

# MINUTES

## Special Emergency Management Council Meeting

June 3, 2021 | 0902 | *Meeting called to order by* Jason Biermann, Chair

---

### Attendees

---

1 A list of virtual primary and alternate member attendees is at the end of these minutes.

---

### Approval of Minutes

Jason Biermann, Chair

2 A motion was made by Chuck LeBlanc to approve the March 11 minutes as written. It was seconded by Joann  
3 Boggs - Passed

---

### Opening Comments

---

4 **Robert Ezelle** gave an overview of support to the Department of Health (DOH) over the last year  
5 and a half in response to COVID19. The Emergency Management Division (EMD) is working with  
6 DOH to develop a plan for backstock of PPE for the state of Washington. The National Guard and  
7 Title 32 orders will extend through the end of the fiscal year. Demobilization is in process to  
8 drawdown the National Guard who are helping Employment Security Department, vaccination sites,  
9 and food banks.

10 EMD continues to work four concurrent disasters. Fire season is looking like it might be a difficult  
11 one. The Guard is prepped to assist Department of Natural Resources, if necessary. New staff are  
12 being hired in Public Assistance and Mitigation because of an increase in workload.

13 Kevin Wickersham was introduced and welcomed as the new Response Section Manager.

14 **Jim Baumgart** said he has been listening to the good efforts of the EMC Strategic Planning  
15 Workgroup. He is looking forward to renewed commitment and conversation around how the  
16 recommendations turn into tasks in the coming legislative and budgetary cycles. Baumgart shares  
17 the concern for multiple concurrent emergencies. The heavy lift is always done by those at the local  
18 level.

---

### Committee Reports

---

#### 19 **EMAG meeting report**

20 Submitted by Jason Marquiss, EMD

21 During the April EMAG meeting the two primary work items were:

- 22 - Grants reviewed for EMPG were:
  - 23 ○ 21 Grants Portfolio Update
  - 24 ○ 21EMPG Allocations and Grant Changes

- 25 ○ 20EMPG-S Status
- 26 ○ 20EMPG Status
- 27 ○ 19EMPG Status
- 28 ○ Key discussion points
  - 29 ▪ The 21EMPG timeline was published.
  - 30 ▪ Tentative allocations for 21EMPG.
  - 31 ▪ Refinement of options to spend down 19EMPG turnback funds.
- 32 - EMAG Charter: A EMAG member workgroup was identified to refine the small group work
- 33 discussions conducted between FEB-APR. The group will provide draft recommendations for
- 34 permanent changes to the EMAG charter. The most significant of which the establishment of a member
- 35 serving as the EMAG Chair and the establishment of a member vice-chair.

## 36 Inclusion and Equity Subcommittee

37 E&I Co-Chair: Kim Conner, WA State Independent Living Council (WASILC)

38 The subcommittee is co-chaired by staff from DOH and WASILC. The subcommittee has not met since COVID

39 began and staff changes at DOH. There are no plans to meet in the future.

40 In lieu of an E&I report, below are the accomplishment of the Coalition on Inclusive Emergency Planning

41 (CIEP) Network, a WASILC's program. CIEP's partners include EMD, DOH, FEMA, local EMD's, Red Cross,

42 Centers for Independent Living (CILs), disability advocates and more. Also attached are two after action

43 reports and CIEP's standup protocol.

- 44 ▪ Hold bi-weekly CIEP Stakeholder networking meetings
- 45 ▪ Ongoing discussion on DeafBlind Access to 9-1-1 and Emergency Notifications with EMD, ODHH, and
- 46 community members
- 47 ▪ Technical Assistance (TA) with DOH on equitable and accessible vaccine distribution
- 48 ▪ TA with EMD on Text-to-911 and Real-Time Text and 911 verbiage, ESF6 Plan updates, Cascadia Rising
- 49 exercise, Greater WA Shake Out Earthquake Drill with new ShakeAlert alerting app
- 50 ▪ TA with WA Fire Adapted Communities Learning Network book on Wildfire Recovery for
- 51 Leavenworth
- 52 ▪ TA with FEMA Region 10 on Yakima vaccination site
- 53 ▪ Finalized After Action Report on wildfire response from September (Attached below)
- 54 ▪ After Action Report on Evaluation of Pierce County Outdoor Alerting System upgrade to include
- 55 flashing lights. (Attached below)
- 56 ▪ CIEP partners with DOH, ODHH and other deaf advocates on ASL videos in response to COVID
- 57 ▪ Provided TA to Joshua Hackney and Yakima County Emergency Management on COVID testing sites
- 58 and wildfire response
- 59 ▪ Participated in national advocacy efforts with Partners in Inclusive Disability Strategies (PIDS),
- 60 National Emergency Numbering Association (NENA), National Independent Living Council
- 61 Emergency Preparedness Subcommittee (NICL-EP), and Telecommunications for the Deaf and Hard of
- 62 Hearing (TDI)
- 63 ▪ CIEP now is part of WebEOC to maintain situational awareness

64 Discussion and advocacy for an AFN Coordinator position within EMD at Disability Emergency Preparedness

65 Conference, November 2020 (See overview in [CIEP Alert newsletter](#)).

## State Emergency Response Commission (SERC)

Submitted by Patrick Reid

### Training Coordination (HazMat Training)

- Virtual LEPC-Tribal Conference and HazMat Workshop: The Hazmat Workshop and LEPC-Tribal Conference resources are being pooled to provide a “Whole Community” approach to the trainings. The combined month-long event took place from April 6<sup>th</sup> to May 6<sup>th</sup> with classes being held every Tuesday and Thursday during that time frame. Registration will be announced shortly.

### EPCRA Compliance and Outreach

- Flipped reporting year over on January 1<sup>st</sup>; those reports are due March 1<sup>st</sup>, 2021. Tier 2 reports are coming in.
  - 1,300 reports have been submitted, with a historical high of approximately 5,000. Currently at approximately 25% of reports in. There have been many exemptions for not meeting the reporting threshold.
  - Reminder: data collected includes Expanded Hazard category.

### HMEP Grant Update

- Received year 3 allocation from PHEMSA was awarded in December. It was \$20,000 more than anticipated by SERC.
- The new grant application is due to PHMSA March 11<sup>th</sup>. Award to be received toward the end of September. Subrecipient agreements will be sent out after it is received.
- SERC allocated \$18,000 to purchase additional Emergency Response Guides.
- March finalized state application for SERC to review per the HMEP requirement.
  - Reallocation of Year 3 funding of \$34,312 to the Haz-Mat Training program delivered by the WSP because of the funding shortfall in their training program budget.

**LEPC Planning Update** Benton County turned in their plan for SERC Review. It is with partnering state agencies (WSP and ECY) for review. SERC reviewed and provided feedback to Franklin County EMA.

**Strategic Planning and Charter Update.** The articles will be out for review in June and a meeting to accept in July.

### Emergency Response Guides -

- 11,880 Emergency Response Guides have been sent out so far to first responder agencies.

**SERC Chair Appointment-** Patrick Reid, Deputy Fire Chief of Pasco to SERC Chair Position.

### Update on the progress of the LEPC Survey LEPC survey.

- Of 43 known LEPCs, 25 completed survey for completion rate of 58%
- Kim Moore for Department of Health provided an overview presentation on the American Water Infrastructure Act (AWIA) update.
- **On Tuesday, April 6<sup>th</sup>.** The SERC recognized chief William “Bill” Whealan for his time and service dedicated to the commission. He officially retired at the end of 2020.

105 **Seismic Safety**, Casey Hanell

106 Nothing to Report

107

108 **WAMAS**

109 Submitted by Mark Douglas, EMD

110 There has not been a meeting scheduled as of today 5/25/21.

111 I recommend that Intra-State Mutual Aid Subcommittee membership be an agenda item for an upcoming EMC  
112 meeting and solidify the subcommittee membership. All members must come from the EMC so this seems an  
113 appropriate venue. Once the membership is available a meeting can be held to move the team forward as the  
114 group intends. Previous actions are below:

115 The last plan for the subcommittee, October 24, 2018 was to replace the one missing member and Bill Gillespie  
116 will serve until a replacement can be found for his position. The positions will be filled using WSEMA, Local  
117 emergency management or Sheriff's from the EMC membership.

118 The subcommittee met in October 2018 for the annual meeting and it was recognized that the subcommittee  
119 membership should have representation from the actual users of the WAMAS system. A vacant member  
120 position shall be filled, and a long-standing member will be replaced using EMC members that represent  
121 people authorized to use this mutual aid system. Further accomplishment was made towards establishing a  
122 coordination and training body for facilitation of the WAMAS system. A new concept will be developed using  
123 Homeland Security Regions within the state as advisors and this will be further examined when the committee  
124 membership is finalized.

125 Current committee members of WAMAS are: Robert Ezelle, vacant position, Bill Gillespie, Ray Cockerham, &  
126 Philip Lemley

127 After the subcommittee updates were discussed, Bill Gillespie requested names of committee  
128 attendees be included in all the subcommittee reports.

---

EMC Strategic Planning

---

129 Sharon Wallace provided an overview of the 2022-23 strategic plan and each of the six strategies with an  
130 emphasis on strategies 1, 2, 3, and 6.

131

132 **Strategy 1. Provide purpose and focus for the EMC through an annual strategic workplan.**

133 After some discussion, Chandra Fox moved to accept the strategic plan as presented. Greg Welch seconded –  
134 passed. Mike Harris will lead this strategy.

135

136 **Strategy 2. Obtain feedback on EMC Annual Report.**

137 Jason Biermann proposed a new format for the annual report. It is a shorter and more-targeted approach. A  
138 change in the timing to align with fiscal year versus the calendar year cycle puts the report in line with budget  
139 legislation and keeps the data current. With time running out for this current year report, it was suggested that  
140 the report center around COVID19. To focus on one subject rather than tackling multiple subjects will provide  
141 for a quick turnaround. During the next fiscal year, the format will be as presented, using the following  
142 recurring, current, and future issues as priorities that were identified in the EMC survey this past February:

143 Recurring issues: Resource ordering, data collection, and information sharing  
144 Current issues: Funding for emergency management and hazard mitigation  
145 Future issues: Attrition of emergency managers, post-COVID.  
146

147 A workgroup was identified for the annual report to include Jason Biermann, Arel Solie, and Casey Hanell.  
148

149 **Strategy 3. Increase perception of EMC value and influence.**

150 Creating a presentation that one could share with constituents, providing written input to venues (i.e. monthly  
151 newsletters), refreshing subcommittees to increase momentum going forward, and meeting more frequently  
152 for shorter meetings over the year were ideas shared that could help increase the EMC perception. It was  
153 further suggested that the FEMA Region X Administrator, Vince Maykovich, TAG, Robert Ezelle, and Jim  
154 Baumgart be given more time at meetings to keep the committee abreast of what is happening. Stephanie  
155 Wright motioned to meet every other month for two hours and Fred Brink seconded. The motion passed.

156 A workgroup was identified for this strategy as: Kirk Holmes, Eli King, Chandra Fox, Stephanie Wright, Arel  
157 Solie, Bill Gillespie, Nate Weed, Scott Engle and Brian Schaeffer.

158  
159 **Strategy 4. Ensure consistent communications with EMC members and constituents.**

160  
161 **Strategy 5. Review and analyze funding for emergency management.**

162  
163 **Strategy 6. Review and update RCW 38.52.040.**

164 Section I. under III. Purpose of the EMC Charter was addressed and a team was created to review, discuss,  
165 and recommend changes (if any) to TAG.

166 III. Purpose

- 167 I. Shall review administrative rules governing state and local emergency management practices  
168 and recommend necessary revisions to the Adjutant General. The list includes, but is not limited  
169 to:  
170 118-03 Mt. St. Helen’s closure – Rules for permitted entry and/or occupation  
171 118-04 Emergency worker program  
172 118-09 Criteria for eligibility and allocation of emergency management assistance funds  
173 118-30 Local emergency management/services organizations, plans and programs  
174 118-40 Hazardous chemical emergency response planning and community right-to-know  
175 reporting

176 The workgroup identified for this project is: Chandra Fox, Phillip Lemley, Fred Brink, Eli King, Joann Boggs,  
177 and Kirk Holmes. The EMAG will be involved with 118-04, 118-09, and 118-30.  
178

179 The Strategic Planning Group is asked for volunteers for Comprehensive Emergency Management Plans  
180 (CEMP) rulemaking. The EMAG will be involved in the CEMP rulemaking.  
181

182 Kim Conner and Philip Lemley offered to help where needed. Others were encouraged to let Jason Biermann  
183 or Sharon Wallace know if they would like to be a part of any of the workgroups mentioned.  
184

185 COVID

- 186 • Vaccine distribution and disease trends

187 **Andy Rose, DOH COVID Response Incident Commander** gave a COVID update. To date, there have  
188 been 403k cases and 5,801 deaths. The trend is turning downward. There are still spot outbreaks  
189 happening in industry and unvaccinated populations. Most of DOH’s outbreak response is focused on  
190 providing quick mitigation strategies for these outbreaks. COVID hospitalizations are trending  
191 downward. There are currently 457 positive cases with 72 on ventilators. Occasional system surges of  
192 non-COVID impacts are being tracked, such as, a baby boom and nursing staff taking much-needed  
193 time off or burnt-out nursing staff leaving the profession.

194  
195 Over the last six months, 7.1 million vaccinations were administered. Vaccine clinics continue in hard-  
196 to-reach populations areas, while mass vaccine sites are weaning away. Of the eligible population, 52  
197 percent has at least one dose. Of the entire population, 44 percent are vaccinated. Vaccination trials are  
198 currently underway for the 12 and under population. DOH is starting a CAR-A-VAN project to  
199 provide mobile vaccination sites.

200  
201 Today at 2:30 p.m., a big announcement is expected from the Governor about state-led incentives for  
202 vaccinations. This is an intense coordination between the Governor’s Office, the Lottery Commission,  
203 and Department of Health (DOH).

204  
205 The Roadmap to Recovery Reopening Plan has a metric of June 30 or 70 percent vaccination, whichever  
206 comes first. The state continues to find ways to provide guidance to people vaccinated or not to keep  
207 them safe. Businesses, the public, and large events are informed through orders and proclamations of  
208 the reopening. DOH continues to point people to the benefits of the vaccine and at the same time  
209 protecting and supporting those who cannot vaccinate.

210  
211 Questions were discussed regarding the June 30 re-opening in the business community. The  
212 Governor’s office will continue to provide guidance messaging as the re-opening nears.

213  
214 **Stacey McClain, EMD, State Coordinating Officer** discussed federal activities in response to COVID.  
215 There are only two active mission assignments happening currently. One is the Yakima CVC  
216 vaccination site, which remains an open and supported at the local level for at least for a couple more  
217 weeks. The second mission is the Title 32 mission with the National Guard, but nearing the end, likely  
218 in September, to prepare for fire season.

219  
220 FEMA has new reporting criteria for the state and locals for eligibility to the 100 percent cost share,  
221 with a big push on equity and inclusion. The funding is being pushed to high-risk communities and  
222 underserved populations. This has created a lot of reporting work at the state and local level.

223  
224 PPE has been ordered through the federal system and this, too, is coming to an end. As the state opens  
225 back up, PPE and storage reimbursement will go away. EMD is currently working with DOH for a plan  
226 for excess PPE.

227  
228 The FEMA Individual Assistance Funeral Assistance Program is underutilized in Washington.  
229 Currently, the federal FEMA money obligated to the state in response to COVID is about \$867million.  
230 There is about \$1.7 billion pending in the system right now. This does not include the funds utilized in

231 the Yakima CVC site and Title 32 missions. These two missions alone are running about \$156 million in  
232 costs. Additionally, the Individual Assistance program, which includes unemployment and funeral  
233 costs in running about \$780 million. None of these include the CARES Act funding.

- 234  
235 • CSZ Highlights of CSZ planning from federal, state, and local perspectives:  
236 **Shane Moore, EMD**, provided an overview of catastrophic planning currently underway that are  
237 centered around catastrophic incidences.

238  
239 The Critical Transportation goal is to prioritize routes which will need repair following a catastrophic  
240 impact. Each region determined their most vulnerable routes and Washington State Department of  
241 Transportation did the same. GIS maps were developed for visuals. Discussion continue with local  
242 emergency managers to create a plan that will help avoid any issues, such as mismatch priorities and  
243 hazards identification.

244  
245 The Mass Care Services Planning Workgroup was formed through the SCRIPT. Services include initial  
246 mass care, emergency assistance, housing, and human services. The priority of these efforts is focused  
247 on life-sustaining resources.

248  
249 (Water) Infrastructure Systems (one of the four Core Capabilities) is the focus, because it ties so heavily  
250 to mass care. The Infrastructure Workgroup represents all sectors and levels of government, as well as  
251 the private sector. The goal is to identify the most vulnerable water infrastructure systems. Most of the  
252 infrastructure will not be repaired quickly enough following an incident. Understanding this, the  
253 group began work on how they will provide water services through alternate means in a timely  
254 manner. They continue to learn local restoration priorities, which are often different region by region.

255  
256 Operations Coordination describes the structure to implement following a catastrophic incident in  
257 which Washington will need to divide either a part of or all the state into geographic divisions and  
258 branches to vertically integrate operations with FEMA. This framework utilizes the Homeland Security  
259 Regions to implement Multi-Agency Coordination Groups.

260  
261 **Andy Caldwell, Lewis County Emergency Manager**, provided a snapshot from the local perspective.  
262 He shared an interactive map depicting the 200 or more bridges in Lewis County. If the region was hit  
263 with a catastrophic earthquake, it would create a series of “islands” across the county. The creation of  
264 the map was the initial step in a community preparedness kick-off. School districts were asked to  
265 convey the message to parents of the importance of developing a communications plan with their  
266 student and family members in the understanding that they may not be able to get to one another  
267 during an event. The same information was conveyed to community partners, business partners, and  
268 church partners. This map is circulating the community and is on Lewis County’s website.

- 269  
270  
271  
272  
273 • CR22 – Community lifelines:  
274 **Chandra Fox** introduced the use of community lifelines during a Cascadia Subduction Zone event. The  
275 Community Lifelines construct has come from FEMA and it defines critical government functions into  
276 seven categories, critical to human health and safety or economic security.

- Safety and Security
- Food, Water, Shelter
- Health and Medical
- Energy (Power and Fuel)
- Communications
- Transportation
- Hazardous Materials

Each lifeline consists of components and subcomponents to support its function. For example, food is supported by commercial food distribution, commercial food supply chain, and food distribution programs such as community food banks in cascading order.

This construct supports Cascadia Rising '22 (CR22), because by the time Washington is 96 hours in, impact analysis should be underway. The model illustrates where there are impacts. It also supports engagement of other communities because they cannot help areas impacted until their own communities are stable first. By understanding the subcomponents that have ties into Western Washington, and the affected systems located in that area, it will help to identify their own vulnerabilities. Preparing this way can put Central and Eastern Washington in a better position to help and support Western Washington during an CR22 event.

## Fire Outlook

Expectations for 2021 fire season

**Chief Mike Harris, Franklin County FD#3** gave a fire mobilization update. The first fire mob for 2021 was April 20 in Auburn. We started early but there hasn't been much since. However there have been multiple discussions to prepare. It is difficult to predict, but the drought is significant. There is \$500K set aside for repositioning fire resources to stage them strategically in their region to deploy rapidly when needed. Fire districts must request and coordinate with DNR for the service.

**Reid Wolcott from NOAA** presented information in coordination with Steve Reedy, Maddie Kristell, and Carley Kovacik. Reid gave the best estimates of the weather based on current trends and outlooks. To make their predictions NOAA looks at the current snowpack and long-term drought. The month of June is a good time to gauge how soon fire season will begin. If June is dry, we tend to have an active fire season. And certainly, the most important indication is the long-term climate outlooks during fire season (July through September).

The 2020 fire season was first in number of acres burned over the last 30 seasons. The Washington acres total reached 842,358 acres and Oregon's total was topping over a million at 1,141,613 acres. The historic Labor Day east wind event played a huge role in kicking these numbers upward. In the past 10 years (2010-2020), six of the years were in the top 10 for acres burned. These years ran the entire range of the El Nino/La Nina cycle. Indicating there is not a strong correlation.

Most of the West is currently seeing below normal snowpack and drought conditions. If the weather impacts states across the West, resources will be scarce due to demand for them. Temperatures are seeing a slight uptick in the month of June. It is a good practice to head into the fire season thinking that it will be an active one unless there are strong indicators otherwise.

**Russ Lane and George Geissler of DNR** worked together give an update on their findings. Russ Lane shared some problem trend of mid-elevations timber fires. The 3000-5000 elevation is causing the most

322 concern for DNR. Our state will average about 1000-1200 ignitions per year. Our system is designed to  
323 catch 95 percent of those under 10 acres. Creating about 50-60 large fires. The short-term weather  
324 events are what really impact the fire season. About 85 percent of the fires in Washington are human  
325 caused. If we can effect change on that number, there will be fewer large fires.

---

## Regional Issues Impacting Washington

---

326 Vince Maykovich, Acting Director, FEMA Region X went over some work that FEMA has done over the last  
327 year and a half throughout the state of Washington. Much COVID response has been wrapped with the  
328 conclusion of the Yakima Community-based center in Yakima. There was a tremendous success in the  
329 partnership with Emergency Management Department and the Department of Health in these efforts.  
330

331 Vince Maykovich brought up the funeral assistance program for COVID-related deaths to share that one can  
332 get up to \$9,000 per funeral and a maximum of \$35,500 per applicant. This benefit to the residents of the state if  
333 it applies. These funds are being underutilized. Please help FEMA to get this message out.  
334

335 President Biden directed that the Building Infrastructure and Communities Program (BRIC) announced the  
336 funding for this program will double. The increased funding will help meet the demand for hazard mitigation  
337 across the nation and will enhance FEMA's efforts to benefit disadvantage communities. It was emphasized  
338 the need for building and land use code that account for natural hazards and risk as an essential part of  
339 emergency management. Building resilience in lieu of paying for response and recovery.  
340

341 Washington, Oregon, and Idaho will all participate in the CR22 exercise. FEMA is supporting workgroups in  
342 all three states with technical assistance for exercise and design, as requested. The next major exercise planning  
343 meeting for the region is in October.

---

## Legislative Wrap-Up

Robert Ezelle, EMD

---

344 Of the almost 1,500 bills introduced, 341 of them passed. That is about half the number of bills that would be  
345 seen during legislative session. The proportion of bills passed was somewhat higher - 23.5 percent compared  
346 to 15 percent during most years. All the bills that died in the 2021 session will be alive in the second year of the  
347 biennium at the highest point they reached in the house of origin.  
348

349 Bills passed with a nexus to emergency management.

350 SB5101: Adds tribal representation to EMC

351 HB1271: In addition to other provisions, adds a representative from coroners and medical examiners to EMC

352 SHB1209: Established immunity to civil liability for volunteer providers of certain nonmedical care who are  
353 acting in emergencies.  
354

355 Additionally:

356 \$1M Wildfire Appliance Grants in 2022 for eligible individuals or households that are residents of Douglas,  
357 Okanogan, Pierce or Whitman County and suffered damage to their home or were displaced from a rental unit  
358 used as a primary residence due to wildfires occurring in 2021 and meet certain criteria.

359 Disaster Response Account funding for the state match of 18 open federal disasters.

360 EMD received full funding to continue assisting local emergency planning committees meet their mandatory  
361 planning requirements.

362 EMD received funding and was mandated to lead a Pandemic Response and Recovery After Action Report  
363 Task Force – Funded at only 50% of the estimated costs.

364 Governor’s Emergency Fund was appropriated \$5,000,000 to assist individual Washingtonians and families  
365 during and after a disaster.

366

---

## Open Forum

---

367 An opportunity for interested persons to ask questions or share insights on the meeting and its content.

368

369 Ken Reidy, a citizen of Edmonds, brought up that he believes that WAC 118.30 is not being followed properly  
370 and further believes this some of this section of the WAC is out of date. Reidy is encouraged that a workgroup  
371 is being established to revied the emergency management WACs and hopes that citizens will be provided an  
372 opportunity to provide input in that effort.

373

374 Mr. Reidy also said his city does not have a comprehensive emergency management plan (CEMP). Several  
375 issues have been raised regarding the plan’s functionality. He hopes that the EMC will review the Edmonds  
376 CEMP and take steps to make sure the citizens of the city of Edmonds are protected, as soon as possible. He  
377 thanks everyone for the hard work being done.

378

379 Paula Towne, state contact for Citizen Core Certification, announced her retirement at the end of June. They  
380 hope to have a predecessor by the end of the month. She appreciates her working partnerships with the EMC.

381

382 Sharon Wallace reminded the EMC members and alternates to take the Open Public Meeting Acts training.

---

## Closing Remarks

---

Robert Ezelle, EMD

383 Robert thanked the Council for their participation and robust discussion to jump into the tough issues that  
384 have been a challenge to the EMC for several years. He is looking forward to great things. As the workgroups  
385 come together, there will be updates.

386 Robert also thanked Paula Towne for her years of service and he wishes her well in her next endeavors.
