilities for all Federal equipment issued to the Washington Army National Guard. The mission of maintaining Army National Guard equipment is accomplished by a combined support maintenance shop, a field training equipment concentration site, an Army Aviation maintenance shop, and nineteen organizational maintenance shops.

The equipment maintained includes over 2,000 wheeled and tracked vehicles of all types ranging from jeeps to tanks and approximately 150 pieces of artillery from 76mm guns mounted on M 41 light tanks to 8-inch towed howitzers. There are also approximately 8,000 small arms of all types, 2,000 pieces of signal equipment, and over 1,100 fire control instruments. Numerous miscellaneous items, such as tarpaulins for military vehicles and field ranges, are repaired by the Maintenance Section. This Section is also responsible for maintaining a fleet of marine equipment consisting of two harbor tugs, six landing craft, a freight supply ship, two passenger and cargo vessels, two barges, one patrol boat, and a two-hundred ten foot floating craft depot maintenance barge.

PART II

Detailed Summary

The combined support maintenance shop is responsible for performing repairs necessary to Army National Guard equipment, with the exception of Army aircraft. It also provides maintenance specialists on an on-call basis

to all units throughout the State for the purpose of repairing equipment. This system of sending contact teams to the unit is very often more economical than evacuating equipment to Camp Murray for repairs. Command maintenance management inspections, previously performed by a team from Headquarters Sixth U.S. Army are now the responsibility of the Army National Guard. These command maintenance inspections are accomplished by a team from the combined support maintenance shop. This important function gives a good indication of the maintenance operational readiness of all military equipment in the hands of Army National Guard units.

The field training equipment concentration site, located at Camp Murray, receives and maintains heavy items of equipment such as special purpose vehicles, graders, tractors, tanks, and artillery material of all types. The equipment maintained at this site is usually items that are not required for use at the unit Armory during the training year, but are required for annual active duty.

The Army Aviation Maintenance Section is responsible for maintenance of all Army aircraft. At the close of this biennium there were seven light aircraft and ten helicopters within the Washington Army National Guard. A supervisor, who is a rated pilot, and aircraft maintenance technicians perform the required maintenance on all Army aircraft.

The organizational maintenance shops located throughout the State perform all organizational maintenance beyond the capabilities of the using unit. These shops are designed to service the equipment of a Battalion sized unit. They have the responsibility of maintaining administrative storage compounds for unit vehicles and material not required for training. The technicians who operate these shops are also used to evacuate equipment to the combined support maintenance shop when the maintenance requirement is beyond their capability.

Maintenance of National Guard equipment is a full time project with the ultimate goal of having equipment in a safe operating condition at all times. Equipment is scheduled for repair over a full year. All equipment is maintained in accordance with directives published by the Departments of the Army and Air Force.

During the period of this report the following items were processed through the combined support maintenance shop:

Vehicles	3,276
Artillery	850
Small Arms	2,753
Instrument & Fire Control.....	514
Signal	2,650
Engineer	176
Quartermaster	281
Miscellaneous	25,589

These repairs ranged from minor projects to complete rebuild of equipment evacuated to the combined support maintenance shop. During the period of this report a considerable amount of wheeled vehicles were received in 'as is' condition from the Active Army. This equipment, which was generated as a result of the Active Army receiving newer equipment, was processed through the combined support maintenance shop and after being placed in serviceable condition, was issued to Washington Army National Guard units.

Location of Support Maintenance Shop:

Combined Support Maintenance Shop—Camp Murray
 Field Training Equipment Concentration Site—Camp Murray
 Army Aviation Maintenance Shop—Gray Field, Fort Lewis

Location of Organizational Maintenance Shops:

Camp Murray (2)	Centralia	Snohomish
Seattle (4)	Yakima	Bellingham
Olympia	Walla Walla	Midway
Vancouver	Spokane	Redmond
Aberdeen	Port Orchard	Tacoma

Section II

AIR NATIONAL GUARD

PART I

General Functions

The Air National Guard's prime objective is the development and maintenance of a trained and ready reserve force orientated to meet the requirements of the Air Force gaining commands in the event such units are called upon in a National emergency or called by the State in the event of a local emergency or disaster.

The general responsibility of the Air Division of the State Military Department is to insure that required training is accomplished and is directed towards the ultimate objective—a trained, ready, effective augmentation reserve force. In conjunction with this general responsibility, the Air Division must insure that the resources, equipment, supplies, funds, facilities, and personnel are utilized and managed in the most effective manner and that their use is mission orientated. To insure that these resources are utilized effectively, functional responsibilities have been established within the Air Division in the areas of Personnel and Material, Plans and Operations, Legal, Public Information, and Inspection. Only the first two functional areas are manned on a daily basis.

PART II

Personnel and Material

The Personnel function is charged with the responsibility for planning and coordinating those activities which pertain to the management of personnel resources. Primary staff responsibilities include development, issue, and enforcement of personnel policies and procedures required by applicable laws, regulations, and directives.

In addition to the above responsibilities and such standard functions as maintenance of individual Officer Command Selection Records and Master Records, Airman Master Records, preparation of statistical data and reports, and daily functions of this section are:

a. Appointment, promotion, assignment, separation and retirement of Officers and Airmen.

- b. Processing of annual and special officer effectiveness reports.
- c. Processing reports of physical examination and approval of waivers within authorized limitations.
- d. Processing Line of Duty determinations.
- e. Monitoring of testing programs conducted by units.
- f. Preparation of statements of service in response to individual, unit, and governmental agency request.
- g. Monitoring Reserve obligations and retirement credits.
- h. Processing request for 45-day tours of Active Duty or priority induction.
- i. Maintenance of publication files including Air National Guard Regulations, Air Force Regulations, Air Force Manuals; Air National Guard, Air Defense Command, Military Airlift Command, Air Force Logistics Command, Air Force Communications Service gaining command directives.

The desired goal of 100% manning for all units has not been attained. This situation is due to the restrictions placed on recruiting and paid drill spaces by the National Guard Bureau by direction of the Department of Defense. Due to these restrictions and personnel turnover, a 100% operational readiness rating for all units is not possible. All units, however, have continued to reflect increases in their readiness rates as a result of continued emphasis of on-the-job training programs and utilization of available Air Force Technical School training programs.

Statistical data pertaining to the personnel program is reflected in the following pages.

The Material function is charged with the responsibility for monitoring the supply management, supply services, transportation, procurement management, and logistical activities of the Air National Guard. In addition to the above responsibilities, this function reviews and processes all Reports of Survey, acts on requirements for the authorization of additional equipment or equipment declared surplus to the needs of the Air National Guard.

Plans and Operations

This function formulates operations policies and programs; coordinates operations and training matters with appropriate staff activities; supervises operations and training activities; and advises the Adjutant General on the status of operations programs and effectiveness of Units of the Air National Guard of the State.

These activities include program formulation, policy planning, training, and direction and performance of combat and operations activities, including supervisory responsibility for flights, squadrons, groups, and wings, involving flying training and the tactical employment of aircraft; safety inspection, accident and incident investigation, conducting safety surveys and studies, and the promotion of safety consciousness among military and civilian personnel; immediate supervisory and technical responsibility for construction, installation, operation, and maintenance of communications and electronics systems and equipment; production, management, quality control, inspection and directions of aircraft maintenance activities including immediate supervisory and technical responsibilities for the removal, installation, modifica-

tion, overhaul repair and storage of aircraft equipment; staff supervision of technical responsibilities for installation, maintenance, modification, and repair of air launch missile propulsion systems, aerospace munitions release, launch, suspension and monitor systems; immediate supervision and technical responsibility pertinent to the air police and security field; operational technical responsibility for construction, camouflage, fire prevention, and aircraft crash rescue activities.

During the last reporting period the 142d Air Defense Wing and the 141 Fighter Group successfully effected transition from the F89J to the F-102A all-weather interceptor. The ease and efficiency of this changeover is reflected by the National Air Force Flying Safety Award presented to the 141 Fighter Group in 1965. The period for judging covered the time the unit was transitioning to the new, more highly sophisticated aircraft.

The 142 Air Defense Wing received a C-54 aircraft to replace the older C-47 transport aircraft. Pilots and crew members are rapidly completing the required flights to insure that all qualified members become proficient in the new aircraft.

TROPHIES AND AWARDS TO UNITS

Adjutants General Trophy:

1965.....	116th Fighter Interceptor Squadron
1966.....	262 Communications Squadron

Air Force Flying Safety Award:

Strength as of 1 July 1964	198
Gains FY 65 and FY 66	
From Air Force Reserve	14
From ANG—Other States	4
From Army Reserve	1
From ANG Airman Status	10
From Civilian Status	2
Total Gains	31
Losses FY 65 and FY 66	
To Air Force Reserve Personnel Center	45
To Retired Reserve Section (ARPC)	4
To ANG—Other States	15
Deceased	1
Total Losses	65
Net loss during reporting period	34
Assigned Strength as of 30 June 1966	164

Comment: With the reorganization of the 142nd Air Defense Wing and the 141st Fighter Group on 1 July 1965 the authorized and programmed officer strengths were substantially reduced. These actions were the result of the change in aircraft from the two (2) place F-89J to the single position F-102. The majority of the officers assigned to the positions deleted from the manning documents were reassigned to positions where their aero rating was not required. During the past year, attrition has decreased the assigned strength to a number closer to the 149 drill pay spaces programmed by the National Guard Bureau.

AIR NATIONAL GUARD
AIRMEN PERSONNEL TRANSACTIONS

Strength as of 1 July 1964	1,278
Gains FY 65 and FY 66	
Non-Prior Service Personnel	231
Prior Service Personnel	315
Total Gains	546
Losses FY 65 and FY 66	
Expiration Term of Service	331
Resignation—Own Convenience	49
Transfer to Air Force Reserve	4
To enlist in Regular Forces	4
Physical Disability	3
Deceased	2
Failure to perform satisfactorily	12
Removal from State	92
Total losses	497
Net Gain during reporting period	49
Assigned Strength as of 30 June 1966	1,327

Comment: The authorized airman strength reflected on the organizational manning documents is 1,745. Due to funding limitations, the National Guard Bureau has found it necessary to place limitations on the number of personnel a unit may assign. This limitation, commonly referred to as programmed strength, is approximately eighty percent of that authorized. The programmed airman strength for the Washington Air National Guard is 1,394. The assigned airman strength as of 30 June 1966 represents 95.1 percent of the programmed spaces.

AIR NATIONAL GUARD

Resident Training of Air National Guard Personnel at Air Force Schools (FY 65-FY 66)

TYPE TRAINING	Officers	Airmen	Man-days
BASIC MILITARY TRAINING followed by on-the-job training with unit of assignment.....		107	14,140
BASIC MILITARY TRAINING followed by attendance at USAF Technical School.....	288		41,118
AIRMAN PROFICIENCY TRAINING at USAF Technical School	53		5,901
OFFICER PROFICIENCY TRAINING AND AIRCREW TRAINING at USAF School.....	54	...	6,559
TOTAL	54	448	67,718

Comment: The data reflected above represents an increase of 24,654 training man-days over that reported during the previous biennial. This increase resulted from the increase input of personnel into Basic Military Training and Basic Technical Training at Air Force Schools.

F-102 aircraft, the type assigned to the 116th Fighter Interceptor Squadron, in flight over Mt. Rainier

Section III

GENERAL SUPPORT ACTIVITIES INSTALLATIONS SECTION

PART I

The Installations Section is responsible for the new construction, modification, maintenance, and operation of all facilities controlled by the Washington National Guard. It is also responsible for all State property, equipment, and supplies used by the Department. The National Guard occupies forty installations in thirty-five communities throughout the State. The installations vary in size from less one acre with one building to the Camp Murray Reservation with two hundred thirty-four acres and sixty-nine buildings. During this reporting period, \$1,204,854.63 has been expended in new construction, major improvements, and maintenance. Of this total expenditure \$792,694.24 was Federal funds. Cost of operation of all facilities was approximately \$1,240,000.00 during this period. Sixty state employees are currently authorized in the Installations Section.

PART II

The Capital Improvement Program has progressed satisfactorily within the limited funds available. The reduction of available State funds and the proposed reorganization have reduced the State appropriation and the allotment of Federal funds. The three major projects, completed during this period were contracted during the prior reporting time. These projects were the Anacortes Armory, Bellingham Air National Guard Expansion, and the Army Aviation Shop-Hangar Facility at Gray Field. Other projects in the program were modifications and minor new construction. The conversion of the 116th Fighter Interceptor Squadron from F-89 aircraft to the F-102 aircraft required many modifications in the support facilities at the Air National Guard Base, Spokane International Airport. These modifications were supported by Federal contract and purchase and hire projects. It is anticipated that the shortage of funds will continue. This will limit the progress of the Capital Improvement Program.

Three years of a six year major maintenance program have been completed. The program is progressing on schedule. The appearance of most of our installations has improved. Emphasis has been placed on roof repairs, heating system repair, and painting. This program will bring all facilities into condition that a comprehensive preventive maintenance program will be able to maintain the buildings and grounds in an acceptable condition. The program should further reduce the costly emergency repairs that were necessary in the past. Continued funding at the current level will allow the successful completion of the program.

Operational costs of Pier 91, Seattle, and two office buildings at Camp Murray were reduced by contract janitorial and ground maintenance. The initiation of these contracts allowed a reduction in personnel and supplies. A savings of approximately \$14,300.00 per year was realized.

During the biennial period, a reorganization within the Headquarters placed the responsibility for the Agency's supplies to the Installations Section.

A supply officer was authorized to perform the duties connected with supply and State property. This change improved the management and control by consolidation of all the Department's supply functions under one Section. The reorganization also authorized an additional position in the construction and maintenance section. This added employee will greatly improve the supervision and control of the maintenance program.

A ten year program for replacement of unserviceable State property and equipment was approved in our current Budget. Funds for the initial two years were appropriated. The majority of the State property and equipment used by the National Guard was secured prior to World War II or received from the Selective Service System at the close of the war. Tables of authorization for each Station have been revised to indicate the current requirements based on troop allocation. Some salvage furniture and equipment has been sold through Central Stores. The procedure for disposal of unserviceable items being replaced has been developed. The current annual inventory is being made with special emphasis on classification of serviceability of the property. This information will be used to modify the program to reflect changes necessary to accomplish the program goals. From the experience derived in the initial year of the ten year program the results indicate that the expenditure of our initial program request of \$171,500.00 over a ten year period will meet all program objectives.

PART III

BIENNIAL REPORT

United States Property and Fiscal Office

The United States Property and Fiscal Officer is assigned the responsibility of G-4 on the staff of the Adjutant General with the mission to procure, store and distribute to the Washington National Guard such equipment and supplies as are authorized by the Departments of the Army and Air Force, and for which Federal Funds are provided. Further, he is responsible for obligating, accounting, reporting and financial planning and administrative control of all Federally appropriated funds allotted to the State of Washington for National Guard use. In accomplishing the above mission, he functions as accountable

officer to the Federal Government for all Federal property, as Class B Agent Officer to U.S. Army Finance and Accounting Officer for payment of troops, as Transportation Officer and as Purchasing and Contracting Officer. In order to accomplish this mission, Federally paid employees are provided. Also, Federally paid employees are provided for the State Maintenance Officer, to individual units of the Army National Guard, for the Air National Guard and for the Air Defense units. As of 30 June 1966, there were 857 employees on the payroll.

Federal funds furnished to the USPFO for support of National Guard units within the State are as follows:

	Army	Sixth Army	Air
Medical Care	\$ 20,172	\$ 28,690
Field Training	1,499,450	551,975
Alert Pay & Other Exercises	44,896
Schools, incl Tvl & Hosp Pay	629,046	7,455	314,370
Subsistence	444,309	60,582
Individual Clothing	409,155	70,082
Organizational Equipment	852,951	174,592
Petroleum Products	207,734	38,566
Oper Supplies & Civ Tvl	575,508	43,204	835,110
Technician Pay	7,363,648	4,530,706
Repairs & Util, incl Sve Contracts	126,567	319,602
Construction	69,639
On-Site Expense (Air Def)	135,052
Total	\$12,203,592	\$50,659	\$7,038,810
GRAND TOTAL	\$19,293,061		

This represents an increase of \$1,755,835.00 over the past reporting period of 1 July 1962-30 June 1964.

The United States Property and Fiscal Officer does not account for Federal funds expended for armory drill or unit training assemblies for National Guard troops or for the pay and allowances for Army and Air Force officers and enlisted men assigned to the Guard as Advisors. Although exact figures are not available, in order to present a realistic picture of the Federal funds expended in support of the Washington National Guard, the following figures based on reports of drill pay submitted by units of the Washington National Guard and an estimate of the pay of Federal Advisors during the period of this report, are submitted as follows:

Armory Drill & Unit Training Assembly Pay	\$ 4,725,577.00
Advisors' Pay (Estimated)	1,650,000.00
Federal funds accounted for by USPFO	19,293,061.00
TOTAL FEDERAL FUNDS	\$25,668,638.00

During this reporting period the Washington Army National Guard assumed the responsibility of completely manning two Nike-Hercules sites.

The USPFO has installed an Automatic Data Processing system during this reporting period, utilizing an IBM Model 407 accounting machine and related

equipment. At the present time the following functions have been converted to ADP procedures:

Fiscal and Accounting functions

Civilian Personnel Payrolls and Time & Attendance Reports, including related documents

Monthly Military Personnel Strength Reports

Manpower Performance Data Reports

Technician Status Reports

Equipment Status Reports

All Requisitioning Procedures

Stock accounting procedures are now in the process of conversion and it is anticipated that this will be accomplished by 1 January 1967.

During Fiscal Year 1966 a major reorganization took place in the Washington Army National Guard with the advent of the Selected Reserve Force. This necessitated a complete review of equipment assets and redistribution of the major portion. Additional equipment was received and a considerable amount distributed to other States.

Major items received are as follows:

- 2 ea Mortar, 4.2
- 4 ea Rifle, Recoilless, 105MM, ¼ ton Truck Mounted
- 3 ea Flame Thrower, Portable
- 6 ea Guidance & Launching Station (ENTAC)
- 4 ea Helicopter, UH-19D
- 1 ea Vessel, Supply, 176 ft
- 8 ea Truck, Tractor
- 15 ea Ammo Trailer
- 44 ea Cargo Trailer
- 3 ea Howitzer, Self Propelled, 105MM
- 1 ea Recovery Vehicle, Tracked, M88
- 92 ea Misc Commercial Vehicles
- 1 ea Lathe, Floor Mounted
- 1 ea Shaper, Floor Mounted
- 1 ea Scoop Loader, 2½ yard
- 1 ea Crane Shovel, 20 ton
- 7 ea Misc Compressors
- 3 ea Misc Shoos Sets, Semi-trlr Mtd
- 4 ea Semi-trailer
- 2 ea Radio Teletypewriter Set, Truck Mtd
- 4 ea Shop Set, Truck Mtd
- 150 ea Misc Tool Kits
- 87 ea Misc Binoculars & Telescopes
- 40 ea Misc Generators & Power Units
- 99 ea Misc Office Machines
- 87 ea Misc Tents
- 5 ea Carrier, Personnel, M113
- 18 ea Carrier, Personnel, M59
- 40 ea Misc Signal Test Sets
- 46 ea Misc Medical Sets
- 35 ea Machine Gun, 7.62
- 889 ea Rifle, Cal. .30 M1
- 249 ea Pistol, Cal. .45
- 3 ea Carrier, Mortar, SP M84
- 2 ea Tractor, Full Track

In addition to the above equipment, approximately 220 each ¼ ton M38A1 Trucks were received in "as is" condition from Active Army fall-out. These vehicles are being placed in serviceable condition and issued to replace M38 trucks presently on hand. SRF units are now completely equipped with M38A1 Trucks.

Equipment distributed to other States and to the Active Army is as follows:

- 2 ea Airplanes, Observation
- 1 ea Helicopter
- 73 ea Truck, Cargo, ¾ ton
- 14 ea Misc Radio Sets
- 8 ea Howitzer, Towed, 105MM
- 3 ea Repair Shop, Truck Mtd
- 2 ea Truck, Cargo, 5 ton
- 1 ea Launcher, Rocket, M91

Total value of property transferred to depots, other States and Property Disposal was \$1,737,125.69.

At the end of the reporting period the Army National Guard Logistics Division is maintaining approximately 5,500 active stock record cards, including direct exchange and Self-Service Supply Center items. This represents a small increase over the last reporting period. However, we have a great deal of activity in "fringe" type items for which there are insufficient recurring demands to warrant stockage. The Air National Guard supply account has approximately the same size account in terms of number of items, but not as much volume.

FINANCE SECTION

The Finance Section is responsible for all fiscal affairs of the department including accounting for all expenditures and receipts, formulation of the biennial budget request, and preparation of allotment requests based on appropriations made to the department by legislative action. In the past year, this section has been given the added responsibility of all business management functions which were formerly performed by the Administrative Assistant, Military. As recommended by the Council of Governmental Reorganization, this position was eliminated and the functions and responsibilities of the position were assigned to this section and the Installations Section. The primary functions of this added responsibility are approval and control of all armory leases and casual rentals, and state-paid personnel management.

During the period of this report, a total of \$2,425,914.21 in Appropriated Funds was expended in support of the organized militia of Washington, an increase of \$108,193.18 over the preceding biennial expenditures. Of this increase, \$3,479.78 was from the General Funds of the state, and \$104,713.40 was from the department's Armory Fund. Expressed in percentages, the total increase in expenditures over the preceding biennium was 4.66%; the increase in General Fund expenditures was .0018%, while the increase in Armory Fund expenditures was 26.82%. Of the total expenditures of \$2,425,914.21, \$1,930,903.48 was expended from the General Fund as against \$1,927,423.70 in the preceding biennium, and \$495,010.73 was expended from the Armory Fund as against \$390,297.33 in the preceding biennium. Non-appropriated Federal

funds in the amount of \$134,944.52 were expended for support of the National Guard from the two (2) 100% Federal Service contracts as explained below.

Forty-five (45) installations are under control of this department, thirty-two (32) of which are state owned and thirteen (13) are leased or under license or use permits from the Federal Government. Of these forty-five installations, forty (40) are used or occupied by units of the Washington National Guard; twenty-eight (28) of the state-owned installations are in use, three (3) have been closed because of obsolescence or non-requirement, and the armory at 305 Harrison Street, Seattle, is leased to the City of Seattle. Of the three which have been closed, two (2) are being used by other agencies of the state and one (1) has been abandoned. Twelve (12) of the thirteen leased or licensed installations are being occupied by units of the National Guard; the facility at Felts Field in Spokane being sub-leased.

Due to the quasi-military structure of this department, and the requirements of the Departments of the Army and Air Force in maintaining readiness for call to active duty in case of national emergency, these departments participate with the state in paying the costs of maintenance and operations of certain Army and Air National Guard installations. The Military Department currently has five (5) service contracts with the Departments of the Army and Air Force which provide for Federal reimbursement to the state of 75% of the costs of certain facilities at Aberdeen, Bellingham, Camp Murray, Centralia, Fort George Wright, Midway, Olympia, Port Orchard, Redmond, Seattle, Tacoma, Vancouver, Walla Walla and Yakima, and 75% of all costs of the Air Guard installations at Bellingham, Four Lakes (Spokane), Boeing Field (Seattle) and the Spokane International Airport. In addition, there are two (2) service contracts which provide for 100% support for opening and closing costs of facilities at Camp Murray which are used during Annual Field Training, and a portion of the Spokane International Airport occupied by units of the Air National Guard for air defense purposes.

Funds for the operation of this department are appropriated by the Legislature from the General Fund and from the Armory Fund, based on the estimated receipts to the Fund. Revenue sources of the Armory Fund are Federal Reimbursements, as above, proceeds from Armory rentals as authorized by RCW 38.20.010, and interest earnings on deposits with the State Treasurer. During the period of this report, total revenues accruing to the Armory Fund amounted to \$475,564.41, derived from the above sources as follows:

Federal Reimbursements	\$233,084.16
Armory Rentals	\$230,392.79
Interest Earnings	\$ 12,087.46

Federal reimbursements to the State General Fund during the period amounted to \$14,688.17, and Federal contributions to Federal Employee Retirement expense were \$394,912.50.

Following is a summary of disbursements and revenues by fund, program, major areas and source, and a list of state owned, leased, licensed or use permit facilities of the department:

SUMMARY OF DISBURSEMENTS BY PROGRAM AND FUND

Appropriated Funds	General Fund	Armory Fund	Total
General Administration	334,686.99	7,268.48	341,955.47

MILITARY SUPPORT TO CIVIL DEFENSE SECTION

PART I

GENERAL RESPONSIBILITIES AND FUNCTIONS OF THE SECTION

The Military Support to Civil Defense Section was organized on 1 May 1965, with the employment of five National Guard Technicians (4 Officers and 1 Enlisted man). The section has the following responsibilities; 1) pre-attack planning and coordination of military support to civil defense in emergency situations, 2) provide liaison between the military and civil agencies, 3) maintain a listing of all military forces made available for military support to civil authority, 4) training a nucleus of National Guard officers and enlisted men capable of assuming operational control of assigned military forces (active and reserve) engaged in providing support to civil authorities in an emergency, 5) develop and maintain plans for mutual support activities, 6) monitor civil defense training of military units.

PART II

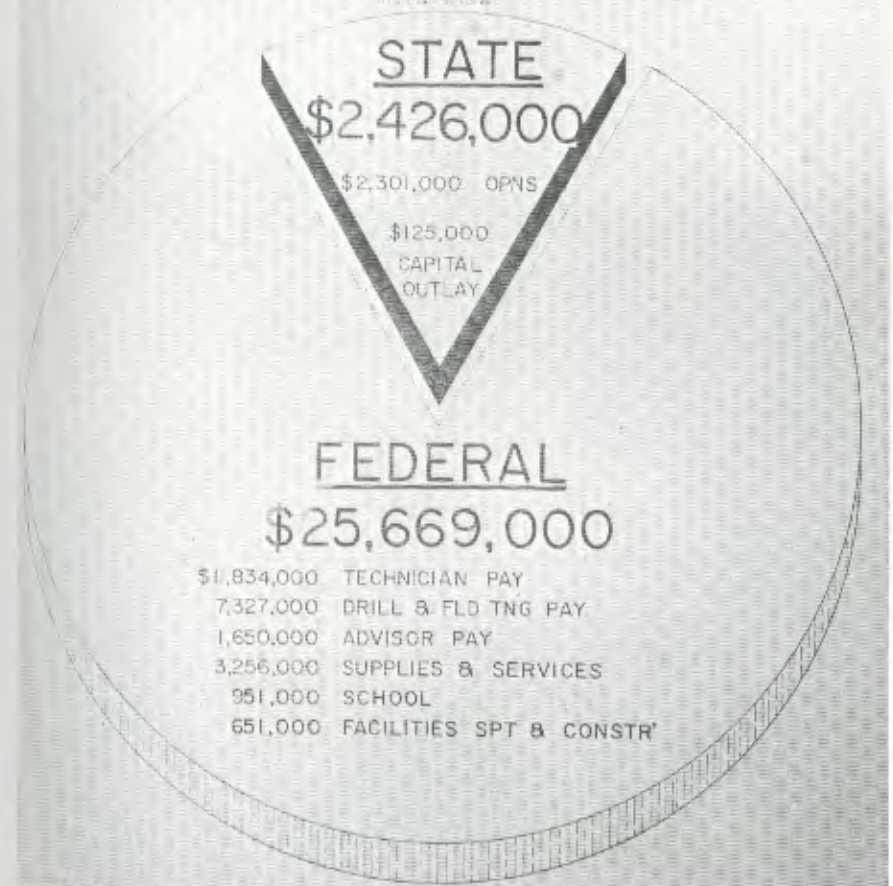

DETAILED SUMMARY

During this reporting period the following goals were established for the section; 1) draft an operations plan for the employment of all military forces to support civil authorities in disaster situations, 2) orient civil agencies and military headquarters in the concept of military support, 3) reorganize the State Headquarters (Army and Air) into a multi-service staff capable of controlling the employment of all military forces made available for military support activities, 4) develop a communications system within the military department that would provide The Adjutant General with communications with other state agencies and military units in the state, 5) provide The Adjutant General a temporary operations center for emergencies, 6) establish a training program for the State Headquarters Staff.

A draft of the operations plan has been completed and disseminated to all interested agencies for their comments prior to publishing the final plan and distributing it to the field. Orientation briefings have been conducted with state and local civil defense agencies and the senior military headquarters within the state. Liaison channels have been established between civil agencies and the military as well as with the military departments of the contiguous states. The State Headquarters has been reorganized into a multi-service staff and has been conducting training in civil defense subjects to include participation in civil defense exercises. In the event of mobilization this Headquarters will be designated, Washington State Area Command (WASAC) 6th US Army.

Five radios have been installed in the temporary operations center to provide communications with the following agencies; State Department of Civil Defense, Department of Highways, Washington State Patrol, Department of Game, Department of Fisheries, and Department of Natural Resources. The fifth radio is on loan from the Air National Guard to provide communications with their headquarters in; Spokane, Seattle, Bellingham, Salem and Portland. The Military Support Sections Office, Building 26, at Camp Murray, has been set up as the temporary operations center. Operations maps, communications and office space are available to The Adjutant General and his Staff. This is not a protected facility and could not be used in case of a nuclear disaster. It would, however, be adequate for use in natural disasters.

FUNDS EXPENDED FOR WASHINGTON NATIONAL GUARD

I am the Guard

Civilian in Peace, Soldier in War . . . of security and honor, for three centuries I have been the custodian, I am the Guard.

I was with Washington in the dim forests, fought the wily warrior, and watched the dark night bow to the morning. At Concord's bridge, I fired the fateful shot heard 'round the world. I bled on Bunker Hill. My footprints marked the snows at Valley Forge. I pulled a muffled oar on the barge that bridged the icy Delaware. I stood with Washington on the sun-drenched heights of Yorktown. I saw the sword surrendered . . . I am the Guard. I pulled the trigger that loosed the long rifle's havoc at New Orleans. These things I knew—I was there! I saw both sides of the War between the States—I was there! The hill at San Juan felt the fury of my charge. The far plains and mountains of the Philippines echoed to my shout . . . On the Mexican border I stood . . . I am the Guard. The dark forest of the Argonne blazed with my barrage. Chateau Thierry crumbled to my cannonade. Under the arches of victory I marched in legion—I was there! I am the Guard. I bowed briefly on the grim Corregidor, then saw the light of liberation shine on the faces of my comrades. Through the jungle and on the beaches, I fought the enemy, beat, buttered and broke him. I raised our banner to the serene air on Okinawa—I scrambled over Normandy's beaches—I was there! . . . I am the Guard. Across the 38th Parallel I made my stand. I flew MIG Alley—I was there! . . . I am the Guard.

Soldier in war, civilian in peace . . . I am the Guard.

I was at Johnstown, where the raging waters boomed down the valley. I cradled the crying child in my arms and saw the terror leave her eyes. I moved through smoke and flame at Texas City. The stricken knew the comfort of my skill. I dropped the food that fed the starving beast on the frozen fields of the west and through the towering drifts I ploughed to rescue the marooned. I have faced forward to the tornado, the typhoon, and the horror of the hurricane and flood—these things I know—I was there! . . . I am the Guard. I have brought a more abundant, a fuller, a finer life to our youth. Wherever a strong arm and valiant spirit must defend the Nation, in peace or war, wherever a child cries, or a woman weeps in time of disaster, there I stand . . . I am the Guard. For three centuries a soldier in war, a civilian in peace—of security and honor, I am the custodian, now and forever . . . I am the Guard.
