22-4902

Washington State Emergency Operations Officer Monthly Report

- 22-4908 • On December 14, the Pacific Northwest Seismic Network (PNSN) reported a 2.9 magnitude earthquake, 7.9 miles deep, occurred at 1256 hours, 15 miles southeast of Ashford in Lewis County.
- 22-4938 • On December 16, Mason County initiated a search for a missing female subject near Shelton and requested Tracking K9's and Ground Searchers (GSAR), which were coordinated with Kitsap, Grays Harbor, and Pierce Counties. The request was later cancelled, and the mission closed, when the subject was successfully located.
- 22-4961 • On December 18, Kitsap County initiated a search for a missing 71-year-old male with health issues in the Port Orchard area and requested GSAR to assist, which was coordinated with Pierce, Jefferson, Thurston, and Mason Counties. The mission was closed later that day when the subject was located safe.
- 22-4999 • On December 20, Kittitas County initiated a rescue of a snowmobiler in the Schnebly Canyon area and requested a helicopter with hoist, which was coordinated with King and Snohomish Counties and then the Air Force Rescue Coordination Center (AFRCC). The request was later cancelled, and the mission closed early the next morning when the subjects were escorted out and transported to the hospital for evaluation.
- 22-5021 • On December 22, PNSN reported a 2.9 magnitude earthquake, 10.7 miles deep, occurred at 2302 hours, 7 miles NW of Morton in Lewis County.
- 22-5090 • On December 27, Clallam County initiated a transfer of an inmate with heart issues to the hospital and requested a helicopter to assist, which was coordinated directly with the AFRCC. The request was later cancelled, and the mission closed when the subject was transported via ground resources.

Washington State Emergency Operations Officer Monthly Report

SEOO Activity for the current month

470	Warnings issued to jurisdictions for imminent or occurring emergencies.
378	Warnings issued to tribal nations for imminent or occurring emergencies.
1151	Notifications conducted to state and local agencies for imminent or occurring emergencies.
10	Resources coordinated for search, rescue, recovery and response operations.

Participated in 12 drills/exercises of which 8 were spill drills.

Conducted the following tests:

Test Conducted (see below for descriptions of each test)	Frequency of test	Number of tests completed this month	Total number of stations tested this month	Number of stations responding during tests initiated by the Alert Warning Center	Contact Success rate for those tests initiated by the Alert Warning Center
NAWAS - FEDERAL	Twice daily	61	0	0	0%
NAWAS - STATE	Twice daily	46	1920	1116	58%
STAEN	At least twice per month	2	26	5	19%
CEMNET	At least 3 per week	13	264	122	46%

Washington State Emergency Operations Officer Monthly Report

Test Conducted (see below for descriptions of each test	Frequency of test	Number of tests completed this month	Test Conducted (see below for descriptions of each test	Frequency of test	Number of tests completed this month
Dedicated phone line test for DOE	At least 1 per week	4	AHAB Siren test	At least 1 per month	1
Dedicated phone line test for CGS	At least 1 per week	4	King County 800 MHz Radio System tests	At least 1 per week	2
AHAB Daily Function status	1 per day	31			

Test information/definitions:

- NAWAS: National Warning System Tests (NAWAS) over the State and Federal circuits. NAWAS connects over 1,800 State and Federal jurisdictions and agencies on the Federal circuit and all counties, some agencies and some tribes on the State circuit. There are four tests a day, two state and two federal, testing 66 drops on two circuits. The number above reflects the four tests a day. Previously the number included the total number of stations contacted during those tests.
- DOE tests: Department of Energy Hanford Site has a dedicated phone and fax line into the EOC and they are tested at least weekly. Only the voice phone line numbers are reported here.
- CGS tests: Columbia Generating Station has a dedicated phone and fax line into the EOC and they are tested at least weekly. Only the voice phone line numbers are reported here.
- AHAB: All Hazards Alert Broadcast System is tested daily through the daily function tests, which tests the functional capability of all coastal and Puget Sound siren systems. The voice and tone sirens are tested monthly. The AHAB Siren activates the coastal and Puget Sound voice and tone sirens during tsunami and other hazardous incidents.
- STAEN: The State Agency Emergency Network (STAEN) connects state agencies via an 800 MHz radio system.
- CEMNET: Comprehensive Emergency Management Network radio connecting all counties and many cities.
- King County 800 MHz System connects the Alert and Warning Center with King County key emergency management and response organizations.
