| <b>OTHER REQUIREMENTS:</b>  |                  |                  |                     |
| <ol style="list-style-type: none"> <li>1. Expected to attend Regularly Scheduled Drill periods, Annual Training, and remain eligible for Worldwide Deployments.</li> </ol>  |                  |                  |                     |
| <b>AREA OF CONSIDERATION:</b>   |                  |                  |                     |
| All members of the Air National Guard and those who are eligible to serve in WA ANG.  |                  |                  |                     |
| <b>WORKING CONDITIONS:</b>  |                  |                  |                     |
| Most of the selectee's time will be working within an office with the 252 OSF staff in an unclass environment; additional time may be spent working within a SCIF environment. Travel may be required from time to time.  |                  |                  |                     |
| <b>SUMMARY OF DUTIES:</b>   |                  |                  |                     |

Serves as primary customer support specialist for the classified and unclassified systems used throughout the unit, provides systems administration support, maintains workstation and server hardware and software. Serves as a technical expert and focal point for the installation and configuration of hardware and software on computers and data associated with assigned systems.

Performs network operations to enable Cyber Protection Team (CPT) missions. Conducts missions to build, deploy, and sustain the Cyber Vulnerability Assessment/Hunt (CVA/H) weapon system. Prepares training for traditional guardsman to support CPT missions and build/trouble shoot the CVA/H weapon system. Member should be familiar with Windows and Unix/Linux based server-client models, basic PC repair, network fundamentals, OSI model, and routing/switching protocols. Member should be familiar with a variety of operating systems and command line based tools to include Linux, Cisco, and Windows. Troubleshoots application server hardware, operating system software, and peripheral network equipment such as routers, bridges, switches, attached cabling system, network interface cards, modems, multiplexers, and concentrators. Assists with oversight and maintenance of the squadron's virtual training range(s), a suite of servers, routers, switches, hubs and other devices which can be configured with a variety of different operating systems in various versions, and with pre-programmed vulnerabilities, to be used in Computer Network Operations (CNO) training. Consults with subordinates, supervisors, specialists, vendors, and sister IO squadrons to maintain training range devices that realistically emulate Air Force networks and are flexibly re-configurable to emulate the network(s) of a specific Air Force base as needed to prepare for vulnerability assessment missions. They are responsible for the daily operation, software, configuration modification and preventive maintenance inspections on all network equipment.

#### **INFORMATION**

1. If selectee is an AGR, assumption of position cannot be made until the Manning Change Request (MCR) has been approved by NGB.
2. If this is a promotion announcement, but a change is required to the manning document – the promotion package may not be submitted until the Manning Change Request (MCR) has been approved by NGB.
3. The unit POC for this announcement must submit a completed DSG Selection Package to the FSS certifying validity of the interview and selection process.

#### **INSTRUCTIONS TO APPLICANTS**

##### **APPLICATION REQUIREMENTS:**

1. Cover Letter
2. Resume that validates member can perform duties outlined in SUMMARY OF DUTIES
3. vMPF RIP (within 30 days)
4. Current Fitness Assessment Results
