

Questions & Responses #1

RFP23-021 Archeological Construction Monitoring

Bids Due: March 6, 2023 by 4:30PM PST

Questions	Responses
Can you confirm when the proposals are due?	March 6, 2023 by 4:30 PM PST
For each region that we are applying to work within: Do we need a separate Technical and Cost Proposal for each region or can we submit one Technical and Cost Proposal containing a proposal unit cost sheet for each region?	One (1) technical and cost proposal, containing the unit cost sheet for each region is preferred. The unit costs for your company to respond to monitoring needs in each region just need to be clear. It is our understanding that costs could change given time/distance to travel and regional per diem differences.
Can we include a separate line item for Drive Time on the proposal unit cost sheet? Or will drive time be reimbursable as Field Monitoring hours?	Separate line item for drive time: Yes, more detailed information like this will help us understand the overall costs of your company responding to a particular monitoring need in different regions of the State of Washington. Reimbursement of drive time as Field Monitoring hours: This is also possible, but as mentioned in the sentence above, knowing why that cost changes from region to region is helpful for us to understand the basis for costs.
