

Questions & Responses #2

RFP23-018 Olympia Armory Interpretive Sign

Bids Due: September 22, 2022

Questions	Responses
What size is the WMD looking for?	This has not been defined yet as the design will be the result of stakeholder meetings and final sign placement. The sign size will not exceed 48"X48".
Do you have any materials in mind or should we recommend something?	Recommendations are welcomed, and the final decision will be part of the stakeholder design process. Consideration of long-term durability in the Northwest climate and sense of place should be taken into account. UV coating and anti-graffiti laminate are required.
Just one single item?	One sign and supporting electronic files for recreating the sign if damaged in the future. The vendor must also provide draft designs to the committee for approval. Please keep in mind that this project will include attendance and participation in stakeholder meetings. Please ensure the bid takes this into account.
